## DP-600 Actual Torrent: Implementing Analytics Solutions Using Microsoft Fabric - DP-600 Pass-King Materials & DP-600 Actual Exam

In order to help you get DP-600 certification, many experts have worked hard for several years to formulate DP-600 exam torrent for all examiners. In such a way, our DP-600 study materials not only target but also cover all knowledge points. Our DP-600 practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of DP-600 practice materials, so that you can strengthen the training for weak links. In this way, you can more confident for your success since you have improved your ability.

## Microsoft Implementing Analytics Solutions Using Microsoft Fabric Sample Questions (Q114-Q119):

### NEW QUESTION # 114

You have a Fabric tenant that contains a new semantic model in OneLake.

You use a Fabric notebook to read the data into a Spark DataFrame.

You need to evaluate the data to calculate the min, max, mean, and standard deviation values for all the string and numeric columns.

Solution: You use the following PySpark expression:

```
df.explain()
```

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

Explanation:

The `df.explain()` method does not meet the goal of evaluating data to calculate statistical functions. It is used to display the physical plan that Spark will execute. References = The correct usage of the `explain()` function can be found in the PySpark documentation.

#### NEW QUESTION # 115

You have a Fabric warehouse named Warehouse1 that contains a table named `dbo.Product`. `dbo.Product` contains the following columns.

You need to use a T-SQL query to add a column named `PriceRange` to `dbo.Product`. The column must categorize each product based on `UnitPrice`. The solution must meet the following requirements:

- \* If `UnitPrice` is 0, `PriceRange` is "Not for resale".
- \* If `UnitPrice` is less than 50, `PriceRange` is "Under \$50".
- \* If `UnitPrice` is between 50 and 250, `PriceRange` is "Under \$250".
- \* In all other instances, `PriceRange` is "\$250+".

How should you complete the query? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

#### NEW QUESTION # 116

You have the source data model shown in the following exhibit.

The primary keys of the tables are indicated by a key symbol beside the columns involved in each key.

You need to create a dimensional data model that will enable the analysis of order items by date, product, and customer.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

- \* The relationship between `OrderItem` and `Product` must be based on: Both the `CompanyID` and the `ProductID` columns
- \* The `Company` entity must be: Denormalized into the `Customer` and `Product` entities In a dimensional model, the relationships are typically based on foreign key constraints between the fact table (`OrderItem`) and dimension tables (`Product`, `Customer`, `Date`). Since `CompanyID` is present in both the `OrderItem` and `Product` tables, it acts as a foreign key in the relationship. Similarly, `ProductID` is a foreign key that relates these two tables. To enable analysis by date, product, and customer, the `Company` entity would need to be denormalized into the `Customer` and `Product` entities to ensure that the relevant company information is available within those dimensions for querying and reporting purposes.

References =

- \* Dimensional modeling
- \* Star schema design

#### NEW QUESTION # 117

You create a semantic model by using Microsoft Power BI Desktop. The model contains one security role named `SalesRegionManager` and the following tables:

- \* `Sales`
- \* `SalesRegion`
- \* `Sales Address`

You need to modify the model to ensure that users assigned the `SalesRegionManager` role cannot see a column named `Address` in `Sales Address`.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

To ensure that users assigned the SalesRegionManager role cannot see the Address column in the SalesAddress table, follow these steps in sequence:

Open the model in Tabular Editor.

Select the Address column in SalesAddress.

Set Object Level Security to None for SalesRegionManager.

### NEW QUESTION # 118

Which syntax should you use in a notebook to access the Research division data for Productline?

- A. ☐
- B. ☐
- C. ☒
- D. ☐

**Answer: C**

### NEW QUESTION # 119

.....

Our DP-600 training dumps are deemed as a highly genius invention so all exam candidates who choose our DP-600 exam questions have analogous feeling that high quality our practice materials is different from other practice materials in the market. So our DP-600 study braindumps are a valuable invest which cost only tens of dollars but will bring you permanent reward. So many our customers have benefited form our DP-600 preparation quiz, so will you!
