CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q254-Q259):

NEW QUESTION # 254

A cloud engineer is collecting web server application logs to troubleshoot intermittent issues. However, the logs are piling up and causing storage issues. Which of the following log mechanisms should the cloud engineer implement to address this issue?

- A. Inspection
- **B. Rotation**
- C. Splicing
- D. Sampling

Answer: B

Explanation:

Log rotation is the mechanism the cloud engineer should implement to address the issue of logs piling up and causing storage issues. Log rotation involves automatically archiving old log files and creating new ones after a certain size or time period, preventing storage issues. NEW QUESTION # 255

A developer is building an application that has multiple microservices that need to communicate with each other. The developer currently manually updates the IP address of each service. Which of the following best resolves the communication issue and automates the process?

- A. Managed container services
- B. DNS
- C. Fan-out
- D. Service discovery

Answer: D

Explanation:

Service discovery is a key component in microservices architectures, allowing services to dynamically discover and communicate with each other. By implementing service discovery, the developer can automate the process of updating service addresses, resolving the communication issue without manual updates to IP addresses, thus ensuring seamless interaction between the microservices.

NEW QUESTION # 256

Which of the following types of storage provides the greatest performance advantage for a traditional relational database?

- A. Object
- B. File
- C. Block
- D. Ephemeral

Answer: C

Explanation:

Block storage provides the greatest performance advantage for traditional relational databases due to its high performance and low-latency characteristics. Block storage allows databases to rapidly manage data in fixed-sized blocks, which is ideal for databases that require frequent read/write operations.

NEW QUESTION # 257

A project team is reviewing the project plan and related documents and identifies tasks that could be spread into smaller deliverables. Which of the following documents should the team edit first?

- A. Milestone chart
- B. Risk assessment
- C. Work breakdown structure
- D. Preliminary scope statement

Answer: C

Explanation:

The Work Breakdown Structure (WBS) is the hierarchical decomposition of deliverables into smaller, manageable work packages. If tasks need to be split into smaller deliverables, the WBS is the document to update first. Risk assessments and milestone charts serve other purposes.

NEW QUESTION # 258

A project manager is reviewing quality planning techniques. Which of the following involves comparing results of similar activities?

- **A. Benchmarking**
- B. Brainstorming
- C. Performing a cost-benefit analysis
- D. Defining metrics

Answer: A

Explanation:

Benchmarking is a quality technique that compares results, processes, or best practices from similar activities or organizations. It helps set realistic performance standards and identify improvement opportunities. Unlike cost-benefit analysis (financial), benchmarking focuses on performance comparison.
