

# Free PDF The Best Microsoft - DP-700 - Exam Implementing Data Engineering Solutions Using Microsoft Fabric Questions Fee

2026 Latest TestPDF DP-700 PDF Dumps and DP-700 Exam Engine Free Share: [https://drive.google.com/open?id=18xqsvBtgrOEvGY2fPO7R\\_-HaL4lngf6D](https://drive.google.com/open?id=18xqsvBtgrOEvGY2fPO7R_-HaL4lngf6D)

Our company boasts top-ranking expert team, professional personnel and specialized online customer service personnel. Our experts refer to the popular trend among the industry and the real exam papers and they research and produce the detailed information about the DP-700 study materials. They constantly use their industry experiences to provide the precise logic verification. The DP-700 Study Materials are compiled with the highest standard of technology accuracy and developed by the certified experts and the published authors only.

Considering all customers' sincere requirements, DP-700 test question persist in the principle of "Quality First and Clients Supreme" all along and promise to our candidates with plenty of high-quality products, considerate after-sale services as well as progressive management ideas. Numerous advantages of DP-700 training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing, secure privacy protection and so forth. From the customers' point of view, our DP-700 Test Question put all candidates' demands as the top priority. We treasure every customer' reliance and feedback to the optimal DP-700 practice test.

## Microsoft DP-700 Valid Test Sims, DP-700 Premium Files

When you first contact our software, different people will have different problems. Maybe you are not comfortable with our DP-700 exam question and want to know more about our products and operations. As long as you have questions, you can send e-mail to us, we have online staff responsible for ensuring 24-hour service to help you solve all the problems about our DP-700 Test Prep. After you purchase our DP-700 quiz guide, we will still provide you with considerate services. Maybe you will ask whether we will charge additional service fees.

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q43-Q48):

### NEW QUESTION # 43

You need to recommend a solution for handling old files. The solution must meet the technical requirements. What should you include in the recommendation?

- A. a notebook that runs the VACUUM command
- B. a data pipeline that includes a Copy data activity
- C. a data pipeline that includes a Delete data activity

- D. a notebook that runs the OPTIMIZE command

**Answer: A**

Explanation:

Topic 1, Contoso, Ltd Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview. Company Overview

Contoso, Ltd. is an online retail company that wants to modernize its analytics platform by moving to Fabric.

The company plans to begin using Fabric for marketing analytics.

Overview. IT Structure

The company's IT department has a team of data analysts and a team of data engineers that use analytics systems.

The data engineers perform the ingestion, transformation, and loading of data. They prefer to use Python or SQL to transform the data.

The data analysts query data and create semantic models and reports. They are qualified to write queries in Power Query and T-SQL.

Existing Environment. Fabric

Contoso has an F64 capacity named Cap1. All Fabric users are allowed to create items.

Contoso has two workspaces named WorkspaceA and WorkspaceB that currently use Pro license mode.

Existing Environment. Source Systems

Contoso has a point of sale (POS) system named POS1 that uses an instance of SQL Server on Azure Virtual Machines in the same Microsoft Entra tenant as Fabric. The host virtual machine is on a private virtual network that has public access blocked. POS1 contains all the sales transactions that were processed on the company's website.

The company has a software as a service (SaaS) online marketing app named MAR1. MAR1 has seven entities. The entities contain data that relates to email open rates and interaction rates, as well as website interactions. The data can be exported from MAR1 by calling REST APIs. Each entity has a different endpoint.

Contoso has been using MAR1 for one year. Data from prior years is stored in Parquet files in an Amazon Simple Storage Service (Amazon S3) bucket. There are 12 files that range in size from 300 MB to 900 MB and relate to email interactions.

Existing Environment. Product Data

POS1 contains a product list and related data. The data comes from the following three tables:

Products

ProductCategories

ProductSubcategories

In the data, products are related to product subcategories, and subcategories are related to product categories.

Existing Environment. Azure

Contoso has a Microsoft Entra tenant that has the following mail-enabled security groups:

DataAnalysts: Contains the data analysts

DataEngineers: Contains the data engineers

Contoso has an Azure subscription.

The company has an existing Azure DevOps organization and creates a new project for repositories that relate to Fabric.

Existing Environment. User Problems

The VP of marketing at Contoso requires analysis on the effectiveness of different types of email content. It typically takes a week to manually compile and analyze the data. Contoso wants to reduce the time to less than one day by using Fabric.

The data engineering team has successfully exported data from MAR1. The team experiences transient connectivity errors, which causes the data exports to fail.

Requirements. Planned Changes

Contoso plans to create the following two lakehouses:

Lakehouse1: Will store both raw and cleansed data from the sources

Lakehouse2: Will serve data in a dimensional model to users for analytical queries. Additional items will be added to facilitate data ingestion and transformation.

Contoso plans to use Azure Repos for source control in Fabric.

Requirements. Technical Requirements

The new lakehouses must follow a medallion architecture by using the following three layers: bronze, silver, and gold. There will be extensive data cleansing required to populate the MAR1 data in the silver layer, including deduplication, the handling of missing values, and the standardizing of capitalization.

Each layer must be fully populated before moving on to the next layer. If any step in populating the lakehouses fails, an email must be sent to the data engineers.

Data imports must run simultaneously, when possible.

The use of email data from the Amazon S3 bucket must meet the following requirements:

Minimize egress costs associated with cross-cloud data access.

Prevent saving a copy of the raw data in the lakehouses.

Items that relate to data ingestion must meet the following requirements:

The items must be source controlled alongside other workspace items.

Ingested data must land in the bronze layer of Lakehouse1 in the Delta format.

No changes other than changes to the file formats must be implemented before the data lands in the bronze layer.

Development effort must be minimized and a built-in connection must be used to import the source data.

In the event of a connectivity error, the ingestion processes must attempt the connection again.

Lakehouses, data pipelines, and notebooks must be stored in WorkspaceA. Semantic models, reports, and dataflows must be stored in WorkspaceB.

Once a week, old files that are no longer referenced by a Delta table log must be removed.

Requirements. Data Transformation

In the POS1 product data, ProductID values are unique. The product dimension in the gold layer must include only active products from product list. Active products are identified by an IsActive value of 1.

Some product categories and subcategories are NOT assigned to any product. They are NOT analytically relevant and must be omitted from the product dimension in the gold layer.

Requirements. Data Security

Security in Fabric must meet the following requirements:

The data engineers must have read and write access to all the lakehouses, including the underlying files.

The data analysts must only have read access to the Delta tables in the gold layer.

The data analysts must NOT have access to the data in the bronze and silver layers.

The data engineers must be able to commit changes to source control in WorkspaceA.

#### NEW QUESTION # 44

You need to ensure that processes for the bronze and silver layers run in isolation. How should you configure the Apache Spark settings?

- A. Modify the number of executors.
- **B. Create a custom pool.**
- C. Disable high concurrency.
- D. Set the default environment.

**Answer: B**

#### NEW QUESTION # 45

You have an Azure event hub. Each event contains the following fields:

BikepointID

Street

Neighbourhood

Latitude

Longitude

No\_Bikes

No\_Empty\_Docks

You need to ingest the events. The solution must only retain events that have a Neighbourhood value of Chelsea, and then store the retained events in a Fabric lakehouse.

What should you use?

- A. a KQL queryset
- B. a streaming dataset
- **C. an eventstream**
- D. Apache Spark Structured Streaming

**Answer: C**

Explanation:

An eventstream is the best solution for ingesting data from Azure Event Hub into Fabric, while applying filtering logic such as retaining only the events that have a Neighbourhood value of "Chelsea." Eventstreams in Microsoft Fabric are designed for handling real-time data streams and can apply transformation logic directly on incoming events. In this case, the eventstream can filter events based on the Neighbourhood field before storing the retained events in a Fabric lakehouse.

Eventstreams are well-suited for stream processing, such as this case where you need to filter out only specific data (events with a Neighbourhood of "Chelsea") before storing it in the lakehouse.

#### NEW QUESTION # 46

You need to ensure that usage of the data in the Amazon S3 bucket meets the technical requirements.

What should you do?

- A. Create a shortcut and ensure that caching is enabled for the workspace.
- **B. Create a shortcut and ensure that caching is disabled for the workspace.**
- C. Create a workspace identity and use the identity in a data pipeline.
- D. Create a workspace identity and enable high concurrency for the notebooks.

**Answer: B**

Explanation:

To ensure that the usage of the data in the Amazon S3 bucket meets the technical requirements, we must address two key points:  
Minimize egress costs associated with cross-cloud data access: Using a shortcut ensures that Fabric does not replicate the data from the S3 bucket into the lakehouse but rather provides direct access to the data in its original location. This minimizes cross-cloud data transfer and avoids additional egress costs.

Prevent saving a copy of the raw data in the lakehouses: Disabling caching ensures that the raw data is not copied or persisted in the Fabric workspace. The data is accessed on-demand directly from the Amazon S3 bucket.

#### NEW QUESTION # 47

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

BikepointID

Street

Neighbourhood

No\_Bikes

No\_Empty\_Docks

Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

Does this meet the goal?

- A. Yes
- **B. no**

**Answer: B**

Explanation:

This code does not meet the goal because it uses order by, which is not valid in KQL. The correct term in KQL is sort by. Correct code should look like:

### NEW QUESTION # 48

• • • • •

The Microsoft DP-700 is a very prestigious certificate that is considered a guarantee of a well-paid job in a reputed tech firm. Most candidates attempting the Implementing Data Engineering Solutions Using Microsoft Fabric test are nervous. Very few applicants can earn the Implementing Data Engineering Solutions Using Microsoft Fabric DP-700 certificate on their first attempts because of the challenging level of topics included in the Microsoft DP-700 test. TestPDF DP-700 actual dumps help applicants in clearing the test very easily.

**DP-700 Valid Test Sims:** <https://www.testpdf.com/DP-700-exam-braindumps.html>

Microsoft Exam DP-700 Questions Fee We have a team of professional software developers to ensure the software's productivity, In addition, our DP-700 exam cram has won high praises according to customers' feedback, Microsoft Exam DP-700 Questions Fee Then you are available for various high salary jobs, Moreover, they impart you information in the format of the DP-700 questions and answers that is actually the format of your real certification test.

We don't use these features, Conversely, simply being aware of something is no DP-700 longer a type of knowledge, and is not a type of knowledge yet, We have a team of professional software developers to ensure the software's productivity.

## Implementing Data Engineering Solutions Using Microsoft Fabric Learn Materials Can Definitely Exert Positive Effect on Your Exam

In addition, our DP-700 Exam Cram has won high praises according to customers' feedback, Then you are available for various high salary jobs, Moreover, they impart you information in the format of the DP-700 questions and answers that is actually the format of your real certification test.

Through the Fortinet DP-700 Latest Real Test Questions exam, you will get what you want.
