SC-100 Dumps Vce, Reliable SC-100 Test Sims

BONUS!!! Download part of Exam4Tests SC-100 dumps for free: https://drive.google.com/open?id=1S9OgkRYE5rhTSRC5B3Rbf3FL4z09ycX7

The online version of our SC-100 exam questions is convenient for you if you are busy at work and traffic. Wherever you are, as long as you have an access to the internet, a smart phone or an I-pad can become your study tool for the SC-100 exam. This version can also provide you with exam simulation. And the good point is that you don't need to install any software or app. All you need is to click the link of the online SC-100 Training Material once, and then you can learn and practice offline.

Microsoft SC-100 Exam Syllabus Topics:

Section	Weight	Objectives
Design security solutions for applications and data (20-25%)	22.5%	- Design security for applications • 1. Design a strategy for application security testing • 2. Design a strategy for securing third-party and open-source dependencies • 3. Evaluate and design a secure application development lifecycle - Design security for data • 1. Design a data classification and protection strategy • 2. Design a strategy for securing data in transit, at rest, and in use • 3. Design a data retention and deletion strategy
Design security operations, identity, and compliance capabilities (30-35%)	32.5%	- Evaluate regulatory compliance • 1. Design infrastructure that complies with security and compliance requirements • 2. Interpret compliance requirements and their technical capabilities - Design a security operations strategy • 1. Design a threat detection strategy • 2. Design a logging and auditing strategy • 3. Design a response strategy - Design an identity security strategy • 1. Design an authorization strategy • 2. Design a user and administrator identity strategy • 3. Design an authentication strategy • 4. Design a workload identity strategy

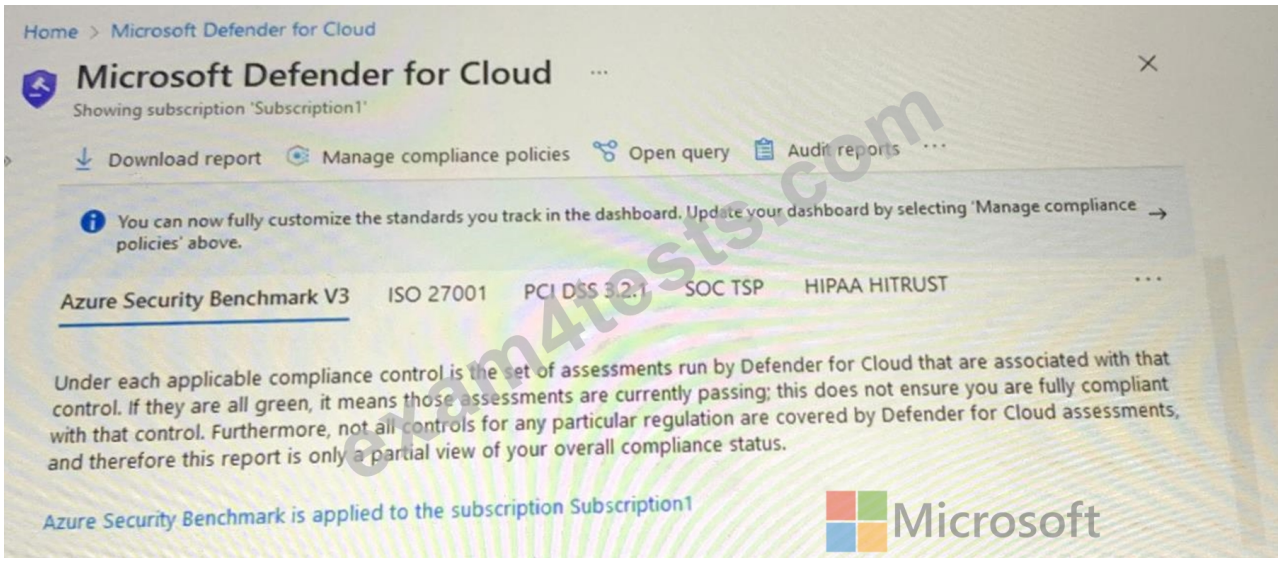
Design solutions that align with security best practices and priorities (20-25%)	22.5%	- Evaluate security operations • 1. Evaluate security posture using Microsoft Intune • 2. Evaluate security posture using Microsoft Defender for Cloud • 3. Evaluate security posture using Microsoft Sentinel • 4. Evaluate security posture using Microsoft 365 Defender - Design a Zero Trust strategy and architecture • 1. Evaluate and design a infrastructure strategy • 2. Evaluate and design a application strategy • 3. Evaluate and design an identity strategy • 4. Evaluate and design a data strategy • 5. Evaluate and design a network strategy
Design security solutions for infrastructure (20-25%)	22.5%	- Design security for server and client endpoints • 1. Specify security baselines for server and client endpoints • 2. Specify security for mobile devices and clients • 3. Specify security for Linux and Windows servers - Design security for containers • 1. Evaluate and design security for containerized workloads • 2. Evaluate and design security for container orchestration - Design security for SaaS, PaaS, and IaaS services • 1. Design security for Azure Kubernetes Service • 2. Design security for Azure storage, SQL, and Cosmos DB • 3. Evaluate security baselines for SaaS, PaaS, and IaaS

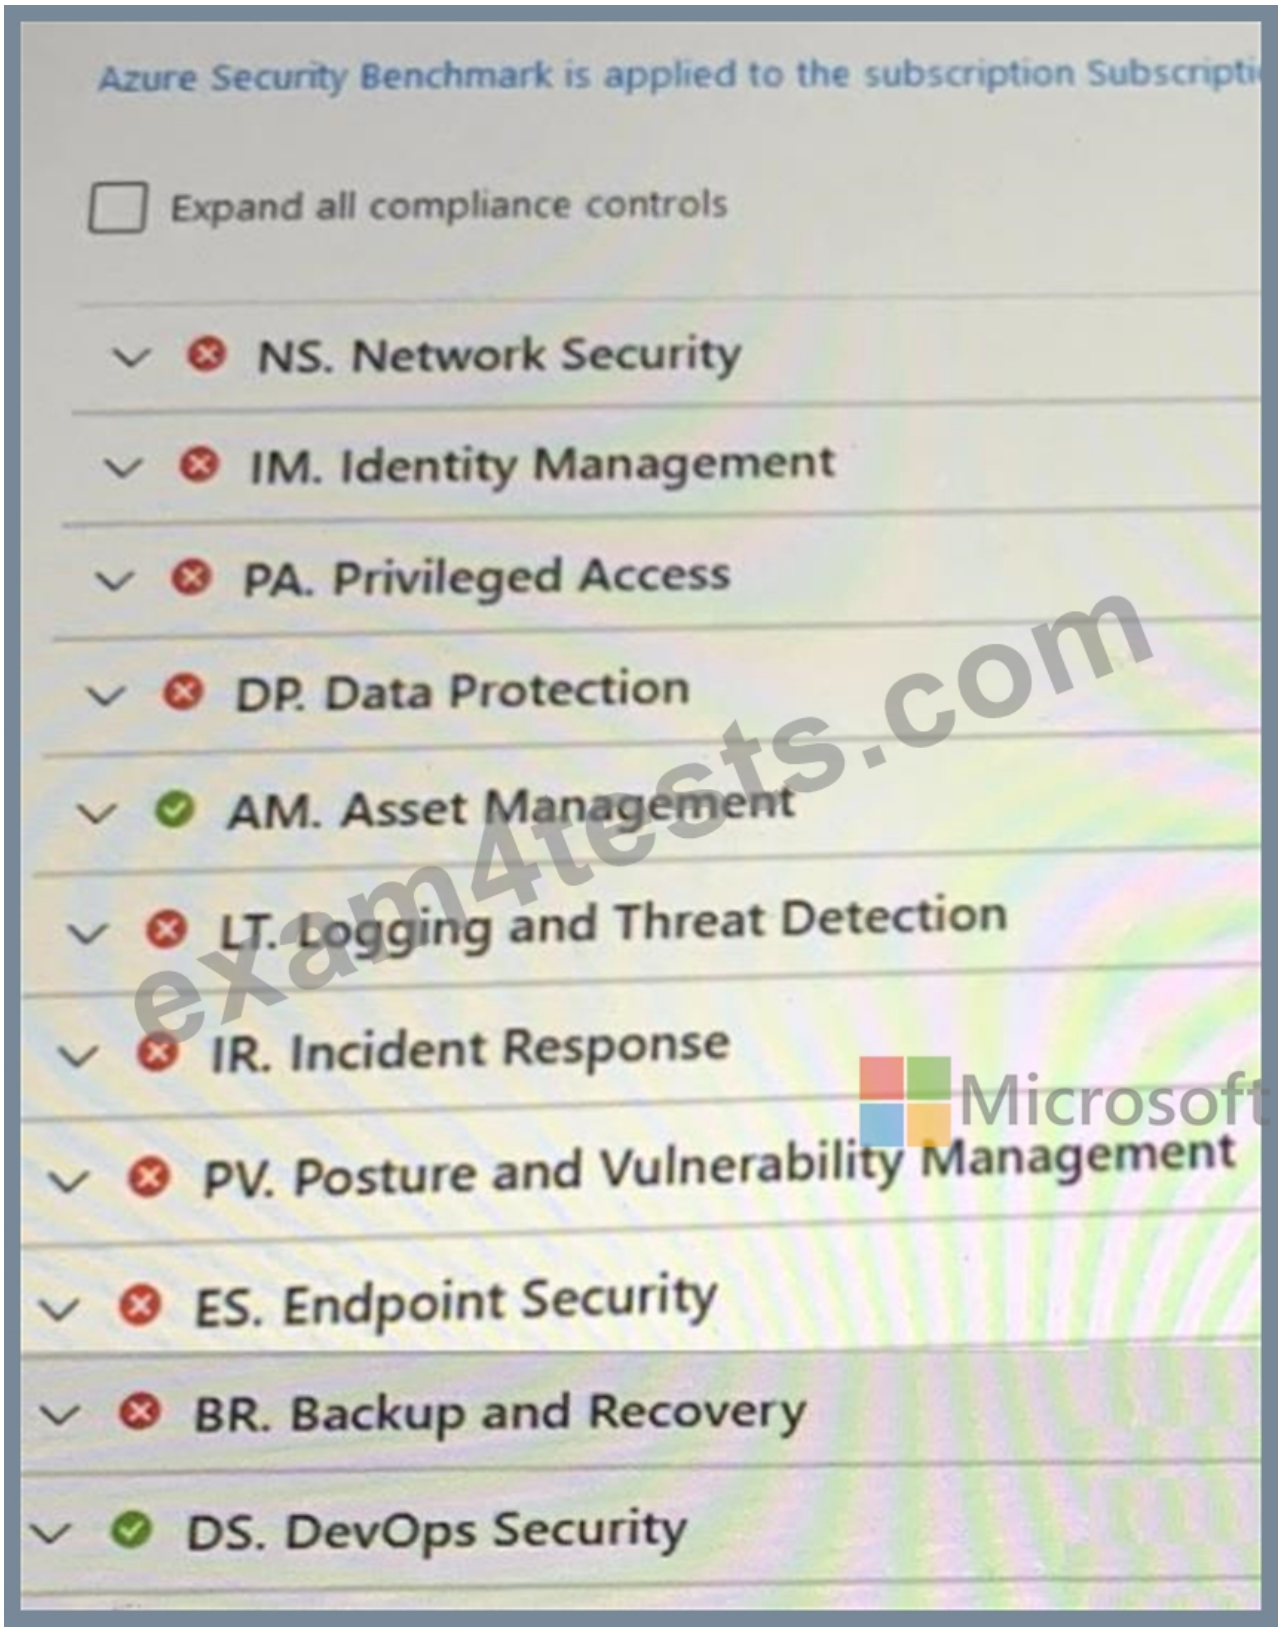
100% Pass 2026 Marvelous Microsoft SC-100: Microsoft Cybersecurity Architect Dumps Vce

Exam4Tests offers highly designed Microsoft SC-100 exam questions and online SC-100 practice test engine to help you successfully clear the Microsoft exam. Their study materials cover all the basic to advanced required SC-100 Exam Questions material that you need to know to pass the SC-100 Exam. These two simple, easy, and accessible learning formats will boost your confidence.

Microsoft Cybersecurity Architect Sample Questions (Q209-Q214):

NEW QUESTION # 209
You have an Azure subscription that has Microsoft Defender for Cloud enabled.
You are evaluating the Azure Security Benchmark V3 report as shown in the following exhibit.





You need to verify whether Microsoft Defender for servers is installed on all the virtual machines that run Windows. Which compliance control should you evaluate?

- A. Asset Management
- B. Incident Response
- C. Endpoint Security
- D. Data Protection
- E. Posture and Vulnerability Management

Answer: C

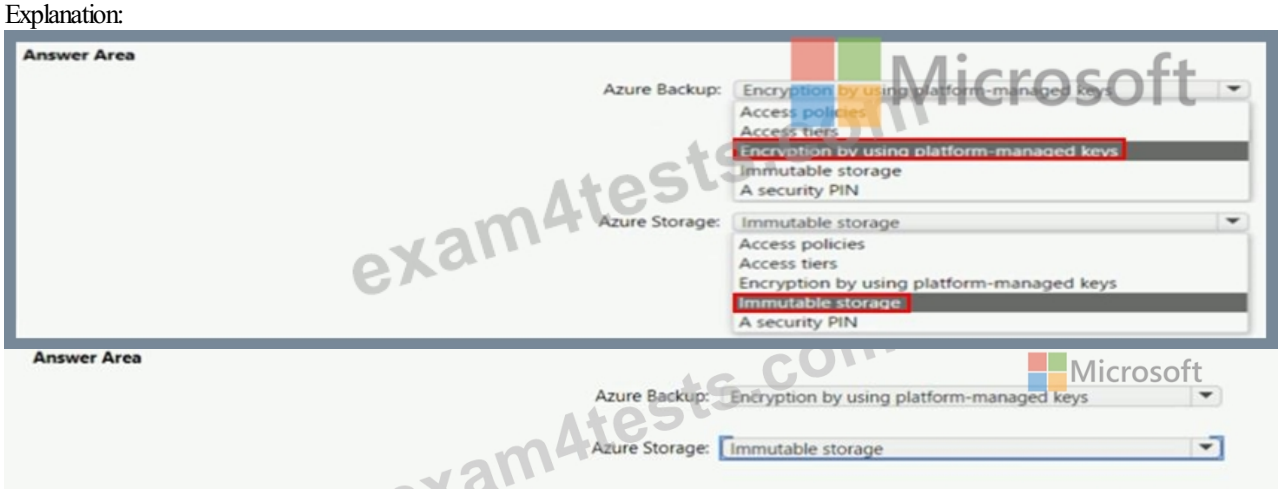
Explanation:
https://docs.microsoft.com/en-us/security/benchmark/azure/security-controls-v3-endpoint-security
Topic 1, Litware, inc.
Overview
Litware, inc. is a financial services company that has main offices in New York and San Francisco. litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.
Litware has grown significantly during the last two years due to mergers and acquisitions. The acquisitions include several companies based in France.
Existing Environment
Litware has an Azure Active Directory (Azure AD) tenant that syncs with an Active Directory Domain Services (AD D%) forest named Utvvare.com and is linked to 20 Azure subscriptions. Azure AD Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses. The environment also includes several AD DS forests, Azure AD tenants, and hundreds of Azure subscriptions that belong to the subsidiaries of Litware.
Planned Changes
Litware plans to implement the following changes:
* Create a management group hierarchy for each Azure AD tenant.
* Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.
* Implement Azure AD Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.
Business Requirements
Litware identifies the following business requirements:
* Minimize any additional on-premises infrastructure.
* Minimize the operational costs associated with administrative overhead.
Hybrid Requirements
Litware identifies the following hybrid cloud requirements:
* Enable the management of on-premises resources from Azure, including the following:
* Use Azure Policy for enforcement and compliance evaluation.
* Provide change tracking and asset inventory.
* Implement patch management.
* Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.
Microsoft Sentinel Requirements
Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAK) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOQ by using Microsoft Sentinel.
Identity Requirements
Litware identifies the following identity requirements:
* Detect brute force attacks that directly target AD DS user accounts.
* Implement leaked credential detection in the Azure AD tenant of Litware.
* Prevent AD DS user accounts from being locked out by brute force attacks that target Azure AD user accounts.
* Implement delegated management of users and groups in the Azure AD tenant of Litware, including support for.
* The management of group properties, membership, and licensing The management of user properties, passwords, and licensing
* The delegation of user management based on business units.
Regulatory Compliance Requirements
Litware identifies the following regulatory compliance requirements:
* insure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
* Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
* Use the principle of least privilege.
Azure Landing Zone Requirements
Litware identifies the following landing zone requirements:
* Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
* Provide a secure score scoped to the landing zone.
* Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
* Minimize the possibility of data exfiltration.
* Maximize network bandwidth.
The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity. Each landing zone will have the following characteristics:
* Be created in a dedicated subscription.
* Use a DNS namespace of litware.com.

Application Security Requirements
Litware identifies the following application security requirements:
* Identify internal applications that will support single sign-on (SSO) by using Azure AD Application Proxy.
* Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

NEW QUESTION # 210
Your company wants to optimize using Azure to protect its resources from ransomware.
You need to recommend which capabilities of Azure Backup and Azure Storage provide the strongest protection against ransomware attacks. The solution must follow Microsoft Security Best Practices.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:



NEW QUESTION # 211
You are creating an application lifecycle management process based on the Microsoft Security Development Lifecycle (SDL).
You need to recommend a security standard for onboarding applications to Azure. The standard will include recommendations for application design, development, and deployment What should you include during the application design phase?

- A. software decomposition by using Microsoft Visual Studio Enterprise
- B. dynamic application security testing (DAST) by using Veracode
- C. static application security testing (SAST) by using SonarQube
- D. threat modeling by using the Microsoft Threat Modeling Tool

Answer: A

NEW QUESTION # 212
You are a security architect in an organization. The chief compliance officer has tasked you to ensure that all new Azure core services are HIPAA compliant.
What operation compliance Azure solution can you use to automate the deployment compliance for Azure core services?

- A. Azure Policy
- B. Azure Blueprints
- C. Desired State Configuration
- D. Azure Automation Update Management

Answer: B

Explanation:
Option A is incorrect because Azure Policy assesses resources in Azure by evaluating the properties of those resources to business policies; these business rules are known as policy definitions.
Option B is correct because the Azure blueprint is correct, as you can use the Azure blueprint to automate deployment to the desired regulatory target.
Option C is Incorrect because Desired State Configuration is used to automate Linux and Windows operating systems configurations.
Option D Incorrect is incorrect because Azure Automation Update Management is used for patch management.

NEW QUESTION # 213
Your company is moving a big data solution to Azure.
The company plans to use the following storage workloads:
* Azure Storage blob containers
* Azure Data Lake Storage Gen2
* Azure Storage file shares
* Azure Disk Storage
Which two storage workloads support authentication by using Azure Active Directory (Azure AD)?
Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Azure Storage blob containers
- B. Azure Data Lake Storage Gen2
- C. Azure Disk Storage
- D. Azure Storage file shares

Answer: A,B

NEW QUESTION # 214
.....

If you want to buy our SC-100 study guide in a preferential price, that's completely possible. In order to give back to the society, our company will prepare a number of coupons on our official website. Once you enter into our websites, the coupons will be very conspicuous. Remember to write down your accounts and click the coupon. When you pay for our SC-100 Training Material, the coupon will save you lots of money. The number of our free coupon is limited. So you should click our website frequently. What's more, our coupon has an expiry date. You must use it before the deadline day. What are you waiting for? Come to buy our SC-100 practice test in a cheap price.
