ITFAS-Level-1 Certification Test Answers | Latest ITFAS-Level-1 Dumps Ppt

Are you worrying about how to pass NICET ITFAS-Level-1 test? Now don't need to worry about the problem. ExamsLabs that

committed to the study of NICET ITFAS-Level-1 certification exam for years has a wealth of experience and strong exam dumps to help you effectively pass your exam. Whether to pass the exam successfully, it consists not in how many materials you have seen, but in if you find the right method. ExamsLabs is the right method which can help you sail through NICET ITFAS-Level-1 Certification Exam.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

What must be done if the frequency of sensitivity testing is extended to 5 years?

- A. Records of serial numbers shall be maintained.
- **B. Records of nuisance alarms shall be maintained.**
- C. Detectors must be from the same manufacturer.
- D. Detectors must be located in the same area.

Answer: B

Explanation:

Normally, smoke detector sensitivity testing is required every two years, but NFPA 72 allows extension up to five years if the detectors have not experienced frequent nuisance alarms and accurate records of performance are maintained.

NFPA 72 (2022), Section 14.4.4.3.2:

"Where detectors are cleaned and maintained and where records of nuisance alarms and changes in detector locations are kept, the sensitivity testing interval shall be permitted to be extended to 5 years." Keeping a log of nuisance alarms helps assess the reliability of the detectors over time.

Correct answer: C. Records of nuisance alarms shall be maintained

NEW QUESTION # 49

Which two of the following are needed to perform a periodic test of a projected beam type smoke detector? (Choose two.)

- A. Introducing smoke
- **B. Using an optical filter**
- C. Blocking the transmitter
- **D. Using a listed test switch**

Answer: B,D

Explanation:

Projected beam smoke detectors are tested not with actual smoke, but by simulating obscuration using listed tools such as a test switch or optical filter.

NFPA 72 (2022), Section 14.4.2.2.6.2:

"Projected beam-type smoke detectors shall be tested by introducing an obscuration in the beam path using an optical density filter or a method approved by the manufacturer." Some systems include listed test switches for functional checks without disrupting alignment.

Correct answer: Using a listed test switch, Using an optical filter

NEW QUESTION # 50

Smoke detector activation in the ninth-floor elevator lobby shall activate which of the following functions?

- **A. Designated level recall**
- B. Alternate level recall
- C. Ninth-floor supervisory signal
- D. Ninth-floor trouble signal

Answer: A

Explanation:

The designated level recall function is triggered when a smoke detector is activated in that same elevator lobby. This returns the elevator to that floor (usually the ground or main level) for emergency evacuation, unless smoke is present there, in which case

the alternate recall floor is used.

NFPA 72 (2022), Section 21.3.3.1:

"Activation of the smoke detector installed at the designated level shall cause all elevators that serve that level to return to an alternate level." But:

"Smoke detector activation in any other elevator lobby shall recall elevators to the designated level." So:

* If smoke is in the ninth-floor lobby, and that lobby is not the designated level # elevator recalls to designated level.

* Therefore, activation of the ninth-floor smoke detector (not the designated level) causes designated level recall.

Correct answer: B. Designated level recall

NEW QUESTION # 51

At which height above the floor is the sound level measured for public and private mode audible devices?

- A. 7.5 feet (2.3 meters)
- B. 8.0 feet (2.4 meters)
- C. 5.0 feet (1.5 meters)
- D. 2.5 feet (0.7 meter)

Answer: C

Explanation:

Sound level readings for fire alarm audible notification appliances must be taken at a consistent, standardized height to ensure compliance with required dBA levels.

NFPA 72 (2022), Section 18.4.6.1:

"Sound pressure level measurements shall be taken with a sound level meter positioned 5 ft (1.5 m) above the floor in the area required to be served by the system." This applies to both public mode (e.g., schools, offices) and private mode (e.g., staff-only zones like hospitals).

Correct answer: B. 5.0 feet (1.5 meters)

NEW QUESTION # 52

Lights used for fire alarm signaling shall be which of the following colors?

- A. Clear or blue
- B. Clear or red
- C. Clear or nominal white
- D. Clear or amber

Answer: B

Explanation:

Visible notification appliances used in fire alarm systems (like strobes) must be either clear or red to distinguish them from other building systems.

NFPA 72 (2022), Section 18.5.1.4:

"Visible signals used in fire alarm systems shall be clear or nominal red in color." This ensures standardized visual recognition during fire emergencies.

Correct answer: D. Clear or red

NEW QUESTION # 53

.....

A lot of students have used our product and prepared successfully for the test. Every user has rated study material positively and passed the ITFAS-Level-1 Exam. Examslabs gives a guarantee to the customers that if they fail to pass the Inspection and Testing of Fire Alarm Systems Level I Exam (ITFAS-Level-1) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions.
