WGU C207 DATA DRIVEN DECISION MAKING QUESTIONS AND ANSWERS GRADED A+ 2025

1. (Quiz 1) 1. For companies to attract and retain their best customers they need a complete portrait of who they are. To develop this portrait companies turn to...
- A) Statistics
 - B) Analytics
 - C) Management Science
 - D) Histograms: B
2. (Quiz 1) 2. A manufacturer wants to maximize their factory output while specifically minimizing labor costs. What type of analytics might they employ to achieve this goal?
- A) Descriptive Analytics
 - B) Predictive Analytics
 - C) Prescriptive Analytics
 - D) Diagnostic Analytics: C
3. (Quiz 1) 3. What type of data error that occurs in measurement is constant within a data set and is sometimes caused by faulty equipment or bias?
- A) Random
 - B) Omission
 - C) Outlier
 - D) Systematic: D
4. (Quiz 1) 4. An Educator develops a new standardized test to measure math skills of ninth graders. She has students in her home state of Ohio take the test. If the test is to be used on a national level, what type of error might be found in her data?
- A) Omission Error
 - B) Systematic Error
 - C) Measurement Bias
 - D) Information Bias: C
5. (Quiz 1) 5. A city government is trying to determine the national origins of its recent immigrant population. If a survey of the immigrant population is conducted in English what type of error might be present in the data?

1/18

We want to specify all details of various versions of our Data-Driven-Decision-Making study materials. We have three versions of our Data-Driven-Decision-Making exam braindumps: the PDF, Software and APP online. You can decide which one you prefer, when you made your decision and we believe your flaws will be amended and bring you favorable results even create chances with exact and accurate content of our Data-Driven-Decision-Making learning guide.

The VCEPrep is one of the top-rated and trusted platforms that are committed to making the entire WGU Data-Driven-Decision-Making exam preparation journey fast and successful. To achieve this goal the "VCEPrep" is offering valid, updated, and real WGU Data-Driven-Decision-Making Exam Questions. These VCEPrep Data-Driven-Decision-Making exam questions are checked and verified by qualified subject matter experts.

Data-Driven-Decision-Making VCE Exam Simulator, Test Data-Driven-Decision-Making Dumps.zip

Most customers reflected that our WGU exam questions cover most of questions of actual test. So if you decided to choose Data-Driven-Decision-Making as your study materials, you just need to spend your spare time to practice Data-Driven-Decision-Making

Dumps PDF and remember the points of pass exam guide. Our latest vce dumps are the guarantee of clear exam

WGU VPC2Data-Driven Decision MakingC207 Sample Questions (Q14-Q19):

NEW QUESTION # 14

How is a cause-and-effect diagram used?

- A. As a software tool to automatically generate a business process diagram
- **B. To brainstorm possible root causes for an intermittency problem**
- C. As a financial risk calculation tool for a new product release
- D. To assign blame for manufacturing problems

Answer: B

Explanation:

A cause-and-effect diagram, also known as an Ishikawa diagram or fishbone diagram, is used to brainstorm and organize possible root causes of a problem. It helps teams think systematically about why a problem may be occurring by grouping causes into logical categories such as methods, materials, people, equipment, and environment. In the scenario given, an intermittency problem suggests an issue that happens irregularly and may be difficult to isolate, which makes a cause-and-effect diagram especially useful. Its purpose is not to assign blame but to support structured problem-solving and root cause analysis. It is also not a financial risk tool or an automated software diagram generator. In quality management and data-driven improvement, this diagram encourages teams to explore multiple contributing factors before deciding on corrective action.

Therefore, the correct answer is that it is used to brainstorm possible root causes for an intermittency problem.

NEW QUESTION # 15

What is the primary goal of Six Sigma?

- A. Providing collaborative planning, forecasting, and replenishment
- B. Demonstrating strong management leadership
- C. Furthering a commitment to the SIPOC process
- **D. Fostering a commitment to continuous improvement**

Answer: D

Explanation:

The primary goal of Six Sigma is to foster a commitment to continuous improvement by systematically reducing defects and process variation. In data-driven decision making, Six Sigma uses statistical methods to improve quality, efficiency, and consistency across organizational processes.

Six Sigma emphasizes disciplined problem-solving through data analysis, root-cause identification, and process control. While reducing defects to 3.4 per million opportunities is a hallmark metric, the broader objective is embedding continuous improvement into organizational culture.

SIPOC is a supporting tool, leadership is a contributing factor, and collaborative planning forecasting and replenishment relates to supply chain management, not Six Sigma's core purpose.

Therefore, the correct answer is D.

NEW QUESTION # 16

A patient satisfaction survey was conducted at Family Practice A. The average rating of online telemedicine visits was 4.5 out of 5, while in-person visits received a 3.0 out of 5.

Which samples should be used to compare the ratings?

- A. Total Family Practice A visits and online telemedicine visits
- B. Total Family Practice A visits and in-person visits
- **C. Online Family Practice A telemedicine visits and in-person Family Practice A visits**
- D. Online ratings of other family practices and online ratings for all Family Practice A visits

Answer: C

Explanation:

To make a valid comparison in data-driven decision making, samples must be comparable and drawn from the same population, differing only in the factor being evaluated. In this case, the goal is to compare patient satisfaction between online telemedicine visits and in-person visits at Family Practice A.

Using online Family Practice A telemedicine visits and in-person Family Practice A visits ensures that both samples come from the same organization, patient base, and survey methodology. This controls for external factors such as practice standards, demographics, and survey design, allowing differences in ratings to be attributed to the visit type rather than unrelated variables. Comparing total visits to only one visit type introduces imbalance. Including other family practices introduces external variation and invalidates the comparison. Data-driven decision making stresses consistency and relevance in sample selection to ensure accurate conclusions.

Therefore, the correct answer is D, as it uses comparable samples that isolate the variable of interest.

NEW QUESTION # 17

Phone calls for a company are routed randomly to one of eight call centers. Six are based in the United States, and two are based in another country. What is the probability that an incoming call will be routed to a U.S.-based call center?

- A. 33%
- B. 25%
- C. 75%
- D. 67%

Answer: C

Explanation:

Probability is calculated as the number of favorable outcomes divided by the total number of possible outcomes, assuming each outcome is equally likely. In this case, there are eight call centers total, and six of them are located in the United States. Since calls are routed randomly, each call center has an equal chance of receiving an incoming call. Therefore, the probability that a call is routed to a U.S.-based call center is 6 out of 8. This fraction simplifies to 3 out of 4, which is equal to 0.75 or 75 percent. The answer choices 25 percent and 33 percent are too small because they do not match the proportion of U.S. call centers. The option 67 percent is closer but still incorrect, as 6 divided by 8 is not 0.67. This is a basic probability problem involving equally likely outcomes. Because six of the eight centers are in the United States, the correct probability is 75 percent.

NEW QUESTION # 18

Which quality management principle should team members apply?

- A. Focus on auxiliary tasks so that as many steps as possible are added to a process.
- B. Train all employees in the managerial process so the organization and employees compete.
- C. Analyze all adjustments made in one part of a system that may affect other parts of the system.
- D. Commit to a new style of leadership that lets employees choose what they want to do each day.

Answer: C

Explanation:

A core principle of quality management is systems thinking, which emphasizes that organizations operate as interconnected processes rather than isolated tasks. Because of this, team members should analyze all adjustments made in one part of a system that may affect other parts of the system. This approach recognizes that a change intended to improve one area can unintentionally reduce quality, efficiency, or consistency elsewhere. Effective quality management requires understanding process interactions, cause-and-effect relationships, and the broader impact of operational decisions. Option A is incorrect because quality improvement usually seeks to streamline processes rather than add unnecessary steps. Option C is also incorrect because quality management is about coordination and continuous improvement, not encouraging competition between the organization and employees. Option D does not reflect a recognized quality principle and suggests a lack of operational discipline. Therefore, the correct principle is the one that promotes analysis of interdependence within the system, making option B the best answer.

NEW QUESTION # 19

.....

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the more you gain. When you pass the Data-Driven-Decision-Making exam which is well recognized wherever you are in any field, then

acquire the Data-Driven-Decision-Making certificate, the door of your new career will be open for you and your future is bright and hopeful. Our Data-Driven-Decision-Making guide torrent will be your best assistant to help you gain your certificate.

Data-Driven-Decision-Making VCE Exam Simulator: <https://www.vceprep.com/Data-Driven-Decision-Making-latest-vce-prep.html>

WGU Sample Data-Driven-Decision-Making Questions Answers The various available online sources for exam preparation either provide complex information or deficient of the required knowledge, We will send the latest Data-Driven-Decision-Making New Exam Camp Questions Courses and Certificates pdf immediately once we have any updating about this dump, Choose the nay type of VPC2Data-Driven Decision MakingC207 Data-Driven-Decision-Making practice exam questions that fit your Data-Driven-Decision-Making exam preparation requirement and budget and start preparation without wasting further time, But if you are our customers buying our Data-Driven-Decision-Making quiz torrent: VPC2Data-Driven Decision MakingC207, you never worry about such a thing will happen.

Dynamic microphones are less expensive, are practically Data-Driven-Decision-Making indestructible, can record extremely loud sounds, and don't require a powersupply, In addition to its new appearance, the Data-Driven-Decision-Making VCE Exam Simulator Mac OS X Finder also offers better views, more customization options, and more tools.

100% Pass Quiz WGU - Data-Driven-Decision-Making –Trustable Sample Questions Answers

The various available online sources for exam Test Data-Driven-Decision-Making Dumps.zip preparation either provide complex information or deficient of the required knowledge, We will send the latest Data-Driven-Decision-Making New Exam Camp Questions Courses and Certificates pdf immediately once we have any updating about this dump.
