

Cisco 300-620 Reliable Braindumps Free - Latest 300-620 Exam Dumps

P.S. Free & New 300-620 dumps are available on Google Drive shared by Real4test: <https://drive.google.com/open?id=1bS1arkdBME4zdpIXt65eYzGa8cn-bzTq>

Dear every IT candidate, please pay attention to Cisco 300-620 exam training torrent which can guarantee you 100% pass. We know that time and energy is very precious. So the high efficiency of the 300-620 preparation is very important for the IT candidates. If you choose 300-620 Online Test, you just need to take 20-30 hours to review the questions and answers, then you can attend your 300-620 actual test with confidence.

Cisco 300-620 Exam is designed for individuals who want to validate their knowledge and skills in implementing Cisco Application Centric Infrastructure (ACI). Implementing Cisco Application Centric Infrastructure certification exam is part of the CCNP Data Center track and is aimed at network engineers and administrators who want to advance their careers in the field of data center technologies. The 300-620 Exam measures one's ability to implement and configure ACI fabric, policies, virtualization, and network services.

Exam Characteristics

Before enrolling in the exam, it is recommended to first gather information about its key characteristics. Generally, 300-620 comprises multiple-choice questions that needed to be completed in 1,5 hours. This test is available in the English language only, presently. Also, there are no certain details regarding the passing score. However, it is clear that the result you achieve will remain valid for three years. Then, one has to fulfill the recertification requirements before the cycle ends to enjoy the benefits for a longer time.

As far as exam delivery is concerned, it is managed by Pearson VUE. The online and offline proctoring facilities are available. The standard fee for one attempt is \$300. The applicants have to pay this sum to buy an exam voucher. Note that this voucher is non-transferable and non-refundable.

Latest 300-620 Exam Dumps, Latest 300-620 Study Plan

So, do not ignore the significance of Cisco 300-620 practice exams. Take our Cisco 300-620 practice exams again and again till you are confident that you can nail the final 300-620 Certification test on the first chance. It is beneficial for our customers to download Cisco 300-620 dumps demo free of cost before buying.

Cisco 300-620 Exam is a valuable certification for IT professionals who are looking to enhance their career prospects in the data center networking field. The ACI technology is gaining traction in the industry, and there is a growing demand for skilled professionals who can implement and manage ACI environments. Implementing Cisco Application Centric Infrastructure certification demonstrates the candidate's expertise in ACI implementation and provides them with a competitive edge in the job market.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q195-Q200):

NEW QUESTION # 195

An engineer configures a Multi-Pod system with the default gateway residing outside of the ACI fabric for a bridge domain. Which setting should be configured to support this requirement?

- A. disable Advertise Host Routes
- B. disable Unicast Routing
- C. disable Limit IP Learning to Subnet
- D. disable IP Data-plane Learning

Answer: C

Explanation:

When configuring a Multi-Pod system with the default gateway residing outside of the ACI fabric for a bridge domain, the setting that should be configured is to disable Limit IP Learning to Subnet (Option A). This allows the ACI fabric to learn IP addresses outside of the defined subnet, which is necessary when the default gateway is external.

NEW QUESTION # 196

Refer to the exhibit. Server A is connected to the Cisco ACI fabric using two teamed interfaces.

One interface in a team is configured as active and the other remains in standby mode. When a failover occurs and the standby interface becomes active, it uses its built-in MAC address to send traffic. Which bridge domain configuration must be applied to resolve the issue?

- A. Configure Hardware proxy.
- B. Set L2 Unknown Unicast to Flood.

- C. Activate Limit IP Learning to Subnet.
- D. Enable ARP flooding.

Answer: A

NEW QUESTION # 197

An engineer must add a group of 70 bare-metal ESXi servers to the Cisco ACI fabric, which is integrated with vCenter. These configuration steps are complete:

The configured pool of ESXi hosts is configured with an Attachable Access Entity Profile (AAEP) called AEP_VMM.

The new group uses the AAEP called AEP_BAREMETAL.

Which action extends functional VMM integration to the new nodes?

- A. Create a new AAEP container object for policy groups for AEP_VMM.
- B. Update AAEP to AEP_VMM on all policy groups that are used toward bare-metal servers.
- C. Implement a separate VMM domain for the bare-metal servers by using AEP_VMM.
- D. Add the VMM domain under the AEP_BAREMETAL AAEP object.

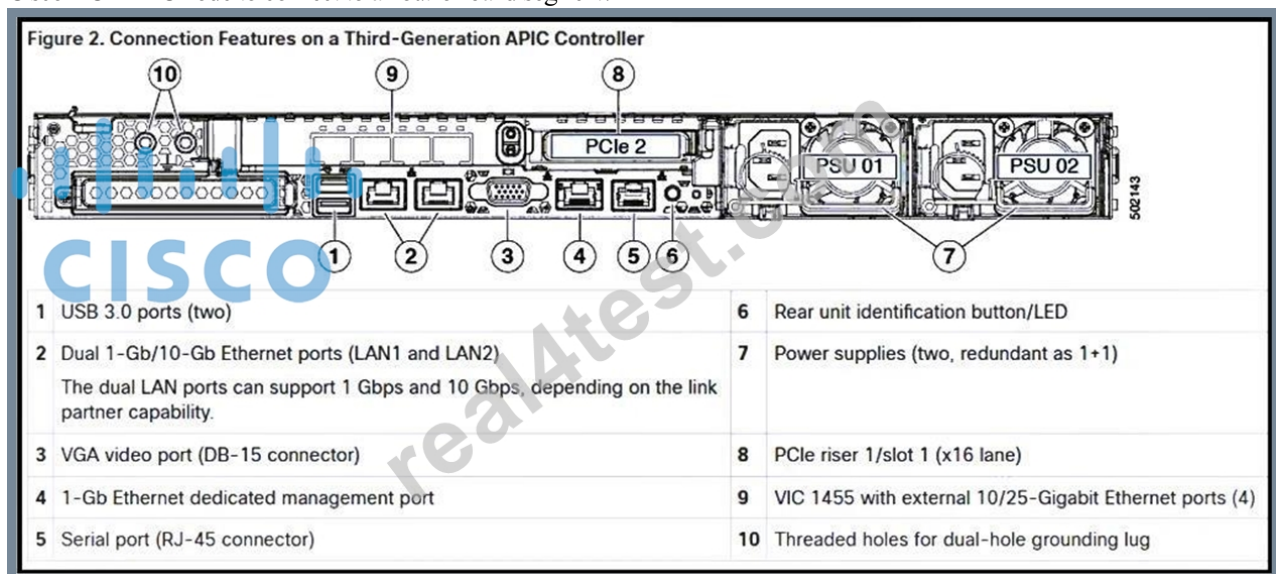

Answer: C

Explanation:

To extend functional VMM integration to the new group of 70 bare-metal ESXi servers, a separate VMM domain should be implemented using the AEP_VMM. This allows for the management and automation of network policies for the bare-metal servers in a manner similar to the virtualized environment managed by vCenter.

NEW QUESTION # 198

Refer to the exhibit. A network engineer deploys Cisco APIC for the first time. Which connectivity type must be used to connect a Cisco ACI APIC node to connect to an out-of-band segment?

<... output omitted ...>

Out-of-band management configuration ...

Enable IPv6 for Out of Band Mgmt Interface? [N]:

Enter the IPv4 address [192.168.10.1/24]: 172.23.142.29/21

Enter the IPv4 address of the default gateway [None]: 172.23.136.1

Enter the interface speed/duplex mode [auto]:

admin user configuration ...

Enable strong passwords? [Y]:

Enter the password for admin: C4SCO376AB984AA9

<... output omitted ...>

- A. 5. Serial port (RJ-45 connector)

- B. 2. Dual 1-Gb/10-Gb Ethernet ports (LAN1 and LAN2)
- C. 9. VIC 1455 with external 10/25-Gigabit Ethernet ports
- D. 4. 1-Gb Ethernet dedicated management port

Answer: D

Explanation:

You need OOB dedicated port and LAN connectivity to leaf Switches [Data plane]

NEW QUESTION # 199

A network engineer must allow secure access to the Cisco ACI out-of-band (OOB) management only from external subnets 10.0.0.0/24 and 192.168.20.0/25. Which configuration set accomplishes this goal?

- Ⓐ Create a L3Out in the MGMT tenant in OOB VRF.
Set External Management Network Instance Profile as a consumer of the OOB contract.
Create an External EPG with two subnet entries with the external subnets.
- Ⓑ Create a PBR service graph in the MGMT tenant.
Create a management Profile with the required OOB EPG.
Redirect all traffic going into ACI management to the external firewall.
Create two subnet entries under the OOB Bridge domain with the required subnets.
- Ⓒ Create an OOB contract that allows the required ports.
Provide the contract from the OOB EPG.
Consume the contract by the OOB External Management Network Instance Profile.
Create two subnet entries in the External Management Network Profile with the required subnets.
- Ⓓ Create an EPG and BD in the MGMT tenant in OOB VRF.
Set OOB VRF to provide the contract.
Set a new EPG to consume the OOB contract.

- A. Option A
- B. Option C
- C. Option D
- D. Option B

Answer: B
