CompTIA A+ Core 1 Exam (2026) Sample Questions (Q297-Q302):

NEW QUESTION # 297

Which of the following connector types is associated with coaxial terminations serving cable internet deployments?

- A. ST
- B. RJ45
- C. F-type
- D. DB9

Answer: C

Explanation:

F-type connectors are commonly used to terminate coaxial cables in cable internet, cable TV, and satellite connections.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.1 - Network cables and connectors:

"F-type connectors are used for coaxial cable terminations in cable modem and TV installations." Verified Source:

NEW QUESTION # 298

Which of the following can a user utilize to share their mobile phone connection with their laptop?

- A. NFC
- B. Wi-Fi Direct
- C. Tethering
- D. IR

Answer: C

Explanation:

Tethering refers to sharing a mobile phone's internet connection with another device, such as a laptop, either through USB, Bluetooth, or Wi-Fi. Tethering effectively turns the mobile phone into a personal hotspot for internet access.

Option A (IR): Incorrect. Infrared (IR) is used for short-range communication, such as remote controls, but it does not support internet sharing.

Option B (NFC): Incorrect. Near-field communication (NFC) is used for close-proximity data transfer, not for internet sharing.

Option C (Wi-Fi Direct): Incorrect. Wi-Fi Direct enables device-to-device communication but does not inherently provide internet sharing.

NEW QUESTION # 299

A user ran out of USB ports on their laptop but wants to plug in more devices. What technology is best?

- A. Port replicator
- B. Near-field communication
- C. Bluetooth
- D. USB receiver

Answer: A

Explanation:

A port replicator expands the number and types of ports available to a laptop, including additional USB ports, video outputs, Ethernet, and more. CompTIA A+ identifies port replicators as solutions for users needing greater connectivity, especially when docking stations are unnecessary or unavailable.

Port replicators connect through a single USB or proprietary connector and provide multiple expansion ports instantly. This resolves the issue of limited USB availability without requiring hardware replacement.

NEW QUESTION # 300

Which of the following resolutions is commonly known as Ultra HD?

- A. 7680x4320
- B. 3840x2160
- C. 1920x1080
- D. 2048x1080

Answer: B

Explanation:

Ultra HD (UHD), also referred to as 4K UHD, has a resolution of 3840x2160. It's four times the resolution of standard 1080p (Full HD), offering more screen real estate and sharper images.

NEW QUESTION # 301

Which of the following best characterizes the use of a virtual machine as a sandbox?

- A. Run an application on multiple workstations without installation.
- B. Create a firewall where the sandbox acts as a perimeter network.
- C. Explore how an application behaves in a different environment
- D. Migrate a currently used legacy application from physical to virtual

Answer: C

Explanation:

A sandbox in virtualization allows testing an application in an isolated environment to observe its behavior without affecting the host system.
