

1z0-071 Latest Examprep & Sample 1z0-071 Questions Answers

BONUS!!! Download part of Actual4Cert 1z0-071 dumps for free: <https://drive.google.com/open?id=1UuuawFds72lUI6HyNaXTwhgOPlnihalu>

The paper materials students buy on the market are often not able to reuse. After all the exercises have been done once, if you want to do it again you will need to buy it again. But with 1z0-071 test question, you will not have this problem. All customers who purchased 1z0-071 study tool can use the learning materials without restrictions, and there is no case of duplicate charges. For the PDF version of 1z0-071 test question, you can print multiple times, practice multiple times, and repeatedly reinforce your unfamiliar knowledge. For the online version, unlike other materials that limit one person online, 1z0-071 learning dumps does not limit the number of concurrent users and the number of online users. You can practice anytime, anywhere, practice repeatedly, practice with others, and even purchase together with others. 1z0-071 learning dumps make every effort to help you save money and effort, so that you can pass the exam with the least cost.

Preparing for the Oracle 1z1-071 certification exam requires a strong understanding of SQL concepts and principles. Candidates should have experience working with Oracle databases and be familiar with SQL syntax and commands. There are many resources available to help candidates prepare for the exam, including study guides, practice exams, and training courses.

Oracle 1z0-071 certification exam is ideal for IT professionals who are seeking to enhance their skills in SQL programming and Oracle database management. Oracle Database SQL certification is especially important for database administrators, developers, and data analysts who work with Oracle databases. 1z0-071 Exam is also useful for professionals who want to validate their skills in SQL programming and database management, and for those who want to advance their careers in the IT industry.

Oracle 1z0-071 certification exam tests the candidate's understanding of SQL language essentials, including data retrieval, data manipulation, and data control. Candidates are expected to have a strong foundation in SQL programming, including knowledge of SQL syntax, data types, and functions. They must also be proficient in creating and managing database objects such as tables, views, indexes, and constraints.

Sample 1z0-071 Questions Answers, Latest 1z0-071 Learning Material

First and foremost, you can get the latest version of our 1z0-071 study materials for free during the whole year. Second, our responsible after sale service staffs are available in twenty four hours a day, seven days a week, so if you have any problem after purchasing 1z0-071 study materials, you can contact our after sale service staffs anywhere at any time. Finally, we have installed the most advanced operation machines in our website, so you can use credit for payment in the process of trading and register your personal information under a safe payment environment. Do not waver any more, the most effective and the Latest 1z0-071 Study Materials is right here waiting for you.

Oracle Database SQL Sample Questions (Q269-Q274):

NEW QUESTION # 269

Evaluate the following CREATE TABLE command:

```
CREATE TABLE order_item
(order_id NUMBER (3),
item_id NUMBER (2),
qty NUMBER (4),
CONSTRAINT ord_itm_id_pk
PRIMARY KEY (order_id, item_id)
USING INDEX
(CREATE INDEX ord_itm_idx
ON order_item (order_id, item_id)));
```

Which statement is true regarding the above SQL statement?

- A. It would execute successfully and only ORD_ITM_IDX index would be created.
- B. It would execute successfully and two indexes ORD_ITM_IDX and ORD_ITM_ID PK would be created.
- C. It would give an error because the USING INDEX clause cannot be used on a composite primary.
- D. It would give an error because the USING INDEX is not permitted in the CREATE TABLE command.

Answer: A

NEW QUESTION # 270

View the exhibit and examine the ORDERStable.

ORDERS

Null? Type

Name

ORDER ID NOT NULL NUMBER(4)

ORDATE DATE DATE

CUSTOMER ID NUMBER(3)

ORDER TOTAL NUMBER(7,2)

The ORDERStable contains data and all orders have been assigned a customer ID. Which statement would add a NOTNULLconstraint to the CUSTOMER_IDcolumn?

- A. ALTER TABLE orders
MODIFY customer_id CONSTRAINT orders_cust_nn NOT NULL (customer_id);
- B. ALTER TABLE orders
ADD CONSTRAINT orders_cust_id_nn NOT NULL (customer_id);
- C. ALTER TABLE orders
MODIFY CONSTRAINT orders_cust_id_nn NOT NULL (customer_id);
- D. ALTER TABLE orders
ADD customer_id NUMBER(6)CONSTRAINT orders_cust_id_nn NOT NULL;

Answer: A

NEW QUESTION # 271

Examine the description of the PRODUCT_INFORMATION table:

Name	Null?	Type
PROD_ID	NOT NULL	NUMBER (2)
PROD_NAME		VARCHAR2 (10)
LIST PRICE		NUMBER (6, 2)

Which query retrieves the number of products with a null list price?

- A. SELECT COUNT (list_price) FROM product_information WHERE list_price IS NULL;
- B. SELECT COUNT (list_price) FROM product_information WHERE list_price = NULL;
- C. SELECT COUNT(NVL(list_price, 0)) FROM product_information WHERE list_price IS NULL;
- D. SELECT COUNT (DISTINCT list_price) FROM product_information WHERE list_price IS NULL;

Answer: C

NEW QUESTION # 272

Examine this statement:

```
SELECT last_name,salary
FROM employees
ORDER BY CASE WHEN salary =(SELECT max(salary) FROM employees ) THEN 'A'
           else last_name END, last_name DESC;
```

Which two statements are true?

- A. All remaining employee names will appear in an ascending order
- B. All remaining employee names will appear in descending order
- C. The names of employees maximum salary will appear first to descending order
- D. The names of employees maximum salary will appear first to ascending order
- E. All remaining employee names will appear in ascending order
- F. The names of employees remaining the maximum salary will appear first in an ascending order

Answer: C,E

NEW QUESTION # 273

Which two statements are true about single row functions?

- A. CONCAT: can be used to combine any number of values
- B. MOD: returns the quotient of a division operation
- C. TRUNC: can be used with NUMBER and DATE values
- D. CEIL: can be used for positive and negative numbers
- E. FLOOR: returns the smallest integer greater than or equal to a specified number

Answer: C,D

Explanation:

Regarding single row functions in Oracle Database 12c:

* C. CEIL: can be used for positive and negative numbers. This is true. The CEIL function rounds a number up to the nearest integer, and it works for both positive and negative values.

* D. TRUNC: can be used with NUMBER and DATE values. This is correct. The TRUNC function can truncate numbers or dates to a specified precision.

Options A, B, and E are incorrect:

* A is incorrect because CONCAT function typically concatenates two strings; to concatenate more, you must nest CONCAT calls or use the || operator.

* B is incorrect because FLOOR returns the largest integer less than or equal to the specified number, not greater.

* E is incorrect because MOD returns the remainder of a division operation, not the quotient.

NEW QUESTION # 274

.....

After the advent of the Actual4Cert's latest Oracle certification 1z0-071 exam practice questions and answers, passing Oracle certification 1z0-071 exam is no longer a dream of the IT staff. All of Actual4Cert's practice questions and answers about Oracle Certification 1z0-071 Exam have high quality and 95% similarity with the real exam questions. Actual4Cert is worthful to choose. If you choose Actual4Cert's products, you will be well prepared for Oracle certification 1z0-071 exam and then successfully pass the exam.
