USGBC - LEED-Green-Associate - LEED Green Associate Exam –High-quality Latest Braindumps Questions

It is known to us that more and more companies start to pay high attention to the LEED-Green-Associate certification of the candidates. Because these leaders of company have difficulty in having a deep understanding of these candidates, may it is the best and fast way for all leaders to choose the excellent workers for their company by the LEED-Green-Associate Certification that the candidates have gained. There is no doubt that the LEED-Green-Associate certification has become more and more important for a lot of people. And with our LEED-Green-Associate exam questions, you can get the LEED-Green-Associate certification easily.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
Topic 2	<ul style="list-style-type: none"> Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
Topic 3	<ul style="list-style-type: none"> Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
Topic 4	<ul style="list-style-type: none"> Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.
Topic 5	<ul style="list-style-type: none"> Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.
Topic 6	<ul style="list-style-type: none"> Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.
Topic 7	<ul style="list-style-type: none"> Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.
Topic 8	<ul style="list-style-type: none"> LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.

USGBC LEED Green Associate Exam Sample Questions (Q342-Q347):

NEW QUESTION # 342

According to systems thinking, climate change is an example of which of the following feedback loops?

- A. Positive
- B. Stable
- C. Isolated
- D. Balancing

Answer: A

Explanation:

According to systems thinking, climate change is an example of a positive feedback loop, which means that an initial change in one

part of the system causes a chain of events that amplify the effects of the change. For example, as the Earth warms due to increased greenhouse gas emissions, ice sheets and glaciers melt, reducing the albedo (reflectivity) of the Earth's surface and allowing more solar radiation to be absorbed, which further increases the temperature and accelerates the melting process. This is one of several positive feedback loops that can accelerate climate change and make it harder to reverse.

15 Climate Feedback Loops and Examples - Earth How

Systems Thinking Through Climate Change - 5 Positive Feedback Loops

What are climate change feedback loops? - The Guardian

NEW QUESTION # 343

The Increase in air temperature in a developed area resulting from the dark surfaces of roadways, parking lots, and tarred rooftops is known as

- A. heat island effect
- B. emissivity
- C. greenhouse gas
- D. global warming

Answer: A

Explanation:

Explanation

The increase in air temperature in a developed area resulting from the dark surfaces of roadways, parking lots, and tarred rooftops is known as heat island effect. Heat island effect is a phenomenon whereby urban areas experience higher temperatures than rural areas due to the absorption and re-emission of solar heat by man-made surfaces. Heat island effect can have negative impacts on human health, energy consumption, air quality, and climate change. Some strategies to reduce heat island effect include increasing vegetation cover, using reflective or green roofs, using cool or permeable pavements, and enhancing natural ventilation. References: LEED v4 BD+C Reference Guide, Sustainable Sites, page 35 ; EPA Heat Island Effect website 1

NEW QUESTION # 344

Which of the following strategies should a project owner implement to understand water consumption?

- A. Use graywater for flush fixtures
- B. Install an onsite wastewater system
- C. Use waterless urinals
- D. Install permanent water meters

Answer: D

NEW QUESTION # 345

Which organization designed the Minimum Efficiency Reporting Value (MERV) measurement scale that rates the effectiveness of air filters?

- A. ASHRAE
- B. U.S. Department of Energy (DOE)
- C. U.S. Environmental Protection Agency
- D. American National Standards Institute (ANSI)

Answer: A

Explanation:

ASHRAE developed the MERV scale, which rates air filter efficiency in capturing airborne particles. LEED references MERV ratings in Indoor Environmental Quality credits to ensure air quality.

NEW QUESTION # 346

Which of the following is a tradable commodity representing proof that a unit of electricity was generated from a renewable source?

- A. Certificate for Innovative Renewables
- B. Renewable Wind Certificate
- **C. Renewable Energy Certificate**
- D. Tradable Energy Credit (TEC)

Answer: C

Explanation:

Explanation

A Renewable Energy Certificate (REC) is a tradable commodity that represents proof that one unit of electricity was generated from a renewable energy source. RECs are used to track and trade renewable energy in the open market, providing an economic incentive for renewable energy generation.
