## ISTQB-CTAL-TA Reliable Dumps Pdf, Interactive ISTQB-CTAL-TA EBook

Web-based ISTQB-CTAL-TA practice test of VCEdumps is accessible from any place. You merely need an active internet connection to take this ISTQB ISTQB-CTAL-TA practice exam. Browsers including MS Edge, Internet Explorer, Safari, Opera, Chrome, and Firefox support this ISTQB-CTAL-TA Practice Exam. Additionally, this (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) (ISTQB-CTAL-TA) test is supported by operating systems including Android, Mac, iOS, Windows, and Linux.

## ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q23-Q28):

### NEW QUESTION # 23

You are a Test Analyst in the banking domain. You have received the following requirement: "The system shall allow cash advances of at least 200 Euros for all supported credit cards. The following credit cards are supported: American Express, Diners, Visa, Mastercard and Eurocard.

Which one of the findings described below is true regarding this requirement?

- A. The requirement is ambiguous in terms of supported cards.

- B. The requirement indicates potential performance problems.
- **C. The requirement is unclear in terms of advance limits.**
- D. The requirement indicates potential usability problems

**Answer: C**

Explanation:

The finding that is true regarding this requirement is that it is unclear in terms of advance limits. The requirement states that the system shall allow cash advances of at least 200 Euros, but it does not specify what is the maximum amount or if there are any other restrictions or conditions for the cash advances. This makes the requirement ambiguous and incomplete, as it does not provide enough information for testing or implementation. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 2.3.1, page 23.

#### NEW QUESTION # 24

Consider the following decision table:

□ This decision table has been created to test the following specification: Persons that study at a university (C1) and have parents whose total annual income is less than € 30.000 (C2), receive a scholarship In in addition to these qualifications, if they also live away from home (C3), they receive an addition to their scholarship (A2) How many cases are left when this decision table is collapsed?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

Two cases are left when this decision table is collapsed. A decision table is a technique that shows the combinations of conditions and actions for a given scenario. A decision table that is collapsed eliminates the combinations that are invalid or impossible, such as having a scholarship without meeting the qualifications.

The two valid cases for this scenario are:

\* C1 = Y, C2 = Y, C3 = Y, A1 = Y, A2 = Y

\* C1 = Y, C2 = Y, C3 = N, A1 = Y, A2 = N

#### NEW QUESTION # 25

In the recent past, you have learned that test automation just using capture & playback tooling, possibly enhanced with some test programming, has limitations. For the next banking project, that will be run using Agile methods, you want to implement a keyword-driven test automation approach. You have already started to define some high-level test cases for the account transfer user story:

TC 1 transfer € 150 from Lars to Ann, verify Ann's balance to be € 150

TC 2 transfer € 300 from Tim to Ann, verify Ann's balance to be € 450

In the context of implementing the keyword-driven test automation approach, which of the following activities should now be conducted by the Test Analyst?

- A. Work together with a developer to define a test automaton architecture
- B. Select a tool to support keyword-driven testing
- **C. Define keywords to be implemented, eg, check balance.**
- **B Design test navigation scripts.**

**Answer: C**

Explanation:

The activity that should now be conducted by the Test Analyst in the context of implementing the keyword- driven test automation approach is to define keywords to be implemented, e.g., check balance. A keyword- driven test automation approach is an approach that uses keywords to represent actions or data in a test case.

The keywords are then interpreted by a test execution tool or framework that performs the corresponding actions or data manipulation. The Test Analyst is responsible for defining the keywords that are relevant and meaningful for the test cases, such as check balance, transfer money, verify message, etc. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst

#### NEW QUESTION # 26

Which of the following testing objectives would NOT be in focus for the Test Analyst during installability testing?

- A. Identifying usability issues in installation and de-installation procedures
- **B. Testing whether a given application can function correctly in all intended target environments.**
- C. Testing the functional correctness of installation and de-installation procedures.
- D. Testing that different configurations of the software can be successfully installed

**Answer: B**

Explanation:

The testing objective that would not be in focus for the Test Analyst during installability testing is testing whether a given application can function correctly in all intended target environments. This objective belongs to portability testing, which is a test type that evaluates the degree to which a system or component can be transferred effectively and efficiently from one hardware, software, or other operational or usage environment to another. Installability testing is a test type that evaluates how easily a system or component can be installed and/or uninstalled. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 5.4.1, page 69.

#### NEW QUESTION # 27

You are testing an enhanced user interface for a mortgage approval program involving multiple user roles. Which test technique would be MOST suitable for this next stage of testing?

SELECT ONE OPTION

- A. Exploratory testing
- B. Boundary Value Analysis
- **C. Use Case testing**
- D. Pairwise

**Answer: C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

Since the testing involves verifying the user interface (UI) enhancements and ensuring that they meet the needs of multiple user roles, Use Case Testing is the most appropriate technique.

\* Use Case testing allows you to validate end-to-end user scenarios and ensure the system behaves correctly for each role, focusing on user interactions and usability.

\* Exploratory testing (A) might be useful for finding unexpected issues, but it lacks the structured approach needed for role-based UI validation.

\* Boundary Value Analysis (B) is useful for testing numeric input limits, not UI roles.

\* Pairwise testing (D) focuses on combinatorial testing, not role-based UI testing.

The correct answer is C (Use Case testing).

#### NEW QUESTION # 28

.....

Our staff is suffer-able to your any questions related to our ISTQB-CTAL-TA test guide. If you get any suspicions, we offer help 24/7 with enthusiasm and patience. Apart from our stupendous ISTQB-CTAL-TA latest dumps, our after-sales services are also unquestionable. Your decision of the practice materials may affects the results you concerning most right now. Good exam results are not accidents, but the results of careful preparation and high quality and accuracy materials like our ISTQB-CTAL-TA practice materials.
