

Prominent Features of Actual4Dumps Salesforce Arch-303 Exam Questions

Our Arch-303 study materials will be your best choice for our professional experts compiled them based on changes in the Arch-303 examination outlines over the years and industry trends. Our Arch-303 test torrent not only help you to improve the efficiency of learning, but also help you to shorten the review time of up to even two or three days, so that you use the least time and effort to get the maximum improvement to achieve your Arch-303 Certification.

After the advent of the Actual4Dumps's latest Salesforce certification Arch-303 exam practice questions and answers, passing Salesforce certification Arch-303 exam is no longer a dream of the IT staff. All of Actual4Dumps's practice questions and answers about Salesforce Certification Arch-303 Exam have high quality and 95% similarity with the real exam questions. Actual4Dumps is worthwhile to choose. If you choose Actual4Dumps's products, you will be well prepared for Salesforce certification Arch-303 exam and then successfully pass the exam.

Arch-303 Detail Explanation | New Arch-303 Braindumps Pdf

We have prepared our Salesforce Arch-303 Training Materials for you. They are professional practice material under warranty. Accompanied with acceptable prices for your reference, all our materials with three versions are compiled by professional experts in this area more than ten years long.

Salesforce Certified B2C Commerce Architect Sample Questions (Q65-Q70):

NEW QUESTION # 65

A client receives multiple feeds from third parties on the same SFTP location:

- * Product prices (sftp: prod/prices)
- * Stores information (sftp: prod/stores;
- * Product information (sftp: prod/catalog)
- * Categories information (sftp: prod/marketing)
- * Content (sftp: prod/marketing)

Some of the feeds are placed on sftp multiple times a day, as the information is updated in the source system

The Architect decides to have only two jobs:

- * One that checks and downloads available feeds every hour
- * One that imports the files from Webdav once a day before the data replication, using the standards steps available in the Job Framework Which design is correct for the import Job, taking the steps scope in consideration?

- A. - four sibling flows execute steps in parallel: import products, stores, prices, content- last flow executes steps in sequence import categories, reindex
- B. - three sibling flows Import steps In parallel: import products, stores, prices- fourth flow executes: import categories- last flow executes steps in sequence: reindex, Import content
- C. -Four sibling flows execute steps in parallel: import products, stores, price, content-last flow executes steps in sequence: import:categories, reindex
- D. - four sibling flows execute steps in parallel: import products, stores, prices, content- fifth flow executes: import categories- last flow executes steps In sequence: reindex

Answer: A

Explanation:

This design maximizes efficiency and concurrency. By having the jobs that import products, stores, prices, and content run in parallel, the system can handle multiple data streams simultaneously, reducing total processing time. The sequential execution of importing categories followed by reindexing ensures that all new and updated information is properly indexed and available for site use, following the completion of the import of more frequently updated data. This order respects dependencies between steps and aligns with best practices for handling complex data workflows in B2C Commerce environments.

NEW QUESTION # 66

A new version of the Page Show controller is required for implementation of Page Designer specific look. It requires implementation of a specific, cache period for Page Designer pages, which is not currently available in the base Storefront Reference Architecture (SFRA) cache.js module. What two steps should the Architect instruct the developer to implement?

Choose 2 answers

- A. Create new Page.js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.
- B. Create new cache.js in client's cartridge. Extend cache.js from app_storefront_base and add a function for the Page Designer caching.
- C. Create new cache.js client's cartridge. Copy cache.js from app_storefront_base and add a function for the Page Designer caching.
- D. Create new Page.js controller in client's cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.

Answer: B,D

Explanation:

To implement a specific cache period for Page Designer pages in SFRA:

- * Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page- Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.
- * Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.

Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

NEW QUESTION # 67

The Client is creating a new Storefront and their requirements include:

- * ApplePay support
- * Log -in through a standard OAuth2 social media account
- * One Click checkout process
- * A/B testing for promotions

Which two items require technical documentation for customizing the Storefront Reference Architecture?

Choose 2 answers

- A. A/B testing for promotions
- B. log in through a standard OAuth2 social media account
- C. One Click checkout process
- D. ApplePay support

Answer: B,C

Explanation:

For customizing the Storefront Reference Architecture to meet specific requirements, the following items would require detailed technical documentation:

- * Option A (One Click checkout process): Implementing a one-click checkout process involves significant customization to streamline the checkout flow, potentially requiring integration with payment providers and modifications to the user session management.
- * Option C (Log in through a standard OAuth2 social media account): Integrating OAuth2 for social media logins involves handling authentication tokens, user sessions, and potentially syncing user data with the B2C Commerce profiles, all of which require detailed security and integration documentation.

These customizations require careful planning and implementation to ensure they work seamlessly with existing Storefront Reference Architecture components and meet security standards.

NEW QUESTION # 68

Which two activities should an Architect encourage the replication team to follow based on S2C Commerce best practices?

Choose 2 answers

- A. Wait 15 minutes after the recreation process completes for the cache to clear automatically.
- B. Use the undo replication process to roll back to the previous replication if necessary.
- C. Replicate the latest data to Production during periods of increased site use to ensure freshness.
- D. Use the undo replication process to roll back code replications only, not data replications.

Answer: B,D

Explanation:

* Option A (Use the undo replication process to roll back to the previous replication if necessary):

This best practice ensures that if a replication introduces errors or issues, there is a way to quickly revert to a previous state without impacting the ongoing operations of the commerce site.

* Option C (Use the undo replication process to roll back code replications only, not data replications): Focusing undo operations on code replication rather than data ensures that functional issues caused by code changes can be quickly addressed without affecting the integrity or consistency of the data within the system.

These practices help maintain the stability and reliability of the production environment by providing mechanisms to manage and mitigate risks associated with updates and changes.

NEW QUESTION # 69

The Client is Crowng and decided to migrate its ecommerce website to B2C Commerce. The Client provided the Architect with the metrics for its existing website over the past 12 months and forecasted into the next year:

□ Noting these historical metrics and the forecasted growth of 300%, which load test targets meet best practices for testing the new B2C Commerce site?

- A. 3000 visits per hour, 60000 page views per hour, and 750 orders per hour
- B. 150000 visits per hour, 3000000 page views per hour, and 37500 orders per hour
- C. 1500 visits per hour, 30000 page views per hour, and 375 orders per hour
- D. 15000 visits per hour, 300000 page views per hour, and 3750 orders per hour

Answer: D

Explanation:

Considering the existing metrics and forecasted 300% growth, the appropriate load testing targets for the new B2C Commerce site would be:

* 15000 visits per hour: This figure is calculated by applying the expected growth to the peak visits per hour (1000 visits), resulting in 4000 visits. The choice of 15000 provides a higher buffer to accommodate unforeseen spikes in traffic.

* 300000 page views per hour: Similarly, this is scaled up from the peak page views per hour (20000) considering the growth,

ensuring the site can handle high demand and interactions.

* 3750 orders per hour: This target is based on the peak orders per hour (250) with the growth applied, allowing testing of the system's ability to handle transactions under significant load.

These targets ensure that the system is robust enough to handle increased traffic and transactions without performance degradation, crucial for maintaining customer satisfaction and operational stability.

NEW QUESTION # 70

The existence of our Arch-303 learning guide is regarded as in favor of your efficiency of passing the Arch-303 exam. At the same time, our company is becoming increasingly obvious degree of helping the exam candidates with passing rate up to 98 to 100 percent. All our behaviors are aiming squarely at improving your chance of success. We are trying to developing our quality of the Arch-303 Exam Questions all the time and perfecting every detail of our service on the Arch-303 training engine.

Arch-303 Detail Explanation: <https://www.actual4dumps.com/Arch-303-study-material.html>

The product Actual4Dumps provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you pass the Arch-303 exam by the method which is convenient for you, Actual4Dumps Arch-303 Detail Explanation Salesforce Arch-303 Detail Explanation exam PDF and exam VCE simulator will help all Salesforce Arch-303 Detail Explanation candidates pass the exams and get the certifications easily and quickly, Don't doubt about our Arch-303 study guide!

This chapter introduces you to JavaScript properly, Arch-303 Managing Complete Link Failure, The product Actual4Dumps provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you pass the Arch-303 Exam by the method which is convenient for you.

Actual4Dumps Salesforce Arch-303 Exam Real and Updated Dumps are Ready for Download

Actual4Dumps Salesforce exam PDF and exam VCE simulator will help all Salesforce candidates pass the exams and get the certifications easily and quickly. Don't doubt about our Arch-303 study guide!

No matter which version you may choose, all of them have been laid out already by our experts, so they are helpful to your reading and practicing. It is high time to prepare your Arch-303 actual test to improve yourself.
