Besides we have the right to protect your email address and not release your details to the 3rd parties.

### **CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q227-Q232):**

#### **NEW QUESTION # 227**

Which statement is true about ClusterXL?

- A. Supports Dynamic Routing (Unicast Only)
- B. Supports Dynamic Routing (Multicast Only)
- **C. Supports Dynamic Routing (Unicast and Multicast)**
- D. Does not support Dynamic Routing

**Answer: C**

Explanation:

ClusterXL supports Dynamic Routing for both Unicast and Multicast traffic. Dynamic Routing protocols, such as OSPF, BGP, or PIM, can be configured on cluster members to exchange routing information with other routers. ClusterXL supports two modes of operation for Dynamic Routing: New Mode and Legacy Mode. Reference: ClusterXL Administration Guide, SK98226 - ClusterXL New Mode Overview

#### **NEW QUESTION # 228**

If there are two administration logged in at the same time to the SmartConsole, and there are objects locked for editing, what must be done to make them available to other administrators? (Choose the BEST answer.)

- A. Delete older versions of database.
- B. Save and install the Policy.
- **C. Publish or discard the session.**
- D. Revert the session.

**Answer: C**

Explanation:

Explanation

The only way to make objects locked for editing available for other administrators is to publish or discard the session that contains the changes. Publishing the session will save and share the changes with other administrators, while discarding the session will undo and discard the changes. Saving the session will only save the changes locally, but not share them with others or release the locks. Reverting the session will restore a previous version of the session, but not affect the locks. Saving and installing the policy will only install the policy on the gateways, but not share or discard the changes in SmartConsole. Deleting older versions of database will only free up disk space, but not affect the locks.

#### **NEW QUESTION # 229**

In the Check Point Firewall Kernel Module, each Kernel is associated with a key, which specifies the type of traffic applicable to the chain module. For Wire Mode configuration, chain modules marked with \_\_\_\_\_ will not apply.

- A. 0
- **B. 1**

- C. ffff
- D. 2

**Answer: B**

#### NEW QUESTION # 230

In R81, how do you manage your Mobile Access Policy?

- A. Through the Mobile Console
- B. From SmartDashboard
- C. From the Dedicated Mobility Tab
- D. Through the Unified Policy

**Answer: D**

Explanation:

Explanation

In R81, you can manage your Mobile Access Policy through the Unified Policy. The Unified Policy is a single policy that combines access control, threat prevention, data protection, and identity awareness. You can create rules for mobile access in the Unified Policy rulebase and apply them to mobile devices, users, and applications. You can also use the Mobile Access blade to configure additional settings for mobile access, such as authentication methods, VPN settings, and application portal.

#### NEW QUESTION # 231

Which of the following is NOT an identity source used for Identity Awareness?

- A. UserCheck
- B. Remote Access
- C. AD Query
- D. RADIUS

**Answer: A**

#### NEW QUESTION # 232

.....
