APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 2	Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 3	Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 4	Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.

Topic 5	Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 6	Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 7	Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 8	Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

Pass Guaranteed Quiz 2026 APMG-International ISO-IEC-27001-Foundation: ISO/IEC 27001 (2022) Foundation Exam High Hit-Rate Exam Actual Questions

Our APP version of ISO-IEC-27001-Foundation exam questions can support almost any electronic device, from iPod, telephone, to computer and so on. You can use Our ISO-IEC-27001-Foundation test torrent by your telephone when you are travelling far from home; I think it will be very convenient for you. You can also choose to use our ISO-IEC-27001-Foundation Study Materials by your computer when you are at home. You just need to download the online version of our ISO-IEC-27001-Foundation study materials, which is not limited to any electronic device and support all electronic equipment in anywhere and anytime.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which activity is an operational planning and control requirement?

- A. Document information security objectives
- B. Perform information security risk assessments at planned intervals
- C. Scheduling of second party audits
- D. Review the consequences of unintended changes

Answer: D

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 42

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- B. Communicating feedback from interested parties to the organization

- C. Implementing the actions from internal audits
- D. Ensuring information security objectives are established

Answer: D

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

"ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

"ensuring the integration of the ISMS requirements into the organization's processes;"

"ensuring that the resources needed for the ISMS are available;"

NEW QUESTION # 43

What is the primary purpose of an Information Security Management System (ISMS)?

- A. To prevent cyberattacks completely
- B. To comply only with legal requirements
- C. To protect information through a systematic risk management process
- D. To eliminate all information security risks

Answer: C

Explanation:

An ISMS provides a structured framework for managing information security risks. ISO/IEC 27001 focuses on protecting confidentiality, integrity, and availability through continual improvement and risk-based decision-making, rather than eliminating all risks or guaranteeing complete protection.

NEW QUESTION # 44

What is a requirement for a corrective action made in response to a nonconformity?

- A. They are proportionate to the likelihood of the nonconformity recurring
- B. They do NOT change the organization's information security policies
- C. They are appropriate to the effects of the nonconformity
- D. They always eliminate the cause of the nonconformity

Answer: C

Explanation:

Clause 10.1 (Nonconformity and corrective action) specifies:

"The organization shall react to the nonconformity and, as applicable: take action to control and correct it; deal with the consequences; evaluate the need for action to eliminate the cause(s)..."

Corrective actions shall be appropriate to the effects of the nonconformities encountered." This confirms option B. Option A is inaccurate-ISO requires actions appropriate to effects, not probability alone. Option C is false-policies may need updating to correct nonconformities. Option D is incorrect, as not every cause can always be eliminated; residual issues may exist.

Thus, the verified requirement is B.

NEW QUESTION # 45

What is the name of the control clause used to control information security breaches within Annex A of ISO /IEC 27001?

- A. Information security event management
- B. Reporting information security incidents
- C. Response to information security events
- D. Information security event reporting

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A in ISO/IEC 27001 refers directly to ISO/IEC 27002 for control guidance. In ISO/IEC 27002:2022, Clause 6.8 is titled: "Information security event reporting - Information security events should be reported through appropriate management channels as quickly as possible." This control ensures breaches, incidents, or suspected issues are reported for action. The other options (B, C, D) are not the exact titles in Annex A. The official title is Information security event reporting, confirming

NEW QUESTION # 46

.....

This kind of polished approach is beneficial for a commendable grade in the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam. While attempting the exam, take heed of the clock ticking, so that you manage the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) questions in a time-efficient way. Even if you are completely sure of the correct answer to a question, first eliminate the incorrect ones, so that you may prevent blunders due to human error.
