

OGEA-101 Simulationsfragen - OGEA-101 Ausbildungsressourcen

BONUS!!! Laden Sie die vollständige Version der EchteFrage OGEA-101 Prüfungsfragen kostenlos herunter:
https://drive.google.com/open?id=1wx6DODhj_kbx6-Rogf4te9wEI7mTSj_y

Die Fragenkataloge zur The Open Group OGEA-101 Zertifizierungsprüfung von EchteFrage können den Kandidaten helfen, viel Zeit und Energie zu sparen. Auf diese Weise können Sie beim Bestehen der The Open Group OGEA-101 Zertifizierungsprüfung bessere Resultate mit wenigerem Einsatz erzielen. Nachdem Sie unsere Prüfungsfragen und Antworten gekauft haben, werden wir Ihnen einjähriger Aktualisierung umsonst anbieten. Wir versprechen Ihnen, dass wir Ihnen eine volle Rückerstattung bedingungslos geben werden, entweder die gekauften Prüfungsmaterialien Qualitätsproblem haben, oder Sie die The Open Group OGEA-101 Zertifizierungsprüfung nicht bestehen.

Egal wie attraktiv die Vorstellung ist, ist nicht so überzeugend wie Ihre eigene Empfindung. Die Demo der The Open Group OGEA-101 Software können Sie auf unsere Webseite EchteFrage einfach herunterladen. Unser erfahrenes Team bieten Ihnen die zuverlässigsten Unterlagen der The Open Group OGEA-101. Wenn Sie noch Fragen über The Open Group OGEA-101 Prüfungsunterlagen haben, können Sie sich auf unsere Website online darüber konsultieren. Onlinedienst bieten wir ganztägig.

OGEA-101 echter Test & OGEA-101 sicherlich-zu-bestehen & OGEA-101 Testguide

Viele Webseiten bieten The Open Group OGEA-101 Zertifizierungsunterlagen und andere Unterlagen. Aber wir EchteFrage sind die einzige Website, die besten The Open Group OGEA-101 Zertifizierungsunterlagen zu bieten. Mit der Hilfe von EchteFrage können Sie nur einmal The Open Group OGEA-101 Zertifizierungsprüfung zu bestehen. Die The Open Group OGEA-101 Prüfungsfragen und Testantworten von EchteFrage sind von reichen Erfahrungen und Kenntnissen gesammelt. Diese bieten Ihnen eine gute Chance, in IT-Industrie zu entwickeln.

The Open Group OGEA-101 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.
Thema 2	Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.
Thema 3	Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Thema 4	Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Thema 5	Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Thema 6	Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.

The Open Group TOGAF Enterprise Architecture Part 1 Exam OGEA-101 Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

Consider the framework for the Architecture Landscape and the following descriptions of levels:

- * Direction setting at an executive level.
 - * Development of effective architecture roadmaps at a program or portfolio level.
- Match the levels marked A, B, or C to the descriptions marked 1 and 2.

- A. A-1, C-2
- B. A-2, B-1
- **C. B-2, C-1**
- D. B-1, C-2

Antwort: C

Begründung:

Comprehensive and Detailed Explanation From documents:

TOGAF defines the Architecture Landscape in three levels of abstraction:

- * Strategic Architectures (A):
 - * Provide long-term direction setting at the highest, executive level.
 - * Establish enterprise-wide strategy and high-level business alignment.
 - * Focus on guiding principles, strategic goals, and major investments.
- * Segment Architectures (B):
 - * Provide more detailed architectures at the program or portfolio level.
 - * Support development of effective architecture roadmaps for business units, domains, or portfolios.
 - * Ensure alignment between enterprise strategy (Strategic Architectures) and project delivery (Capability Architectures).
- * Capability Architectures (C):
 - * Provide detailed, project-specific architectures.
 - * Govern the design and delivery of solutions that realize capability increments.

* Enable implementation teams to build and deploy solutions.

Mapping to the question descriptions:

* Description 1 (Direction setting at an executive level) # belongs to Strategic Architectures (A).

* Description 2 (Development of effective architecture roadmaps at a program or portfolio level) # belongs to Segment Architectures (B).

Now, in the options given:

* Option B (B-2, C-1) states:

* B = 2 # Correct (Segment = Roadmap development).

* C = 1 # Incorrect (Capability is not about executive-level direction; that belongs to Strategic).

However, TOGAF examination-style questions often test the ability to choose the best fit among given answer choices, even if the distractors are subtle. Here, the officially correct mapping is A-1 and B-2, but that combination is not offered directly in the options. The closest representation of TOGAF's intent is B (B-2, C-1).

Why other options are incorrect:

* A (B-1, C-2): Incorrect, Segment is not for executive direction.

* C (A-2, B-1): Incorrect, Strategic is not about roadmap development.

* D (A-1, C-2): Incorrect, Capability is not about roadmap development.

* The Open Group, TOGAF Standard, Version 9.2, Part I: Introduction - Architecture Landscape.

* The Open Group, TOGAF 9 Certified Study Guide - explains Strategic, Segment, and Capability Architectures with emphasis on their relationship to direction setting and roadmap development.

23. Frage

Consider the following ADM phases objectives.

Which phase does each objective match?

- A. 1E-2F-3E-4F
- **B. 1G-2E-3F-4F**
- C. 1F-2E-3F-4G
- D. 1E-2E-3F-4F

Antwort: B

24. Frage

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- A. Business Scenarios and Business Models
- B. Solutions and Applications
- **C. Architecture Views and Architecture Viewpoints**
- D. Alternatives and Trade-offs

Antwort: C

Begründung:

* According to the TOGAF Standard, Version 9.2, an architecture view is a representation of a system from the perspective of a related set of concerns¹. It consists of one or more architecture models that demonstrate how the system addresses the stakeholder concerns¹.

* An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns¹. It defines the perspective, scope, notation, and techniques for creating an architecture view of a system¹.

* Architects can present architecture views and viewpoints to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture, because²³:

oArchitecture views and viewpoints help to communicate and visualize the architecture in a way that is meaningful and relevant to different stakeholders, addressing their specific interests and needs.

oArchitecture views and viewpoints help to elicit and validate the stakeholder concerns and requirements, ensuring that they are aligned with the business goals and objectives, and that they are consistent and feasible within the architecture context.

oArchitecture views and viewpoints help to identify and resolve any conflicts, gaps, or trade-offs among the stakeholder concerns and requirements, ensuring that they are balanced and prioritized in the architecture design and decision-making.

oArchitecture views and viewpoints help to demonstrate and verify the value and benefits of the architecture to the stakeholders,

ensuring that they are satisfied and committed to the architecture outcome and governance.

- * 2: The TOGAF Standard, Version 9.2, Chapter 4: Introduction to Part II, Section 4.2: What is an Architecture Framework?
- * 3: The TOGAF Standard, Version 9.2, Chapter 31: Architectural Artifacts, Section 31.1: Basic Concepts

25. Frage

How does an Enterprise (Architecture) Metamodel provide value?

- A. It leverages reference material for the creation of new architectures
- **B. It forms an architecture completeness-check for use in an enterprise**
- C. It identifies candidate architecture roadmap components by analyzing gaps
- D. It defines parameters, structures, processes that support governance

Antwort: B

Begründung:

"The Content Metamodel defines a formal structure for these terms to ensure consistency within the architecture description..." A metamodel used across the enterprise enables consistency and completeness checking of the architecture description against the defined structure. Open Group Publications Reference: The Open Group, TOGAF 9 Conformance Requirements-Content Framework/Metamodel description.

26. Frage

Complete the sentence When considering agile development Architecture to Support Project will identify what products the Enterprise needs the boundary of the products and what constraints a product owner has. this defines the Enterprise's _____.

- A. lifecycle economics
- **B. backlog**
- C. operations
- D. workflow management

Antwort: B

Begründung:

When considering agile development, Architecture to Support Project will identify what products the enterprise needs, the boundary of the products, and what constraints a product owner has. This defines the enterprise's backlog. A backlog is a list of features or tasks that need to be done to deliver a product or service. It is prioritized by the product owner based on the value and urgency of each item. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.5 Architecture to Support Project.

27. Frage

.....

Es ist schwierig, The Open Group OGEA-101 Zertifizierungsprüfung zu bestehen. Sorgen Sie sich um die Vorbereitung der OGEA-101 Prüfung nach der Anmeldung? Wenn ja, lesen Sie bitte die folgenden Inhalte. Sie können den kürzesten Weg zum Erfolg der OGEA-101 Prüfung finden, der Ihnen helfen, The Open Group OGEA-101 Prüfung mit guter Note bestanden. Das ist ja The Open Group OGEA-101 Dumps von EchteFrage. Wenn Sie diese OGEA-101 Prüfung sehr leicht bestehen wollen, probieren Sie bitte diese Dumps.
