Therefore, it can help users to feel in a real exam such as a real exam. This will improve your confidence and lessen stress to be able to pass the actual tests.

### CSI Canadian Securities Course Exam2 Sample Questions (Q162-Q167):

#### NEW QUESTION # 162

Which derivatives transaction has the greatest default risk?

- A. Individual investor buying shares on an exchange during the ex-rights period.
- B. Individual investor entering future contract with an institutional investor.
- **C. Interest rate forward agreement between an investment dealer and a corporation.**
- D. Exchange-traded equity option contract between an individual investor and a dealer.

**Answer: C**

Explanation:

An interest rate forward agreement (FRA) is an over-the-counter (OTC) derivative contract. Unlike exchange-traded derivatives, OTC contracts are not centrally cleared, meaning there is no intermediary to guarantee performance. This increases counterparty (default) risk, making FRAs inherently riskier than exchange-traded contracts.

- \* A. Individual investor buying shares on an exchange during the ex-rights period: This is a standard transaction involving equity securities, not derivatives, and carries no default risk.
- \* C. Exchange-traded equity option contract between an individual investor and a dealer: Exchange-traded derivatives are backed by a clearinghouse, which mitigates default risk.
- \* D. Individual investor entering a futures contract with an institutional investor: Futures contracts are also exchange-traded and centrally cleared, reducing default risk.

#### NEW QUESTION # 163

Tracy invests \$12,000 in a five-year PPN linked to the S&P/TSX 60, with a participation rate of 75% and a performance cap of 27%. On the issue date of the PPN, the index level was 825, and at the PPN's maturity, the level was 1,200. How much will Tracy receive upon the PPN's maturity?

- **A. \$15,240**
- B. \$16,091
- C. \$17,455
- D. \$14,813

**Answer: A**

**NEW QUESTION # 164**

Which investment account generally offers the least sophisticated products and has the lowest minimum requirement for investible assets?

- A. Non-model-based.
- B. Separately managed.
- C. Unified managed.
- D. **Robo-advisory.**

**Answer: D**

**NEW QUESTION # 165**

A shareholder receive rights from a company through direct ownership in shares. Not expecting to exercise them, she sells the right on the relevant exchange. What is her capital gain?

- A. The current share price less the exercise price of the rights.
- B. The sales price less the exercise price of the rights.
- C. **The sale price of the rights.**
- D. The current price of the shares less the sale price of the rights.

**Answer: C**

Explanation:

When a shareholder sells rights on the exchange, the proceeds of the sale represent the capital gain. Rights provide shareholders with the opportunity to purchase additional shares of a company at a discounted price. If a shareholder chooses not to exercise these rights and instead sells them on the secondary market, the value they receive from the sale constitutes their capital gain.

\* Rights Offering:

\* A rights offering allows existing shareholders to purchase additional shares at a set price (exercise price) within a specific period.  
\* Shareholders can either exercise these rights or sell them on the market.

\* Capital Gain Calculation:

\* The capital gain from selling the rights equals the sale price. This is because the rights themselves were issued at no cost to the shareholder.

\* The exercise price is irrelevant to the calculation as the rights were not exercised.

\* Tax Implications:

\* The gain from the sale of rights is treated as a capital gain for tax purposes. Only 50% of the capital gain is taxable under Canadian taxation rules.

\* Since the shareholder did not exercise the rights but sold them, the capital gain is the sale price of the rights. Subtracting the exercise price or using the share price is unnecessary and incorrect for this scenario.

Key Concepts: Why Option A Is Correct: References from CSC Study Materials:

\* Volume 2, Chapter 24: "Canadian Taxation," Section on Capital Gains and Losses.

**NEW QUESTION # 166**

What action must an investment advisor take when submitting a trade ticket for a short sale?

- A. Verify the client can borrow the shares.
- B. Obtain minimum margin amount from client
- C. **Mark the sell-order ticket as a short sale**
- D. Mark it as a margin order

**Answer: C**

Explanation:

When submitting a trade ticket for a short sale, an investment advisor must mark the sell-order ticket as a short sale. This ensures compliance with regulatory requirements and informs the broker and exchange that the sale involves borrowed shares. Marking the order appropriately helps maintain transparency and enables monitoring for potential market manipulation.

\* A. Verify the client can borrow the shares: The responsibility for ensuring share availability lies with the broker, not the advisor.

\* C. Obtain minimum margin amount from client: This is done separately as part of the account setup and transaction process, not when submitting the trade ticket.

\* D. Mark it as a margin order: Short sales involve margin, but the ticket must specifically indicate "short sale" rather than just "margin." Reference:CSC Volume 1, Chapter 9, "Short Selling - Trade Requirements" details the process and importance of marking short-sale tickets.

## NEW QUESTION # 167

In order to pass the CSI CSC2 Exam, selecting the appropriate training tools is very necessary. And the study materials of CSI CSC2 exam is a very important part.
