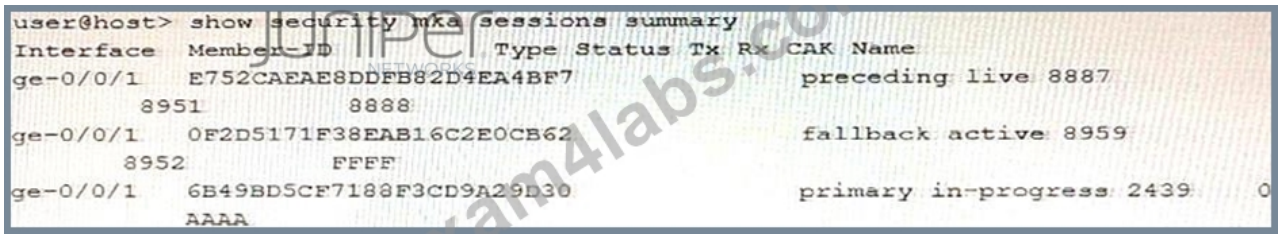
Fantastic Juniper New JN0-637 Test Sample | Try Free Demo before Purchase

Perhaps it was because of the work that there was not enough time to learn, or because the lack of the right method of learning led to a lot of time still failing to pass the JN0-637 examination. Whether you are the first or the second or even more taking JN0-637 examination, our JN0-637 exam prep not only can help you to save much time and energy but also can help you pass the exam. In the other words, passing the exam once will no longer be a dream.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q116-Q121):

NEW QUESTION # 116
Exhibit



Referring to the exhibit, which two statements are true about the CAK status for the CAK named "FFFP"? (Choose two.)

- A. CAK is not used for encryption and decryption of the MACsec session.
- B. SAK is not generated using this key.
- C. CAK is used for encryption and decryption of the MACsec session.
- D. SAK is successfully generated using this key.

Answer: B,C

NEW QUESTION # 117
You want to identify potential threats within SSL-encrypted sessions without requiring SSL proxy to decrypt the session contents. Which security feature achieves this objective?

- A. Secure Web Proxy
- B. infected host feeds
- C. DNS security
- D. encrypted traffic insights

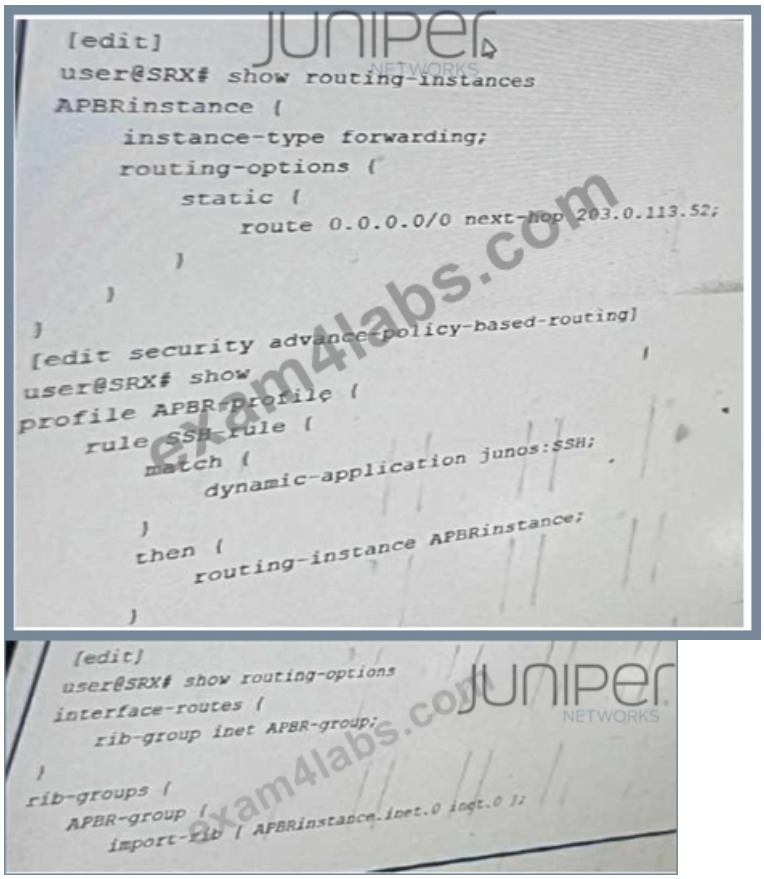
Answer: D

NEW QUESTION # 118
You are connecting two remote sites to your corporate headquarters site.You must ensure that all traffic is secured and sent directly between sites In this scenario, which VPN should be used?

- A. full mesh Layer 3 VPN with EBGP
- B. Layer 2 VPN
- C. IPsec ADVPN
- D. hub-and-spoke IPsec VPN

Answer: C

NEW QUESTION # 119
You are configuring advanced policy-based routing. You have created a static route with next hop of an interface in your inet.0 routing table



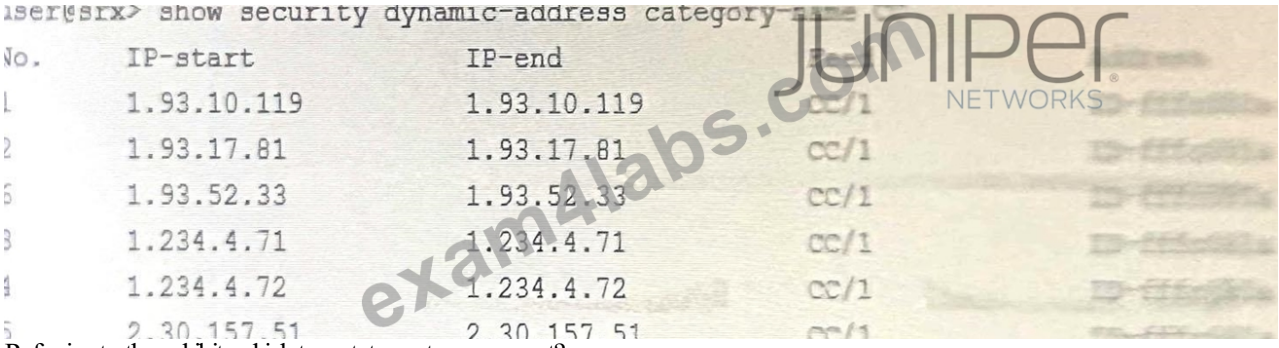
Referring to the exhibit, what should be changed to solve this issue?

- A. You should change the routing instance type to virtual-router.
- B. You should move the static route configuration to the main routing instance.
- C. You should delete the interface-routes configuration under the routing-options hierarchy.
- D. You should move the inet. o table before the routing instance table in your rib-groups configuration.

Answer: D

NEW QUESTION # 120

Exhibit:



Referring to the exhibit, which two statements are correct?

- A. All of the entries are a threat level 10.
- B. All of the entries are a threat level 8
- C. All of the entries are command and control entries.
- D. All of the entries are Dshield entries

Answer: C,D

Explanation:

Referring to the exhibit, the following statements are correct:

B) All of the entries are command and control entries. Command and control entries are dynamic addresses that represent the IP

addresses of servers that are used by malware to communicate with infected hosts. The SRX Series device can block or log the traffic to or from these IP addresses based on the security policies. The exhibit shows that all of the entries have the category DC/1, which stands for command and control1.
C) All of the entries are Dshield entries. Dshield is a feed source that provides a list of IP addresses that are associated with malicious activities, such as scanning, spamming, or attacking. The SRX Series device can download the Dshield feed and use it to populate the dynamic address entries. The exhibit shows that all of the entries have the feed dshield, which indicates that they are from the Dshield feed source2.
The other statements are incorrect because:
A) All of the entries are not a threat level 8, but a threat level 10. The threat level is a numeric value that indicates the severity of the threat associated with a dynamic address entry. The higher the threat level, the more dangerous the threat. The SRX Series device can use the threat level to prioritize the actions for the dynamic address entries. The exhibit shows that all of the entries have the cc CN, which stands for country code China. According to the Juniper documentation, the country code China has a threat level of 10, which is the highest.
D) All of the entries are not a threat level 10, but they are. See the explanation for option A.
