

Useful Latest JN0-364 Exam Preparation - Only in VCE4Plus

P.S. Free & New JN0-364 dumps are available on Google Drive shared by VCE4Plus: <https://drive.google.com/open?id=1vpQSgqxvz9dM3o0xfeXGO8ORxlpuN>

This version is designed especially for those JN0-364 test takers who cannot go through extensive Juniper JN0-364 practice sessions due to a shortage of time. Since the Juniper JN0-364 PDF file works on smartphones, laptops, and tablets, one can use Juniper JN0-364 dumps without limitations of place and time. Additionally, these Juniper JN0-364 PDF questions are printable as well.

In addition, you can print these Juniper JN0-364 PDF questions for paper study in this format of VCE4Plus product frees you from restrictions of time and place as you can study JN0-364 exam questions from your comfort zone in your spare time. The second version is the web-based format of the Juniper JN0-364 Practice Test. Browsers such as Internet Explorer, Microsoft Edge, Firefox, Safari, and Chrome support the web-based practice exam.

JN0-364 Latest Exam Pdf, JN0-364 Valid Exam Tutorial

JN0-364 Soft test engine can simulate the real exam environment, and your nerves will be lessened and your confidence for the exam can be strengthened if you choose this version. What's more, we offer you free demo to have a try before buying JN0-364 exam dumps, so that you can have a deeper understanding of what you are going to buy. JN0-364 Exam Materials cover almost all knowledge points for the exam, and they will be enough for you to pass the exam. Free update for one year is available, and our system will send you the latest information for JN0-364 exam braindumps once it has update version.

Juniper Service Provider Routing and Switching, Specialist (JNCIS-SP) Sample Questions (Q85-Q90):

NEW QUESTION # 85

What are two types of BGP messages exchanged while in the Established state? (Choose two.)

- A. update
- B. notification
- C. open
- D. request

Answer: A,B

Explanation:

In the Border Gateway Protocol (BGP) finite state machine (FSM), the Established state is the final and functional stage of a BGP peering session. According to Juniper Networks technical documentation, once a session reaches this state, the two peers have successfully exchanged Open messages and agreed upon session parameters (such as AS numbers, hold timers, and BGP

identifiers). Only after the session is "Established" can the routers begin the actual exchange of network layer reachability information (NLRI).

The most frequent message type exchanged in the Established state is the UPDATE message. These messages are the heart of BGP operations; they are used to advertise new feasible routes to a peer or to withdraw routes that are no longer reachable. An UPDATE message contains path attributes (like AS-Path, Next-Hop, and Local Preference) and the associated prefixes. In a stable network, UPDATE messages are only sent when there is a change in the topology, adhering to BGP's incremental update philosophy.

The second message type that can be exchanged in this state is the NOTIFICATION message. While ideally, a session stays established, any detected error—such as a hold timer expiration, a malformed update, or a manual "clear" command—will trigger the transmission of a NOTIFICATION message. This message informs the peer of the specific error code and immediately causes the BGP session to transition back to the Idle state, tearing down the TCP connection.

It is important to note that OPEN messages (Option A) are only used during the session initialization phase to transition from the OpenConfirm state to Established. REQUEST (Option B) is not a valid BGP message type defined in the standard (RFC 4271); the closest equivalent in functionality would be a Route-Refresh message, which is a separate extension. Therefore, in the context of standard BGP operations within the Established state, Updates and Notifications are the correct answers.

NEW QUESTION # 86

Which BGP attribute is optional, transitive, and is passed unchanged to other BGP peers if not recognized?

- A. Community
- B. AS Path
- C. Origin
- D. MED

Answer: A

Explanation:

The Community attribute is an optional transitive BGP attribute. Optional transitive attributes are propagated to other BGP peers even if a router does not recognize them. The Community attribute is commonly used to tag routes so that routing policies can apply specific handling to those routes as they propagate through the network.

NEW QUESTION # 87

Which BGP attribute is used to detect routing loops?

- A. local preference
- B. MED
- C. AS path
- D. next hop

Answer: C

NEW QUESTION # 88

Click the Exhibit button.

```
user@switch1> show spanning-tree interface
```

Interface	Port ID	Designated port ID	Designated bridge ID	Port Cost	State	Role
ge-0/0/6.0	128:519	128:519	32768.0019e2552481	20000	FWD	DESG
ge-0/0/7.0	64:520	64:520	32768.0019e2552481	20000	FWD	DESG
ge-0/0/8.0	32:521	32:521	32768.0019e2552481	20000	FWD	DESG
ge-0/0/9.0	32:522	32:522	32768.0019e2552481	20000	FWD	DESG
ge-0/0/11.0	32:524	32:524	32768.0019e2552481	20000	FWD	DESG
ge-0/0/12.0	64:525	64:525	32768.0019e2552481	20000	FWD	DESG
ge-0/0/13.0	64:526	64:526	32768.0019e2552481	20000	FWD	DESG

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The bridge priority for switch 1 is 32k.
- B. The switch1 device is the root bridge.
- C. The ge-0/0/8, ge-0/0/9, and ge-0/0/11 interfaces are using the default interface priority.
- D. The switch1 device is using VSTP.

Answer: A,B

Explanation:

All listed ports are in the designated role and forwarding state, and the designated bridge ID shown matches the local bridge ID, which indicates the device is acting as the root bridge for this spanning-tree instance.

The bridge ID begins with 32768, which corresponds to the default bridge priority of 32,768 (32k).

NEW QUESTION # 89

In an OSPF network, what is a purpose of a designated router?

- A. to flood routes to all other OSPF devices in the entire domain
- B. to assign an OSPF router ID to all routers in the OSPF segment
- C. to reduce OSPF traffic on the OSPF segment
- D. to forward traffic within the configured subnet

Answer: C

Explanation:

A designated router is elected on multiaccess OSPF networks to minimize the number of adjacencies and reduce the amount of OSPF control traffic. Instead of every router forming a full adjacency with every other router on the segment, routers form adjacencies with the designated router, which then manages the distribution of link-state updates on that segment.

NEW QUESTION # 90

.....

JN0-364 practice exam will provide you with wholehearted service throughout your entire learning process. This means that unlike other products, the end of your payment means the end of the entire transaction our Juniper JN0-364 Learning Materials will provide you with perfect services until you have successfully passed the Service Provider Routing and Switching, Specialist (JNCIS-SP) JN0-364 exam.

JN0-364 Latest Exam Pdf: <https://www.vce4plus.com/Juniper/JN0-364-valid-vce-dumps.html>

The JN0-364 on-line file is the updated version of the soft file, There is no doubt that the society is developing faster and faster as well as Juniper JN0-364 Latest Exam Pdf industry, so the demands for workers also have been improved, All these JN0-364 quiz guide materials include the new information that you need to know to pass the test, With the help of the JN0-364 practice exam questions, you will be able to feel the real JN0-364 exam scenario, and it will allow you to assess your skills.

The main difference between the two is that a company can JN0-364 include team members and an individual cannot, So companies should not be investing in their own people?

The JN0-364 on-line file is the updated version of the soft file, There is no doubt that the society is developing faster and faster as well as Juniper industry, so the demands for workers also have been improved.

2026 Latest JN0-364 Exam Preparation Pass Certify | High Pass-Rate JN0-364 Latest Exam Pdf: Service Provider Routing and Switching, Specialist (JNCIS-SP)

All these JN0-364 quiz guide materials include the new information that you need to know to pass the test, With the help of the JN0-364 practice exam questions, you will be able to feel the real JN0-364 exam scenario, and it will allow you to assess your skills.

High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content

of our JN0-364 study guide prepared for you.
