**WGU C190 Intro to Biology Module 1 practice test questions & Answers Recent Update 2023 Verified Answers Download to Pass**

1. Population - ✓✓✓ All the individuals of the same species that occupy the same area and are likely to breed with one another.

2. Organ - ✓✓✓ A collection of tissues grouped together based on a common general function. Some common \_\_\_\_\_ in the human body are the heart, lungs, and kidneys.

3. Ecosystem - ✓✓✓ All the living (biotic) things in a particular area together with the abiotic (nonliving) materials and conditions in that area; i.e., a biological community and its physical environment.

4. Cell - ✓✓✓ The smallest fundamental unit of structure and function in life. Fluid-filled spaces bound by a membrane. When first formed, include DNA and other macromolecules and are organized to grow, reproduce, and respond to changes in the external environment.

5. Biology - ✓✓✓ The scientific study of life. Including anatomy, biochemistry, ecology, evolution, genetics, immunology, and physiology.

6. Biotic - ✓✓✓ An adjective that describes living organisms or their remains. Common characteristics are that they use energy and raw materials to grow, sense, and respond to changing environments; they reproduce; and they consist of one or more cells.

7. Abiotic - ✓✓✓ An adjective that describes nonliving materials in the environment, such as sunlight, rain, gases in the air, rocks, and chemicals in the soil.

8. Atom - ✓✓✓ The basic unit of matter that cannot be further broken down without losing its unique properties. Consists of a dense nucleus surrounded by a cloud of electrons.

9. Biome - ✓✓✓ A large naturally occurring community of plants and animals occupying a major habitat. Examples include tropical forest and arctic tundra.

10. Biosphere - ✓✓✓ All areas on, within, and around the planet Earth that are capable of supporting life.

11. Community - ✓✓✓ All of the populations interacting with each other within a specified area.
