HP HPE7-A03 practice test TestkingPass is another great way to reduce your stress level when preparing for the HP Exam Questions. With our TestkingPass, you can practice your excellence and improve your competence on the HPE7-A03 exam dumps. Each HPE7-A03 practice exam, composed of numerous skills, can be measured by the same model used by real examiners. HP HPE7-A03 has real HPE7-A03 exam questions. You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your HPE7-A03 exam dumps.

With our HPE7-A03 study materials, all your agreeable outcomes are no longer dreams for you. And with the aid of our Aruba Certified Campus Access Architect Exam HPE7-A03 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our HP HPE7-A03 learning questions.

Test HP HPE7-A03 Questions Answers, HPE7-A03 Test Dates

Our Aruba Certified Campus Access Architect Exam (HPE7-A03) exam questions are being offered in three easy-to-use and compatible formats. These Aruba Certified Campus Access Architect Exam (HPE7-A03) exam dumps formats offer a user-friendly interface and are compatible with all devices, operating systems, and browsers. The TestkingPass Aruba Certified Campus Access Architect Exam (HPE7-A03) PDF questions file contains real and valid HP HPE7-A03 exam questions that assist you in HPE7-

A03 exam dumps preparation and boost the candidate's confidence to pass the challenging Aruba Certified Campus Access Architect Exam (HPE7-A03) exam easily.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q29-Q34):

NEW QUESTION # 29

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client would like to ensure redundant RADIUS resources in each of their three geographical regions (AMER, EMEA, and APAC). A large office location is available in each region with sufficient VMware resources available.

- Each region has 5,000 clients, all of which will need to do either 802.1x wired or wireless authentications as well as 802.1x authentication for a single personal device on Wi-Fi.

* All of the non-personal devices will also need to validate health with a local agent.

* A total of 500 guests are expected to be connected on average with a maximum of 700 simultaneous connections making use of Guest Portal for access to the Internet.

* TACACS authentication will also be configured for a total of 1,200 evenly dispersed NADs.

In order to support virtual IPs and server redundancy in each region how many Virtual Policy Manager Licenses will be needed?

- A. six licenses. C3000V
- B. three licenses. C2000V
- C. six licenses. C2000V
- D. three licenses. C3000V

Answer: A

Explanation:

In a scenario requiring redundant RADIUS resources across three geographical regions, with the scale of operations as described, opting for six C3000V Virtual Policy Manager licenses would ensure adequate capacity and redundancy. The C3000V model is designed to cater to larger deployments, offering high-capacity RADIUS services suitable for environments with thousands of clients and devices requiring authentication and health validation. By deploying two C3000V instances in each region (AMER, EMEA, and APAC), the financial institution can achieve both high availability and load balancing, ensuring that authentication services remain uninterrupted and efficient, even in the event of a server failure or during maintenance periods. This approach aligns with best practices for enterprise network design, emphasizing resilience and reliability in critical infrastructure components like authentication services.

NEW QUESTION # 30

Identify the stakeholders when gathering information for the network design and new IDF/MDF design.

(Select two.)

- A. Facility manager
- B. Chief Financial Officer
- C. Network Operations manager
- D. Help desk manager

Answer: C,D

Explanation:

When designing a network and considering new Intermediate Distribution Frame/Main Distribution Frame (IDF/MDF) deployments, it's essential to gather information from various stakeholders to ensure the design meets all operational and organizational requirements. According to Aruba Campus Access learning resources, the Help Desk Manager and Network Operations Manager

are crucial stakeholders in this process. The Help Desk Manager provides insights into common issues, user complaints, and service requests, which can influence network design decisions to improve user experience and operational efficiency. The Network Operations Manager, on the other hand, offers a technical perspective on network management, maintenance requirements, and operational challenges. Engaging with these stakeholders ensures that the network design is aligned with both user needs and technical operational standards, contributing to a more resilient, efficient, and user-friendly network infrastructure.

NEW QUESTION # 31

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client would like to ensure full wireless coverage in its 40 m x 40 m (130 ft x 130 ft) auditorium during company functions while maintaining the fewest APs for aesthetic purposes. Wi-Fi 6 APs are a minimum requirement.

Which AP series would you use in the auditorium's 1,000 seats with a maximum take rate of 80%?

- A. AP515
- **B. AP635**
- C. AP577
- D. AP555

Answer: B

Explanation:

The Aruba AP-635 is a Wi-Fi 6 (802.11ax) access point, designed for high-density environments such as auditoriums. It is capable of providing high throughput and efficient airtime fairness to a large number of clients, which makes it suitable for an auditorium setting with 1,000 seats and a high take rate. The AP-635's advanced capabilities, including OFDMA and MU-MIMO, allow it to handle multiple simultaneous connections efficiently, ensuring robust wireless coverage and performance during company functions, all while keeping the number of APs to a minimum to satisfy aesthetic concerns.

NEW QUESTION # 32

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands.

Their US-based headquarters HQ1 was refreshed last year based on the Aruba ESP architecture. You have treated the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x Aruba 8360-16Y2C in VSX (ISL 2» ICOG0E DAC)

Access Stack: 10 x Stack of Aruba 6200F 48G Class4 PoE 4SFP- 740W each stack has A members. VSF with 10GbE VSF links) 12 x 10GbE uplink per stack) During the presentation of your design to the CTO of "Don't Buy at Us" you were informed about the changes they want you to incorporate into the updated design

1. HQ2 will include the EMEA regional distribution center (EMEA-OISTR) next to the HQ2.
2. Only two pairs of OS1 are available between HQ2 and EMEA-DISTR.
3. The uplinks from all access stacks need to increase to 2 x 25GbE. the fiber in HQ2 and EMEA-DISTR is certified for 25GbE.
4. EMEA-DISTR needs at least 7 x stack of Aruba 48 ports switches (each stack has 4 members).

Which answer based on best practice is presenting the correct Switch BOM for the updated design?

- A. 
- B. 
- C. 
- D. 

Answer: D

Explanation:

Based on the requirements provided by "Don't Buy at Us," the updated design needs to accommodate 25GbE uplinks and a minimum of 7 stacks of 48-port Aruba switches for the EMEA-DISTR. Option C is the most suitable based on best practices, as it proposes:

- * A core configuration consisting of two Aruba 8360-12C in VSX for the collapsed core with ISL of 2x100GbE DAC, which will provide robust core networking with high-speed interconnects, suitable for the demands of a regional distribution center and headquarters.

- * Aggregation with two stacks, each with 2 Aruba 8360-12C in VSX (ISL 2x100GbE DAC), accommodating the uplink capacity requirements.

- * Access stacks with a total of 17 stacks of Aruba 6300F 48-port 1GbE Class 4 PoE with 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack), which exceeds the minimum requirement of 7 stacks and provides the necessary uplink bandwidth.

This configuration supports the 25GbE uplink speeds, satisfies the required number of switch stacks for the EMEA distribution center, and is compatible with the existing 25GbE-certified fiber infrastructure at HQ2 and EMEA-DISTR.

NEW QUESTION # 33

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project.

The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of "smart office" technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client has decided that more critical switch stacks supporting Contact Center resources will need to support greater than 600W of CL4 PoE and have redundant power supplies. These stacks will have approximately six members.

What would be the most economical choice Aruba switch series to meet these requirements?

- A. Aruba CX 6400
- B. Aruba CX 6100
- C. Aruba CX6200M
- D. Aruba CX6300F

Answer: D

Explanation:

The Aruba CX 6300F Switch Series is well-suited for environments requiring high PoE power and redundancy in power supplies, especially for critical applications like supporting contact center resources. This series offers robust PoE capabilities, often exceeding

600W of Class 4 PoE power, making it ideal for powering multiple high-powered devices. Additionally, the Aruba CX 6300F supports stack configurations and redundant power supplies, ensuring high availability and reliability for critical network infrastructures. Its economical pricing, combined with high performance and reliability, makes it the most cost-effective choice for the client's requirements.

NEW QUESTION # 34

.....

Are you staying up for the HPE7-A03 exam day and night? Do you have no free time to contact with your friends and families because of preparing for the exam? Are you tired of preparing for different kinds of exams? If your answer is yes, please buy our HPE7-A03 Exam Questions, which is equipped with a high quality. We can make sure that our HPE7-A03 study materials have the ability to help you solve your problem, and you will not be troubled by these questions above.

Test HPE7-A03 Questions Answers: <https://www.testkingpass.com/HPE7-A03-testking-dumps.html>

HP Reliable HPE7-A03 Exam Tutorial By practicing the exam material in our Brain dumps PDF, you will be able to answer all the questions asked in the exam, So do avail yourself of this chance to get help from our exceptional Aruba Certified Campus Access Architect Exam (HPE7-A03) dumps to grab the most competitive HP HPE7-A03 certificate, Because we have all our experts' dedication to the customer & HPE7-A03 dumps torrent questions with friendly innovations.

It seeks to explore the development of complex information as HPE7-A03 a different collection and classification, which reliably differs in our consistency, with the current social maneuver.

In this article, Joe Phillips discusses the Exam HPE7-A03 Simulations Google Apps Administrator exam and tells you what you need to know to pass the exam, By practicing the exam material in our HPE7-A03 Simulation Questions Brain dumps PDF, you will be able to answer all the questions asked in the exam.

Hot Reliable HPE7-A03 Exam Tutorial Offers you Professional Actual HP Aruba Certified Campus Access Architect Exam Exam Products

So do avail yourself of this chance to get help from our exceptional Aruba Certified Campus Access Architect Exam (HPE7-A03) dumps to grab the most competitive HP HPE7-A03 certificate.

Because we have all our experts' dedication to the customer & HPE7-A03 dumps torrent questions with friendly innovations, Do you share your customer information database with any third parties?

One year updates freely.
