

# Book PL-400 Free - PL-400 Valid Exam Questions

What's more, part of that ActualTestsQuiz PL-400 dumps now are free: <https://drive.google.com/open?id=12vJRWK66wWRRrxvxPR4KhrO0cMpTWDlj>

Just the same as the free demo, we have provided three kinds of versions of our PL-400 preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based PL-400 Materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our PL-400 study guide.

PL-400 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, PL-400 test answers will be your best choice. For office workers, PL-400 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but PL-400 Study Materials will help you to solve this problem perfectly.

## Microsoft PL-400 Valid Exam Questions & Pdf PL-400 Files

Microsoft PL-400 Practice test is an integral part of Microsoft Power Platform Developer (PL-400) exam preparation. ActualTestsQuiz offers desktop-based PL-400 practice exam software and web-based Microsoft Power Platform Developer (PL-400) practice test that simulates the real Microsoft Power Platform Developer (PL-400) exam environment. These Microsoft Power Platform Developer (PL-400) practice tests are designed to help identify strengths and weaknesses.

## Microsoft Power Platform Developer Sample Questions (Q95-Q100):

### NEW QUESTION # 95

You are a Power Platform developer.

Users report several access issues.

You need to resolve the user access issues.

What should you use? To answer, drag the appropriate security options to the correct scenarios. Each security option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security options	Answer Area	Security option
<input type="text" value="DLP policy"/>	<b>Issues</b>	
<input type="text" value="GDPR compliance"/>	A user is not able to sign into a Power Apps app from home.	<input type="text" value="Security option"/>
<input type="text" value="Conditional access"/>	A user is not able to use a social media connector in a flow that uses the Microsoft Teams connector.	<input type="text" value="Security option"/>
<input type="text" value="Exfiltration blocking"/>	A user is not able to forward email messages to an address in another domain.	<input type="text" value="Security option"/>

Answer:

Explanation:

Security options	Answer Area	Security option
<input type="text" value="DLP policy"/>	<b>Issues</b>	
<input type="text" value="GDPR compliance"/>	A user is not able to sign into a Power Apps app from home.	<input type="text" value="Conditional access"/>
<input type="text" value="Conditional access"/>	A user is not able to use a social media connector in a flow that uses the Microsoft Teams connector.	<input type="text" value="DLP policy option"/>
<input type="text" value="Exfiltration blocking"/>	A user is not able to forward email messages to an address in another domain.	<input type="text" value="Exfiltration blocking"/>

## NEW QUESTION # 96

You are creating technical designs for several complex business processes.

You need to implement custom business logic based on the requirements.

Which implementation methods should you use? To answer, drag the appropriate implementation methods to the correct requirements. Each implementation method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Implementation methods	Answer Area	
Business rule	<b>Requirement</b>	<b>Implementation method</b>
JavaScript code	Access current and new values when data is updated.	<input type="text"/>
Power Automate flow	Run on a schedule.	<input type="text"/>
Plug-in		

**Answer:**

**Explanation:**

Implementation methods	Answer Area	
Business rule	<b>Requirement</b>	<b>Implementation method</b>
JavaScript code	Access current and new values when data is updated.	Business rule
Power Automate flow	Run on a schedule.	Power Automate flow
Plug-in

#### NEW QUESTION # 97

You create a new canvas app.

You update a test case and must test the app in a separate browser.

You need to test the app by using Test Studio.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

### Actions

Select a test suite
Publish the test
Select the OnTestSuiteComplete action
Select Copy play link
Open a browser and paste the URL for the app into the address bar
Send the results from the test to a flow in Power Automate

### Answer Area

Answer:

Explanation:

### Actions

Select a test suite
Publish the test
Select the OnTestSuiteComplete action
Select Copy play link
Open a browser and paste the URL for the app into the address bar
Send the results from the test to a flow in Power Automate

### Answer Area

Select a test suite
Select Copy play link
Publish the test
Open a browser and paste the URL for the app into the address bar

Explanation:

Actions	Answer area
Send the results from the test to a flow in Power Automate.	1 Select a test suite.
Select the OnTestSuiteComplete action.	2 Select Copy play link.
	3 Publish the tests.
	4 Open a browser and paste the URL for the app into the address bar.

### NEW QUESTION # 98

A travel agency has a Dynamics 365 Customer Engagement.

Customers are allowed to add up to three countries/regions to their travel preferences from the website. Their preferences must be stored in the Contact entity.

You need to register the plug-in to meet the requirements.

Which value should you apply for each parameter? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Parameter	Value
message	<div><div></div><div>create</div><div>associate</div><div>update</div></div>
primary entity	<div><div></div><div>none</div><div>country</div><div>contact</div></div>
secondary entity	<div><div></div><div>none</div><div>country</div><div>contact</div></div>
execution mode	<div><div></div><div>synchronous</div><div>asynchronous</div></div>

**Answer:**

Explanation:

Parameter	Value
message	<div>create</div> <div>associate</div> <div>update</div>
primary entity	<div>none</div> <div>country</div> <div>contact</div>
secondary entity	<div>none</div> <div>country</div> <div>contact</div>
execution mode	<div>synchronous</div> <div>asynchronous</div>

Explanation

Parameter	value
message	<div>create</div> <div>associate</div> <div>update</div>
primary entity	<div>none</div> <div>country</div> <div>contact</div>
secondary entity	<div>none</div> <div>country</div> <div>contact</div>
execution mode	<div>synchronous</div> <div>asynchronous</div>

Box 1: associate

Box 2: contact

Customers are allowed to add up to three countries/regions to their travel preferences from the website. Their preferences must be stored in the Contact entity.

Box 3: country

Box 4: synchronous

### NEW QUESTION # 99

You are developing a model-driven app for the purchasing department of an organization. You provision a new test environment and a security role. You select users to test the apps and assign the users to a security group named TestSG.

If the tests succeed, a manager will perform additional testing in the production environment and then publish the app for the organization's purchasing department.

You need to ensure that the test and production environments are configured correctly.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Scenario

Ensure that only test users can access the test environment.

Ensure that only the manager can access the app in production.

Ensure that test users can access the app in production.

Ensure that purchasing department users can access the test environment.

Set the test environment security group to TestSG.  
Assign the test users the app security role.  
Set the test environment security group to TestSG and assign test users the app security role.

Set the production environment security group to TestSG.  
Assign the manager the app security role.  
Add the manager to the TestSG security group and grant the manager the app security role.

Set the production environment security group to TestSG.  
Assign the test users the app security role.  
Set the production environment security group to TestSG and assign test users the app security role.

Remove the security group TestSG associated with the test environment.  
Assign all users the app security role.  
Add all users in the department to the TestSG security group.

**Answer:**

**Explanation:**

Scenario	Security artifact
Ensure that only test users can access the test environment.	<div>Set the test environment security group to TestSG.</div> <div>Assign the test users the app security role.</div> <div>Set the test environment security group to TestSG and assign test users the app security role.</div>
Ensure that only the manager can access the app in production.	<div>Set the production environment security group to TestSG.</div> <div>Assign the manager the app security role.</div> <div>Add the manager to the TestSG security group and grant the manager the app security role.</div>
Ensure that test users can access the app in production.	<div>Set the production environment security group to TestSG.</div> <div>Assign the test users the app security role.</div> <div>Set the production environment security group to TestSG and assign test users the app security role.</div>
Ensure that purchasing department users can access the test environment.	<div>Remove the security group TestSG associated with the test environment.</div> <div>Assign all users the app security role.</div> <div>Add all users in the department to the TestSG security group.</div>

Explanation

Scenario	Security artifact
Ensure that only test users can access the test environment.	<div>Set the test environment security group to TestSG.</div> <div>Assign the test users the app security role.</div> <div>Set the test environment security group to TestSG and assign test users the app security role.</div>
Ensure that only the manager can access the app in production.	<div>Set the production environment security group to TestSG.</div> <div>Assign the manager the app security role.</div> <div>Add the manager to the TestSG security group and grant the manager the app security role.</div>
Ensure that test users can access the app in production.	<div>Set the production environment security group to TestSG.</div> <div>Assign the test users the app security role.</div> <div>Set the production environment security group to TestSG and assign test users the app security role.</div>
Ensure that purchasing department users can access the test environment.	<div>Remove the security group TestSG associated with the test environment.</div> <div>Assign all users the app security role.</div> <div>Add all users in the department to the TestSG security group.</div>

Box 1: Set the test environment security group to TestSG and assign test users the app security role.

PowerApps apps use role-based security for sharing. The fundamental concept in role-based security is that a security role contains

privileges that define a set of actions that can be performed within the app. All app users must be assigned to one or more predefined or custom roles.

Box 2: Assign the manager the app security role.

Box 3: Set the production environment security group to TestSG

Box 4: Add all users in the department to the TestSG security group.
