## NCP-US Exam Cram Questions | Efficient Nutanix NCP-US Certificate Exam: Nutanix Certified Professional - Unified Storage v6.5

Our accurate, reliable, and top-ranked Nutanix Certified Professional - Unified Storage v6.5 (NCP-US) exam questions will help you qualify for your Nutanix NCP-US certification on the first try. Do not hesitate and check out RealExamFree excellent Nutanix Certified Professional - Unified Storage v6.5 (NCP-US) practice exam to stand out from the rest of the others.

The NCP-US Exam is designed to cover a wide range of topics related to the Nutanix storage solution, including the installation and configuration of Nutanix software, the management of storage resources, and the optimization of storage performance. NCP-US exam also covers the integration of Nutanix storage with other technologies, such as VMware, Microsoft, and Citrix. In addition, the exam includes a section on data protection and disaster recovery, which is essential for organizations that rely on their data for business continuity.

### Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q71-Q76):

#### NEW QUESTION # 71

An administrator is managing a Nutanix cluster used for Citrix full clone virtual desktops.

Capacity Runway is in a warning state, indicating storage resources may be fully utilized within 90 days. Which action can be performed to increase current capacity?

- A. Power off over-provisioned VMs.
- **B. Enable deduplication at the container level.**
- C. update resources for constrained VMs,
- D. Analyze inefficient VMS and delete the inactive ones.

**Answer: B**

Explanation:

Deduplication is a data reduction technique that eliminates duplicate blocks of data and reduces the amount of storage space required. By enabling deduplication at the container level, the administrator can optimize the storage efficiency and extend the capacity runway of the Nutanix cluster.

#### NEW QUESTION # 72

How many IP addresses are required by the client network when deploying Nutanix Files?

- A. Twice as many IP addresses as the number of FSVMs
- B. The same number of IP addresses as the number of FSVM nodes
- **C. One additional IP address as the number of FSVMs**
- D. One less IP address as the number of FSVMs

**Answer: C**

#### NEW QUESTION # 73

An administrator needs to ensure maximum performance, throughput, and redundancy for the company's Oracle RAC on Linux implementation, while using the native method for securing workloads.

Which configuration meets these requirements?

- **A. Volumes with MPIO and a single vDisk**
- B. Volumes with CHAP and multiple vDisks
- C. Files with a distributed share and ABE
- D. Files with a general purpose share and File Blocking

**Answer: A**

#### NEW QUESTION # 74
