The customizable mock tests make an image of a real-based Administering Windows Server Hybrid Core Infrastructure (AZ-800) exam which is helpful for you to overcome the pressure of taking the final examination. Customers of TestSimulate can take multiple Microsoft AZ-800 practice tests and improve their preparation to achieve the AZ-800 Certification. You can even access your previously given tests from the history, which allows you to be careful while giving the mock test next time and prepare for Microsoft AZ-800 certification in a better way.

Microsoft AZ-800 certification exam is designed to test the knowledge and skills of IT professionals in administering Windows Server hybrid core infrastructure. Administering Windows Server Hybrid Core Infrastructure certification is suitable for those who are responsible for managing and securing hybrid environments that consist of both on-premises and cloud-based resources. AZ-800 exam covers a wide range of topics, including virtualization, networking, storage, identity and access management, and security.

To pass the Microsoft AZ-800 Exam, candidates are required to have a deep understanding of core infrastructure technologies and services, including virtualization, networking, storage, and security. They must also have experience with Windows Server administration, Azure services, and PowerShell scripting. AZ-800 exam consists of multiple-choice questions and performance-based tasks that assess the candidate's ability to perform tasks related to hybrid infrastructure management and deployment.

High Quality AZ-800 Test Prep Helps You Pass the Administering Windows Server Hybrid Core Infrastructure Exam Smoothly

If you are looking to advance in the fast-paced and technological world, TestSimulate is here to help you achieve this aim. TestSimulate provides you with the excellent Administering Windows Server Hybrid Core Infrastructure (AZ-800) practice exam, which will make your dream come true of passing the Administering Windows Server Hybrid Core Infrastructure (AZ-800) certification exam on the first attempt.

The Microsoft AZ-800 exam tests the candidate's ability to manage and monitor hybrid infrastructure components such as virtual machines, storage, networking, and identity. It also covers topics such as security, high availability, disaster recovery, and automation. The Microsoft AZ-800 Certification Exam is a great way to demonstrate your expertise in managing complex infrastructure environments.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q67-Q72):

NEW QUESTION # 67

What should you implement for the deployment of DC3?

- A. Azure Active Directory Domain Services (Azure AD DS)
- **B. an Azure virtual machine**
- C. Azure AD Application Proxy
- D. an Azure AD administrative unit

Answer: B

Explanation:

Create a domain controller named dc3.corp.fabrikam.com in Vnet1.

In a hybrid network, you can configure Azure virtual machines as domain controllers. The domain controllers in Azure communicate with the on-premises domain controllers in the same way that on-premises domain controllers communicate with each other.

NEW QUESTION # 68

You have a server named Server1 that runs Windows Server and contains a file share named Share1.

You need to prevent users from stoning MP4 files in Share1. The solution must ensure that the users can store other types of files in the share.

What should you configure on Server1?

- **A. file screens**
- B. NTFS Quotas
- C. NTFS permissions
- D. File Management Tasks

Answer: A

NEW QUESTION # 69

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com.

You need to identify which server is the PDC emulator for the domain.

Solution: From Active Directory Sites and Services, you right-click Default-First-Site-Name in the console tree, and then select Properties.

Does this meet the goal?

- A. Yes
- **B. No**

Answer: B

NEW QUESTION # 70

You plan to deploy an Azure virtual machine that will run Windows Server. The virtual machine will host an Active Directory Domain Services (AD DS) domain controller and a drive named f: on a new virtual disk.

You need to configure storage for the virtual machine. The solution must meet the following requirements

* Maximize resiliency for AD DS.

* Prevent accidental data loss.

How should you configure the storage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 71

Your on-premises network contains a server named Server1 and uses an IP address space of 192.168.10.0/24.

You have an Azure virtual network that contains a subnet named Subnet1. Subnet1 uses an IP address space of 192.168.10.0/24. You need to migrate Server1 to Subnet1. You must use Azure Extended Network to maintain the existing IP address of Server1. What is the minimum number of virtual machines that you should deploy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

NEW QUESTION # 72
