私たちの Associate-Google-Workspace-Administrator試験問題集は、もちろん、さまざまな国で人気があります。同時に、私たちのグローバル市場は私たちが情報を収集するのにも役に立ちます。私たちはあなたに Associate-Google-Workspace-Administrator試験問題集の更新を一年間無料で提供できます。あなたはほかの資料を購入する必要はありません。Associate-Google-Workspace-Administrator試験問題集は、あなたのすべてのニーズを満たすことができます。何を待っていますか？早く行動しましょう！

Google Associate Google Workspace Administrator 認定 Associate-Google-Workspace-Administrator 試験問題 (Q20-Q25):

質問 # 20

The legal department at your organization is working on a time-critical merger and acquisition (M&A) deal. They urgently require access to specific email communications from an employee who is currently on leave. The organization's current retention policy is set to indefinite. You need to retrieve the required emails for the legal department in a manner that ensures data privacy. What should you do?

- A. Ask a colleague with delegate access to the employee's mailbox to identify and forward the relevant emails to the legal department.
- B. Instruct the IT department to directly access and forward the relevant emails to the legal department.
- C. Temporarily grant the legal department access to the employee's email account with a restricted scope that is limited to the M&A-related emails.
- D. Use Google Vault to create a matter specific to the M&A deal. Search for relevant emails within the employee's mailbox. Export and share relevant emails with your legal department.

正解: D

解説:

Using Google Vault to create a matter specific to the M&A deal allows for legal, secure, and privacy-compliant retrieval of emails. You can search for the specific emails related to the merger and acquisition, export them, and share them with the legal department without granting direct access to the employee's mailbox. This approach ensures both data privacy and compliance with organizational policies.

質問 # 21

A user in your organization reported that their internal event recipient is not receiving the Calendar event invites. You need to identify the source of this problem. What should you do?

- A. Check whether the event recipient has turned off their email notifications for new events in their Calendar settings.
- B. Check if Calendar service is turned off for the event creator.
- C. Check whether the Calendar event has more than 50 guests.
- D. Check whether the business hours are set up in the event recipient's Calendar settings.

正解: A

解説:

When an internal user reports not receiving Google Calendar event invites, the most likely immediate cause to investigate on the

recipient's end is their notification settings within Google Calendar. Users can customize their notification preferences, and it's possible they have turned off email notifications for new events.

質問 # 22

Per regulatory requirements, your company is required to keep the data of employees located in Germany within Europe and the data of employees located in the US within the US. The employees in Germany are in a separate organizational unit (OU) than employees in the US. You need to ensure that where employee data is stored is in compliance with the location regulations. What should you do?

- A. Instruct employees to use Drive for desktop to keep documents on their corporate computers.
- B. Navigate to the Data Regions function in the Admin console. Select 'No preference.'
- C. Create two Groups. Assign employees into the Germany or US Group based on their location. Use Google Drive trust rules to prevent sharing between the Groups.
- **D. Navigate to the Data Regions function in the Admin console. Select the Europe region for employees in Germany, and select the US region for US employees.**

正解: D

解説:

Using the Data Regions function in the Google Admin console, you can specify where data is stored for different organizational units (OUs) based on their geographical location. This ensures that employee data for those in Germany is stored within Europe, while data for US employees is stored within the US, meeting the regulatory requirements for data locality. This approach automates compliance and eliminates the need for manual tracking or additional configurations.

質問 # 23

Your organization wants to provide access to YouTube to a select group of users for educational purposes, while restricting YouTube access for all other users. You need to implement a solution that allows for granular control over YouTube access based on user roles or groups. What should you do?

- A. Instruct the select group of users to switch to their personal Google account when accessing YouTube.
- B. Deploy a Chrome extension from the Google Workspace Marketplace that blocks YouTube for users who are not in the select user group.
- **C. Use organizational units (OUs) to apply a policy that restricts YouTube access, and create an exception for the select group of users.**
- D. Configure a SAML application to manage YouTube access for different user groups.

正解: C

解説:

To achieve granular control over YouTube access within your Google Workspace organization, allowing access to a select group while restricting it for others, the recommended approach is to use organizational units (OUs) in conjunction with service settings exceptions. You would apply a policy to restrict YouTube access at a higher-level OU (encompassing most users) and then create a child OU containing the select group, where you override the inherited policy to allow YouTube access.

質問 # 24

Your security team is concerned about disgruntled employees downloading large amounts of intellectual property. You need to create an automatic notification if any user downloads more than 500 files from Google Drive within a one-hour period. What should you do?

- A. Configure a Data Loss Prevention (DLP) rule for Drive.
- B. Use the alert center to review Drive audit logs for instances where users download a large number of files.
- C. Set up an alert within Google Cloud Monitoring to track the number of Drive API calls and trigger a notification when a user makes an excessive number of download requests.
- **D. Create an activity rule in the security investigation tool to monitor Drive download events. Set a threshold to trigger an alert.**

正解: D

解説:

To create an automatic notification for a specific event (downloading more than 500 files from Google Drive within a one-hour period), an "activity rule" in the Google Workspace Security Center (which leverages the security investigation tool's capabilities) is the most appropriate and direct solution. Activity rules allow you to define conditions based on log events (like Drive downloads) and set thresholds to trigger alerts and even automated actions.
