

Relevant H19-301_V4.0 Questions, H19-301_V4.0 Test Dumps Pdf

[Pass Huawei H19-301_V4.0 Exam | Latest H19-301_V4.0 Dumps & Practice Exams - Cert007](#)

1.VXLAN uses MAC-in-UDP encapsulation to extend Layer 2 networks. It encapsulates Ethernet frames into IP packets for routing, without considering the MAC addresses of VMs. In addition, routed networks are not limited by the network architecture and support large-scale scalability. VM migration through routed networks is also not limited by the network architecture.

- A. True
- B. False

Answer: A

2.The free mobility solution allows a user on a campus network to obtain the same network access policy regardless of the user's location and IP address. When configuring a policy, the administrator does not need to pay attention to the IP address ranges of different users, but only needs to focus on the logical access relationships between users and servers.

- A. True
- B. False

Answer: A

3.What are the characteristics of Segment Routing?

- A. Its deployment is dependent on the controller.
- B. It introduces the source routing mechanism conforming to SDN.
- C. Its deployment is dependent on LDP and RSVP.
- D. It reduces the number of protocols and extends IGP/BGP to support label distribution without depending on LDP or RSVP.

Answer: B,D

4.If only one firewall is deployed at the egress of the network, a failure on the firewall will affect services on the entire network. To improve network reliability, you can deploy two or more firewalls and set up a stack system. Member firewalls do not need to be managed independently. You only need to configure the stack system.

- A. True
- B. False

Answer: A

5.Which of the following statements are true about the underlay and overlay concepts on a data center network? (Select all that apply)

- A. After implementing overlay technology, there is no need to deploy routing protocols or static routes on the underlay network.
- B. An underlay network is a bearer network consisting of various physical devices, such as switches and VAS devices.
- C. Overlay technology is a tunneling method that encapsulates service packets and transmits them transparently over the underlay network, with the origin recovered after reaching their destination.
- D. Overlay is a software-defined logical network built on the underlay network using VXLAN.

Answer: B,C,D

6.The campus WAN interconnection solution is a sub-solution provided in the Cloud Campus Solution for

We assure you that we are focused on providing you with guidance about our H19-301_V4.0 exam question, but all services are free. If you encounter installation problems, we will have professionals to provide you with remote assistance. Of course, we will humbly accept your opinions on our H19-301_V4.0 Quiz guide. If you have good suggestions to make better use of our H19-301_V4.0 test prep, we will accept your proposal and make improvements. Each of your progress is our driving force. We sincerely serve for you any time.

You will face plenty of options in your whole lives. Sometimes, you must decisively abandon some trivial things, and then you can harvest happiness and fortunes. Now, our H19-301_V4.0 guide materials just need to cost you less spare time, then you will acquire useful skills which may help you solve a lot of the difficulties in your job. Besides, our H19-301_V4.0 Exam Questions will help you pass the exam and get the certification for sure.

Huawei H19-301_V4.0 Test Dumps Pdf | H19-301_V4.0 Braindump Free

Currently more and more IT companies think highly of Huawei certifications, IT workers are willing to clear exams (H19-301_V4.0

valid practice exam online) and get certifications in order to improve their competitive power and obtain better opportunities. If you are ready to prepare for test questions and answers by PDF file or soft test engine in order to master better knowledge and skills, H19-301_V4.0 valid practice exam online will be a nice choice.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q89-Q94):

NEW QUESTION # 89

Huawei NetEngine AR651EW is Huawei's first Wi-Fi 6-capable router.

- A. True
- B. False

Answer: A

Explanation:

The Huawei NetEngine AR651EW is a compact, all-in-one enterprise branch router that integrates:

LTE uplink

Wi-Fi 6 capability (802.11ax)

SD-WAN access

Security functions such as IPS and firewall

It is indeed Huawei's first edge router with built-in Wi-Fi 6 functionality, targeting small and medium-sized enterprise branches that require wireless access and SD-WAN features in a single device.

Huawei AR651EW Datasheet and Product Introduction

#####

NEW QUESTION # 90

Huawei's HiSec Endpoint can defend against ransomware attacks around the clock, ensuring zero data loss on endpoints.

- A. True
- B. False

Answer: A

Explanation:

Huawei's HiSec Endpoint is an endpoint detection and response (EDR) solution that:

Provides 24/7 active protection against ransomware using behavior-based detection, AI algorithms, and rollback mechanisms.

Integrates anti-ransomware engines to detect encryption behaviors in real time.

Ensures zero data loss via file protection, backup, and instant recovery.

It is widely deployed in sectors where data security on endpoints is critical, including finance, government, and healthcare.

NEW QUESTION # 91

The energy industry is one of the key industries that Huawei's WAN solution focuses on. Which of the following is not a highlight of Huawei's WAN solution for electric power?

- A. 10G FlexE, industry-leading low delay
- B. MACsec encryption
- C. SDN-based automatic OSM
 - Jitter < 10 us
- D. SRv6-based intelligent traffic steering: intelligent traffic steering based on delay and bandwidth

Answer: B

Explanation:

Huawei's WAN solution for the energy/electric power industry focuses on ultra-low latency, high security, and intelligent O&M, with highlights including:

A: SRv6-based intelligent traffic steering

C: 10G FlexE, which ensures industry-leading low delay

D: SDN-based automatic O&M, enabling minute-level service provisioning and jitter control (e.g., <10 #sjitter) MACsec encryption (B) is not listed as a specific highlight of the WAN solution for electric power, though it may be used in security-focused sectors.

Instead, Huawei promotes IPsec and deterministic IP technologies for power industry WANs.

NEW QUESTION # 92

The depth of Huawei's NetEngine 8000 M14 and NetEngine 8000 M8 routers is 220 mm.

- A. True
- B. False

Answer: B

Explanation:

The NetEngine 8000 M14 and M8 are modular high-performance WAN routers. Their depth is significantly more than 220 mm. For example:

NetEngine 8000 M8: Approx. 600 mm depth

NetEngine 8000 M14: Larger chassis - deeper than 600 mm

A depth of 220 mm would be typical of very compact devices (e.g., small access routers), not these high-capacity modular systems.

NEW QUESTION # 93

Huawei's high-quality 10 Gbps campus network is experience-centric, providing high-quality network services for various industries based on three types of experience upgrade.

- A. True
- B. False

Answer: A

Explanation:

Huawei's 10 Gbps campus network solution is described as "experience-centric," aiming to:

Improve wireless performance with Wi-Fi 7 and interference mitigation (Wireless experience).

Enable AI-driven operations and centralized visualization (O&M experience).

Ensure deterministic application delivery via traffic identification and smart QoS (Application experience).

This triad forms the core of Huawei's experience-based networking model for education, healthcare, finance, and enterprise sectors.
