Thousands of people have regain hopes for their life after accepting the guidance of our CCSK Study Materials. You should never regret for the past.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following is the key difference between cloud computing and traditional virtualization?

- A. Abstraction

- B. Isolation
- **C. Orchestration**
- D. Classification

Answer: C

Explanation:

Orchestration is the difference between cloud computing and traditional virtualization; virtualization abstracts resources, but it typically lacks the orchestration to pool them together and deliver them to customers on demand, instead relying on manual processes.

Ref: CSA Security Guidelines V4.0

NEW QUESTION # 25

According to Cloud Security Alliance logical model of cloud computing, which of the following defines the protocols and mechanisms that provide the interface between the infrastructure layer and the other layers.

- **A. Metastructure**
- B. Infrastructure
- C. Infostructure
- D. Applistructure

Answer: A

Explanation:

According to CSA Securityguidelines4.0. Metastucture is defined as the protocols and mechanisms that provide the interface between the infrastructure layer and the other layers. The glue that ties the technologies and enables management and configuration.

NEW QUESTION # 26

Which of the following best describes the relationship between a cloud provider and the customer?

- **A. Contract**
- B. Service Level Agreement
- C. Privacy Level Agreement
- D. Operational level Agreement

Answer: A

Explanation:

Contract is the most suitable answer here. It can be argued that Service Level Agreement could also be an answer but SLA is a negotiation/agreement for minimum service-levels expected. Contract is the document that defines the relationship between Cloud service provider and customer

NEW QUESTION # 27

Which aspect is crucial for crafting and enforcing CSP (Cloud Service Provider) policies?

- A. Integration with network infrastructure
- B. Adherence to software development practices
- C. Optimization for cost reduction
- **D. Alignment with security objectives and regulatory requirements**

Answer: D

Explanation:

Aligning CSP policies with security and regulatory objectives is essential for ensuring compliance and robust security measures.

NEW QUESTION # 28

In the Incident Response Lifecycle, which phase involves identifying potential security events and examining them for validity?

- A. Preparation
- B. Containment, Eradication, and Recovery
- C. Detection and Analysis
- D. Post-Incident Activity

Answer: C

Explanation:

The Detection and Analysis phase involves identifying incidents and determining their impact. It is crucial to validate events to understand if they constitute a security incident. Reference: [Security Guidance v5, Domain 11 - Incident Response]

NEW QUESTION # 29

.....
