The data that come up with our customers who have bought our C-ACDET-2506 actual exam and provided their scores show that our high pass rate of our C-ACDET-2506 exam questions is 98% to 100%. This is hard to find and compare with in the market. And numerous enthusiastic feedbacks from our worthy clients give high praises not only on our C-ACDET-2506 study torrent, but also on our sincere and helpful 24 hours customer services online. All of these prove that we are the first-class vendor in this career and have authority to ensure your success in your first try on C-ACDET-2506 exam.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Sample C-ACDET-2506 Questions, C-ACDET-2506 Latest Real Exam

Our C-ACDET-2506 practice torrent offers you more than 99% pass guarantee, which means that if you study our materials by heart and take our suggestion into consideration, you will absolutely get the certificate and achieve your goal. On the other hand, You can free download the demo of our C-ACDET-2506 Study Guide before you buy our C-ACDET-2506 exam questions. Meanwhile, if you want to keep studying this C-ACDET-2506 study guide, you can enjoy the well-rounded services on C-ACDET-2506 test prep.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q52-Q57):

NEW QUESTION # 52

A French translation of a custom field label needs to be updated.
Where do you update it?

- A. Field Configuration Label
- B. Customization Manager → Views
- **C. AML & Translations Upload**
- D. Layout tab

Answer: C

NEW QUESTION # 53

What should you do to proceed without errors? While migrating form templates, you successfully exported all templates from the Test site. However, when trying to import them into Production, you cannot.

- A. Skip the import and inform the team the templates cannot be migrated.
- **B. Manually create the required folder in the Production site before importing.**
- C. Modify the form template files locally to bypass folder restrictions.
- D. Upload the templates to any existing folder regardless of its purpose.

Answer: B

Explanation:

When migrating form templates between SAP Ariba environments, the folder structure in the target environment must exactly match the folder referenced in the template metadata. The export includes metadata about the folder path where the template resides. If the corresponding folder does not exist in the Production site, the import process will fail.

The correct procedure is to manually create the required folder in Production before importing the templates to ensure the folder metadata aligns perfectly.

Uploading templates to arbitrary folders or modifying template files locally to alter metadata is unsupported and can corrupt the package or cause errors.

Skipping the import unnecessarily halts progress and ignores SAP's structured migration approach.

SAP Ariba documentation on template migration and folder management strongly recommends maintaining folder parity between source and target systems to prevent import failures.

This practice helps maintain organized template management and ensures consistent deployment workflows.

NEW QUESTION # 54

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? Note: There are 2 correct answers to this question.

- A. SAP Ariba Buying and Invoicing
- B. SAP Ariba Supplier Lifecycle and Performance
- C. SAP Ariba Category Management
- D. SAP Ariba Contracts

Answer: C,D

NEW QUESTION # 55

During which SAP Activate Methodology phase do you define the customer requirements?

- A. Define
- B. Explore
- C. Discover
- D. Design

Answer: B

Explanation:

SAP Activate's Explore phase is focused on refining and validating customer requirements through fit-to-standard workshops. During this phase, project teams analyze SAP best practice processes alongside customer business needs, identifying configuration gaps and defining functional requirements.

Design as a distinct phase has been replaced by the more agile Explore phase, focusing on solution validation.

The Discover phase focuses on solution evaluation and strategy alignment, not detailed requirements gathering. The term "Define" is not part of SAP Activate methodology.

Proper requirements definition during Explore ensures that the configurations built in Realize align with business needs, reducing rework and enhancing solution adoption. This methodology reflects SAP's emphasis on agile and iterative project delivery within cloud and hybrid deployments.

NEW QUESTION # 56

During the configuration of a new custom field, after it's been saved but before the field has been published, you realize that you set the wrong field type. What is the next step you should take to resolve the issue?

- A. Clear and recreate the field with the same field name and the intended field type
- B. Mark the field as Hidden, and create a new field with a slightly different name and the intended field type
- C. Change the field type by selecting the intended type in the dropdown and Save
- D. Delete the field and create a new field with the same name and the intended field type

Answer: D

Explanation:

Once a custom field has been saved, its field type cannot be changed—even if the field has not yet been published. The correct approach is to delete the incorrect field and create a new one with the intended type, optionally using the same name to maintain naming consistency. Clearing or hiding the field does not solve the issue, and the system does not allow type changes via the UI once saved. This approach is standard in SAP Ariba field management to avoid data integrity issues.

NEW QUESTION # 57

.....

The SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) product can be easily accessed just after purchasing it from UpdateDumps. You can receive free Sitecore Dumps updates for up to 1 year after buying material. The 24/7 support system is also available for you, which helps you every time you get stuck somewhere.
