NEW QUESTION # 64
Is SUM a table calculation?

- A. Yes
- B. No

Answer: B

Explanation:
Explanation
SUM is an aggregate function, not a table calculation!
A table calculation is a transformation you apply to the values in a visualization. Table calculations are a special type of calculated field that computes on the local data in Tableau. They are calculated based on what is currently in the visualization and do not consider any measures or dimensions that are filtered out of the visualization.
The most common Table calculations are:
Running Total
Percent Difference
Difference
Percent of Total
Rank
Percentile
These can be calculated using : Table(across), Cell, or Specific dimensions!

NEW QUESTION # 65
_____ is a technique in Tableau which will identify marks with similar characteristics

- A. Grouping
- B. Clustering
- C. Union
- D. Sets

Answer: B

Explanation:
Explanation
Cluster analysis partitions marks in the view into clusters, where the marks within each cluster are more similar to one another than they are to marks in other clusters.

NEW QUESTION # 66
True or False: We can disaggregate the data, to see all of the marks in the view at the most detailed level of granularity

- A. False
- B. True

Answer: B

Explanation:
Explanation
Whenever you add a measure to your view, an aggregation is applied to that measure by default. This default is controlled by the Aggregate Measures setting in the Analysis menu.

If you decide you want to see all of the marks in the view at the most detailed level of granularity, you can disaggregate the view. Disaggregating your data means that Tableau will display a separate mark for every data value in every row of your data source. To disaggregate all measures in the view:

Clear the Analysis >Aggregate Measures option. If it is already selected, click Aggregate Measures once to deselect it.
