It focuses on helping organizations anticipate, minimize, and respond effectively to potential disruptions or losses.</li> </ul>

## ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q11-Q16):

### NEW QUESTION # 11

Which type of plan would outline the organizational vision for a multi-year infrastructure expansion?

- A. Operational
- B. Project
- **C. Strategic**
- D. Tactical

**Answer: C**

Explanation:

According to ITIL DPI, planning occurs at strategic, tactical, and operational levels. A strategic plan defines long-term direction, including multi-year infrastructure expansion that aligns with business goals. Tactical plans break this down into departmental objectives, while operational plans manage day-to-day execution.

Project plans are temporary and specific but not long-term vision documents.

(Reference: ITIL 4 Strategist DPI, section on "Planning levels - strategic, tactical, operational")

### NEW QUESTION # 12

A service provider has a small technical support team, who are based in a remote location and provide support to a critical service. The support group have a reputation for providing excellent service. Head office, who control budget decisions, are implementing an improvement project for the service.

What should the service provider do FIRST to identify the support team's involvement in the project?

- A. Agree a method for involving the support team in financial decisions
- **B. Initiate a discussion with the support group to understand their preferred method of communication**
- C. Use the same method of communication as agreed with all project stakeholders
- D. Inform the support team that they will receive regular email updates

**Answer: B**

Explanation:

DPI's OCM guidance emphasizes engaging stakeholders early and ensuring communication methods are tailored to their needs. By first discussing preferred communication methods with the remote support team (B), the organization ensures their active involvement and reduces the risk of disengagement. Option A is one-way communication. Option C is irrelevant (they don't make financial decisions). Option D assumes one-size-fits-all, which contradicts DPI's principle of stakeholder-specific communication.

(Reference: ITIL 4 Strategist DPI, section on "OCM - stakeholder engagement and communication planning")

### NEW QUESTION # 13

A small service provider is experiencing growth and success. Currently, all important decisions are made by a small executive group. This creates delays because some members of the group are often unavailable.

Which is the BEST approach for establishing an authority structure for decision-making within the service provider organization?

- A. Ensure that technical decisions are made by the operational staff who can define the risks
- B. Allow people to make decisions about their work, and use training and automation to mitigate the risks
- C. Keep high-risk decisions within the executive group, but define a policy for delegating other decisions
- D. Refer decisions to line managers, who will escalate cases to the executive group when appropriate

**Answer: C**

Explanation:

DPI emphasizes governance by defining clear decision-making authority. High-risk or strategic decisions should remain with executives, but less critical decisions must be delegated through policies to appropriate levels of management. This prevents bottlenecks and ensures accountability while balancing governance oversight. Options A and B may reduce delays but lack structured governance, while D risks insufficient control.

(Reference: ITIL 4 Strategist DPI, section on "Delegation of decision-making and governance structures")

#### NEW QUESTION # 14

A service provider has experienced a number of problems with their cloud storage service that have caused service outages. Problem management has successfully identified the cause of each incident, but further improvements to the service are considered necessary.

Which is the BEST example of using the 'continual improvement model' to guide improvements to the service?

- A. Use the model to identify and compare improvements to the 'problem management' practice
- B. Use the model to assess and authorize changes to improve the cloud storage service
- C. Use the model to restore and recover the cloud storage service each time the service fails
- D. Use the model to identify and prioritize improvements to the cloud storage service

**Answer: D**

Explanation:

The continual improvement model is applied to evaluate, prioritize, and implement improvements across services, practices, and processes. Here, the focus is the cloud storage service, not just the practice of problem management. Option B reflects the model's purpose—identify improvement opportunities, assess priorities, and act to prevent recurrence of failures. Options A, C, and D misapply the model to either specific practices or operational recovery, not holistic improvement.

(Reference: ITIL 4 Strategist DPI, section on "Applying the continual improvement model to services and practices")

#### NEW QUESTION # 15

Which statement describes the influence of services on service consumers' outcomes, costs, and risks?

- A. Services remove risks from service consumers without introducing new ones
- B. The key benefit of services is to reduce costs and risks
- C. A service should introduce fewer costs than it removes
- D. Services can negatively affect some outcomes while supporting others

**Answer: D**

Explanation:

DPI explains that services influence consumer outcomes, costs, and risks in complex ways. They may enable desired outcomes while also introducing new costs and risks. Thus, services can support some outcomes and negatively affect others. They never remove all risks (contradicts B), cost reduction is not the sole benefit (contradicts C), and D oversimplifies the cost-value relationship.

(Reference: ITIL 4 Strategist DPI, section on "Understanding value, outcomes, costs, and risks")

#### NEW QUESTION # 16

.....

You can know what knowledge points you do not master. By the report from our ITIL4-DPI study questions. Then it will be very easy for you to make your own learning plan. We believe that the learning plan based on the report of our ITIL4-DPI preparation exam will be very useful for you.
