ATLASSIAN Jira Administration for Data Center Sample Questions (Q47-Q52):

NEW QUESTION # 47

Max wants you to change the way the system fields Created or Updated are being displayed when viewing an issue. How can this be achieved?

- A. Adjust the `jira.date.picker.java.format` in the advanced settings configuration.
- **B. Adjust the language and time zone preferences in Max's user profile.**
- C. Adjust the Complete Date/Time Format in the Jira Look and Feel configuration.
- D. Adjust the `jira.date.time.picker.java.format` in the advanced settings configuration.
- E. Adjust the Day Format in the Jira look and Feel configuration.

Answer: B

NEW QUESTION # 48

Marvin's user account appears in many locations throughout Jira. You want to deactivate his user account. Which location must you definitely update before deactivating him?

- A. Watchers
- B. Project lead
- C. Project permissions
- D. Assignee field
- **E. Reporter field**

Answer: E

NEW QUESTION # 49

The Release Manager is having problems caused by inconsistent naming of versions across projects. He would like to use a more consistent naming convention. The developers do not know the naming convention, and are happy to let the Release Manager rename versions when they get the names wrong. The projects all use the Default Permission Scheme. Which action would allow the Release Manager to update the versions in the projects?

- A. Change the Manage Versions permission in the permission scheme.
- B. Add the Release Manager to the Administrators project role.
- **C. Change the workflow to allow the Release Manager to update versions.**
- D. Add the Release Manager to the developer role.

Answer: C

NEW QUESTION # 50

You are moving a workflow from your staging Jira instance to production. On importing the workflow, Jira notifies you that the post-functions will not be imported.

Staging Jira is on version 6.4 and production Jira is on version 6.3.

Why did this happen?

- A. The apps installed on staging are not the same as on production.

- B. The production and staging instances are using different versions of Jira.
- C. You exported the workflow as XML instead of JWB.
- D. Custom post-functions are not included in workflow export.

Answer: D

NEW QUESTION # 51

One of your teams is maintaining and updating an application that has grown into three distinct modules.

The modules are on different release cycles. The team is struggling to track the versions of the modules, because they have similar numbering schemes.

Which action would you recommend?

- A. Create a new Version field for each module.
- B. Define an issue type for each module.
- C. Split the project into several projects, one for each module.
- D. Split the modules into separate components.

Answer: A
