

Salesforce-MuleSoft-Developer-I Exam Braindumps & Salesforce-MuleSoft-Developer-I Free Sample

P.S. Free 2026 Salesforce Salesforce-MuleSoft-Developer-I dumps are available on Google Drive shared by ExamcollectionPass: <https://drive.google.com/open?id=1HSzaON8kKnjhb6rACKPaEple3ViAO2zj>

By virtue of our Salesforce-MuleSoft-Developer-I practice materials, many customers get comfortable experiences of Whole Package of Services and of course passing the Salesforce-MuleSoft-Developer-I study guide successfully. Our company conducts our business very well rather than unprincipled company which just cuts and pastes content from others and sell them to exam candidates. All candidate are desperately eager for useful Salesforce-MuleSoft-Developer-I Actual Exam, our products help you and we are having an acute shortage of efficient Salesforce-MuleSoft-Developer-I exam questions.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.
Topic 2	Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 3	Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 4	Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.
Topic 5	Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 6	Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Topic 7	Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.

TOP Salesforce-MuleSoft-Developer-I Exam Braindumps - Trustable Salesforce Certified MuleSoft Developer (Mule-Dev-201) - Salesforce-MuleSoft-Developer-I Free Sample

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the Salesforce-MuleSoft-Developer-I practice exam. Our Salesforce-MuleSoft-Developer-I exam dumps are indispensable tool to pass it with high quality and low price. By focusing on how to help you effectively, we encourage exam candidates to buy our Salesforce-MuleSoft-Developer-I practice test with high passing rate up to 98 to 100 percent all these years. Our Salesforce exam dumps almost cover everything you need to know about the exam. As long as you practice our Salesforce-MuleSoft-Developer-I Test Question, you can pass exam quickly and successfully. By using them, you can not only save your time and money, but also pass Salesforce-MuleSoft-Developer-I practice exam without any stress.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q60-Q65):

NEW QUESTION # 60

A flow needs to combine and return data from two different data sources. It contains a Database SELECT operation followed by an HTTP Request operation.

What is the method to capture both payloads so the payload from the second request does not overwrite that from the first?

- A. Put the Database SELECT operation inside a Message Enricher scope
- B. Nothing, previous payloads are combined into the next payload
- C. Put the Database SELECT operation inside a Cache scope
- **D. Save the payload from the Database SELECT operation to a variable**

Answer: D

Explanation:

Correct answer is Save the payload from the Database SELECT operation to a variable Response from HTTP request will override the payload and hence response of database SELECT can be lost. Best way to preserve is to assign payload of first operation to variable using TransformMessage.

NEW QUESTION # 61

How to import Core (dw::Core) module into your DataWeave scripts?

- A. #include dw::core
- B. import core
- **C. Not needed**
- D. import dw::core

Answer: C

Explanation:

Correct answer is Not needed as dw::core module is included by default. We don't need to include it explicitly

NEW QUESTION # 62

Refer to the exhibits The Mule application does NOT define any global error handlers.

A web client sends a POST request to the Mule application with this input payload The File Write operation throws a FILECONNECTIVITY error What response message is returned to the web client?

Ⓜ

- A. "File written"
- B. "OTHER ERROR"

- C. "ORDER NOT_CREATED"
- D. "FILECONNECTIVITY"

Answer: C

NEW QUESTION # 63

Refer to the exhibits.

What is valid text to set the field in the Database connector configuration to the username value specified in the config.yaml file?

- A. \${db.username}>
- B. #[db.username]
- C. #[db.username]
- D. \${db.username}>

Answer: A

Explanation:

option 3 is the correct syntz to access application properties

NEW QUESTION # 64

Refer to the exhibit.

What should be changed to fix the 415 error?

- A. set theresponse Content-Type header to application/json
- B. set the request Content-Type header to text/plain
- C. set the response Content-Type header to text/plain
- D. Set the request Content-Type header to application/ son

Answer: D

Explanation:

The HTTP 415 Unsupported Media Type client error response code indicates that the server refuses to accept the request because the payload format is in an unsupported format. The format problem might be due to the request's indicated Content-Type or Content-Encoding , or as a result of inspecting the data directly. In this case as per RAML specification data is expected in application/json and in request Content-Type is set as "text

/plain" which is incorrect. Hence solution is set the request Content-Type header to application/json

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Status/415>

NEW QUESTION # 65

.....

PDF format is pretty much easy to use for the ones who always have their smart devices and love to prepare for Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) exam from them. Applicants can also make notes of printed Salesforce-MuleSoft-Developer-I Exam Material so they can use it anywhere in order to pass Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) with a good score.
