

Free PDF VMware - Fantastic 2V0-13.25 - VMware Cloud Foundation 9.0 Architect Official Practice Test

[Pass VMware 2V0-13.25 Exam | Latest 2V0-13.25 Dumps & Practice Exams - Cert007](#)

Exam : **2V0-13.25**

Title : VMware Cloud Foundation
9.0 Architect

<https://www.cert007.com/exam/2v0-13-25/>

1/8

Looking for top-notch Implementing and Operating VMware Cloud Foundation 9.0 Architect (2V0-13.25) exam questions? You've come to the right place! Itcertmaster offers a comprehensive and affordable solution for all your 2V0-13.25 exam needs. Our 2V0-13.25 Exam Questions are regularly updated, and we provide a range of attractive features to enhance your preparation, including PDF format, an online practice test engine.

You only need 20-30 hours to practice our software and then you can attend the exam. You needn't spend too much time to learn our 2V0-13.25 study questions and you only need spare several hours to learn our 2V0-13.25 guide torrent each day. Our 2V0-13.25 study questions are efficient and can guarantee that you can pass the 2V0-13.25 exam easily. But if you buy our 2V0-13.25 exam torrent you can save your time and energy and spare time to do other things.

New 2V0-13.25 Braindumps Files & 2V0-13.25 Dumps PDF

We have compiled the 2V0-13.25 test guide for these candidates who are trouble in this exam, in order help they pass it easily, and we deeply believe that our 2V0-13.25 exam questions can help you solve your problem. Believe it or not, if you buy our study materials and take it seriously consideration, we can promise that you will easily get the certification that you have always dreamed of. We believe that you will never regret to buy and practice our 2V0-13.25 latest question.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.
Topic 2	<ul style="list-style-type: none">• VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.
Topic 3	<ul style="list-style-type: none">• IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 4	<ul style="list-style-type: none">• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
Topic 5	<ul style="list-style-type: none">• Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which Broadcom solution is designed for enhancing networking performance in VMware Cloud Foundation?

- A. Broadcom Ethernet adapters
- B. Broadcom GPUs
- C. Broadcom NVMe storage solutions
- D. Broadcom RAID storage controllers

Answer: A

Explanation:

Broadcom Ethernet adapters are essential for improving network performance in VMware Cloud Foundation environments.

NEW QUESTION # 28

What is the primary function of VMware ESXi?

- A. Cluster management
- B. Hypervisor for virtual machine management

- C. Backup and recovery
- D. Data storage

Answer: B

Explanation:

ESXi functions as a hypervisor managing VMs directly on hardware.

NEW QUESTION # 29

Which Broadcom solutions improve redundancy and fault tolerance in VMware Cloud Foundation?

- A. Broadcom RAID controllers
- B. Broadcom Fibre Channel HBAs
- C. Broadcom NVMe SSDs
- D. Broadcom Ethernet adapters

Answer: A,B

Explanation:

Broadcom RAID controllers and Fibre Channel HBAs improve redundancy and fault tolerance.

NEW QUESTION # 30

Which methods can be used to optimize VMware virtual machine performance when using Broadcom hardware?

- A. Allocate more CPU resources
- B. Over-allocate VM resources
- C. Enable hardware acceleration features
- D. Use high-performance storage like SSDs

Answer: A,C,D

Explanation:

Allocating CPU, using SSDs, and enabling hardware acceleration are key to optimizing VM performance.

NEW QUESTION # 31

An architect is evaluating a requirement for a Cloud Management self-service solution to offer its users the ability to migrate their own workloads using VMware vMotion.

Which component could the architect include in the solution design that will help satisfy the requirement?

- A. Aria Automation Config
- B. Aria Automation Orchestrator
- C. Aria Suite Lifecycle Manager
- D. Aria Operations

Answer: B

Explanation:

The requirement is for a self-service solution allowing users to migrate their own workloads using VMware vMotion within a VMware Cloud Foundation (VCF) 5.2 environment. vMotion is a vSphere feature that enables live migration of virtual machines (VMs) between ESXi hosts with no downtime, typically managed by administrators via vCenter. A self-service solution implies empowering end users (e.g., application owners) to initiate this process through a user-friendly interface or automation tool. Let's evaluate each component:

Option A: Aria Suite Lifecycle Manager

Aria Suite Lifecycle Manager (LCM) is responsible for deploying, upgrading, and managing the lifecycle of VMware Aria Suite components (e.g., Aria Automation, Aria Operations). It does not provide self-service capabilities or direct interaction with vMotion. The VMware Aria Suite Lifecycle Administration Guide confirms its role is administrative, not end-user-facing, making it unsuitable for this requirement.

Option B: Aria Automation Orchestrator

Aria Automation Orchestrator (formerly vRealize Orchestrator) is a workflow automation engine integrated with Aria Automation in VCF 5.2. It allows the creation of custom workflows, including vMotion operations, which can be exposed to users via the Aria Automation self-service portal. The VMware Aria Automation Orchestrator Administration Guide details how workflows can call vSphere APIs (e.g., RelocateVM_Task) to initiate vMotion, enabling users to trigger migrations without direct vCenter access. In VCF, this integrates with SDDC Manager and vCenter, satisfying the self-service requirement by providing a customizable, user-accessible automation layer.

Option C: Aria Operations

Aria Operations (formerly vRealize Operations) is a monitoring and analytics tool for performance, capacity, and health of VCF components. It provides dashboards and insights but has no capability to execute vMotion or offer self-service workload management. The VMware Aria Operations Administration Guide confirms its focus is observability, not automation or user interaction, ruling it out.

Option D: Aria Automation Config

Aria Automation Config (formerly SaltStack Config) is a configuration management tool for automating infrastructure and application states (e.g., patching, compliance). It lacks native vMotion integration or a self-service portal for workload migration. The VMware Aria Automation Config User Guide focuses on configuration tasks, not VM migration, making it irrelevant here.

Conclusion:

Aria Automation Orchestrator (B) is the best fit. It enables the architect to design workflows for vMotion, integrated with Aria Automation's self-service portal, meeting the requirement for user-driven workload migration in VCF 5.2.
