Salesforce Mule-Dev-301 Reliable Study Plan & Mule-Dev-301 Training For Exam

Up to now, we have more than tens of thousands of customers around the world supporting our Mule-Dev-301 training prep. So our Mule-Dev-301 study materials are elemental materials you cannot miss. In your review duration, you can contact with our after-sales section if there are any problems with our Mule-Dev-301 Practice Braindumps. They will help you 24/7 all the time. These services assure your avoid any loss.

Salesforce Certified MuleSoft Developer II Sample Questions (Q56-Q61):

NEW QUESTION # 56

A Mule application contain two policies Policy A and Policy A has order1, and Policy B has order 2. Policy A Policy B, and a flow are defined by he configuration below.

When a HTTP request arrives at the Mule application's endpoint, what will be the execution order?

- A. B1, A1, F1, A2, B2
- **B. A1, B1, F1, B2, A2**
- C. F1, B1, A1, A2, B2
- D. F1, A1, B1, B2, A2

Answer: B

Explanation:

Based on the configuration below, when a HTTP request arrives at the Mule application's endpoint, the execution order will be A1, B1, F1, B2, A2. This is because policies are executed before and after the API implementation flow according to their order attribute. Policy A has order 1, which means it is executed first before Policy B, which has order 2. The flow is executed after both policies are executed before the flow. Then, Policy B is executed after the flow before Policy A is executed after the flow.

NEW QUESTION # 57

Which statement is true about using mutual TLS to secure an application?

- A. Mutual TLS increases the encryption strength versus server-side TLS alone
- B. Mutual TLS ensures only authorized end users are allowed to access an endpoint
- C. Mutual TLS requires a hardware security module to be used
- **D. Mutual TLS authenticates the identity of the server before the identity of the client**

Answer: D

Explanation:

Mutual TLS (mTLS) is an extension of TLS that requires both parties (client and server) to present their certificates to each other during the handshake process. This way, both parties can verify each other's identity and establish a secure connection. The authentication of the server happens before the authentication of the client, as the server sends its certificate first and then requests the client's certificate. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/tls-configuration#mutual-authentication>

NEW QUESTION # 58

A new Mule project has been created in Anypoint Studio with the default settings.

Which file inside the Mule project must be modified before using Maven to successfully deploy the application?

- A. Mule.artificact.json
- **B. Pom.xml**
- C. Settings.xml
- D. Config.yaml

Answer: B

Explanation:

To use Maven to successfully deploy the application, the developer needs to modify the pom.xml file inside the Mule project. The

pom.xml file contains the configuration and dependencies of the Mule application, as well as the deployment information such as the CloudHub region, environment, and worker size. The developer needs to specify these properties in the pom.xml file before using Maven to deploy the application. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/mmp-concept#application-deployment-descriptor>

NEW QUESTION # 59

A Flight Management System publishes gate change notification events whenever a flight's arrival gate changes. Other systems, including Baggage Handler System, Inflight Catering System and Passenger Notifications System, must each asynchronously receive the same gate change notification to process the event according.

Which configuration is required in Anypoint MQ to achieve this publish/subscribe model?

- A. Publish the gate change notification to an Anypoint MC queue
Have each client subscribe directly to the queue
- **B. Publish the gate change notification to an Anypoint MQ exchange.
Create different Anypoint MQ queues meant for each of the other subscribing systems. Bind the exchange with each of the queues.**
- C. Publish each client subscribe directly to the exchange.
Have each client subscribe directly to the queue.
- D. Publish the gate change notification to an Anypoint MQ queue.
Create different anypoint MQ exchange meant for each of the other subscribing systems Bind the queue with each of the exchanges

Answer: B

Explanation:

To achieve a publish/subscribe model using Anypoint MQ, where each system receives the same gate change notification event, the developer should publish the gate change notification to an Anypoint MQ exchange, create different Anypoint MQ queues meant for each of the other subscribing systems, and bind the exchange with each of the queues. An exchange is a message routing agent that can send messages to different queues based on predefined criteria. By binding an exchange with multiple queues, each queue receives a copy of every message sent to that exchange. Therefore, each system can subscribe to its own queue and receive every gate change notification event. Reference: <https://docs.mulesoft.com/anypoint-mq/3.x/anypoint-mq-exchanges>

NEW QUESTION # 60

Refer to the exhibit.

What is the result of the Mule Maven Plugin configuration of the value of property `its.keystorePassword` in CloudHub 2.0?

- A. The Mule server encrypts the value
- B. CloudHub encrypts the value
- C. Anypoint Studio secures the value
- **D. Runtime Manager masks the value**

Answer: D

Explanation:

The result of the Mule Maven Plugin configuration of the value of property `its.keystorePassword` in CloudHub 2.0 is that Runtime Manager masks the value. This means that Runtime Manager hides or obscures the value from anyone who views it in Runtime Manager or Anypoint Platform. Reference: <https://docs.mulesoft.com/runtime-manager/runtime-manager-agent-for-mule4#properties-tab>

NEW QUESTION # 61

.....

You can finish practicing all the contents in our Salesforce Mule-Dev-301 practice materials within 20 to 30 hours, and you will be confident enough to attend the exam for our Salesforce Certified MuleSoft Developer II Mule-Dev-301 exam dumps are exact compiled with the questions and answers of the real exam. During the whole year after purchasing, you will get the latest version of our Mule-Dev-301 Study Materials for free.

Mule-Dev-301 Reliable Study Plan: <https://www.actual4dumps.com/Mule-Dev-301-study-material.html>

The Salesforce MuleSoft certified professionals of the Salesforce MuleSoft industry have put in their efforts to produce the Salesforce Mule-Dev-301 dumps, Mule-Dev-301 Reliable Study Plan 2018 bundles will get you where you want just 29 US dollars, 95% lower than normal prices, Salesforce Test Mule-Dev-301 Valid Money back guarantee, With higher salary and bright future, even greater chances of getting promotion, you have no time to waste but choose our Mule-Dev-301 pass-for-sure braindumps: Salesforce Certified MuleSoft Developer II now!

You can stretch, cut, scale, translate, trim, and Mule-Dev-301 Current Exam Content rebuild them, making them essential to your workflow and great time-savers as well, This way, for example, a banking application and a brokerage application Test Mule-Dev-301 Valid can coordinate to transfer money between a savings account and a securities trading account.
