P.S. Free 2025 Oracle 1Z0-1163-1 dumps are available on Google Drive shared by ITdumpsfree: https://drive.google.com/open?id=1CGWD330_J3X5KtHsDKK6v6N_ypj3YRx3

With a vast knowledge in the field, ITdumpsfree is always striving hard to provide actual, authentic Oracle Exam Questions so that the candidates can pass their Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam in less time. ITdumpsfree tries hard to provide the best Oracle 1Z0-1163-1 dumps to reduce your chances of failure in the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam. ITdumpsfree provides an exam scenario with its Oracle 1Z0-1163-1 practice test (desktop and web-based) so the preparation of the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam questions becomes quite easier.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 2	OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.

Topic 3	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 4	• Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Topic 5	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 6	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.

New 1Z0-1163-1 Test Pattern - 1Z0-1163-1 Reliable Test Book

It doesn't matter if it is the first time you participate in the c online training or if you prepare this exam for some time. It is a simple and smart way to prepare the 1Z0-1163-1 practice exam with our latest learning materials. There are free demo and valid questions and answers in our 1Z0-1163-1 Pass Guide. If you spend some time and pay attention to 1Z0-1163-1 test answers, there is no reason to not pass test and get the certification.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which key metric measures the effectiveness of the Demand to Management OMBP in Oracle Fusion Cloud SCM?

- A. Forecast Accuracy, evaluates the precision of demand predictions against actual market demand.
- B. Inventory Turnover, which tracks the speed of inventory movement.
- C. Supplier Lead Time, which measures supplier response efficiency.

Answer: A

Explanation:

For the Demand to Management OMBP, Forecast Accuracy is the primary metric, as it evaluates how precisely demand predictions match actual market demand, a foundational step in effective supply chain planning. Calculated as a percentage (e.g., actual demand of 800 units versus a forecast of 850 yields 94% accuracy), it directly reflects the OMBP's ability to drive downstream processes like procurement and production. Option B (Supplier Lead Time) measures supplier performance, which affects supply execution but not demand forecasting accuracy. Option C (Inventory Turnover) tracks inventory movement efficiency, an outcome influenced by forecast accuracy, not a direct measure of the OMBP itself. Accurate forecasts prevent overproduction or shortages—for example, overestimating demand by 20% could lead to \$50,000 in excess inventory costs, underscoring the metric's importance.

NEW QUESTION # 51

What role does the Inventory Management function play in Oracle Fusion Cloud SCM?

- A. It focuses on reducing supplier costs instead of stock levels.
- B. It manages only supplier shipments, not warehouse stock.
- **C. It ensures optimal inventory levels by tracking stock movement and availability.**

Answer: C

Explanation:

Inventory Management in Oracle Fusion Cloud SCM ensures optimal inventory levels by tracking stock movement, availability, and replenishment needs across warehouses and supply chains. It monitors quantities on hand, in transit, and on order, using real-time data to prevent overstocking or stockouts. For instance, if a product's stock drops below a reorder point, the system triggers a replenishment alert. Option A is incorrect-reducing supplier costs is a procurement goal, not Inventory Management's focus, which is stock optimization. Option B is wrong as it manages warehouse stock, not just supplier shipments. This function balances inventory costs with service levels, supporting efficient operations and customer satisfaction by ensuring products are available when needed without tying up excess capital.

NEW QUESTION # 52

Which feature in Oracle Fusion Cloud Procurement allows suppliers to manage invoices and purchase orders?

- A. Contract Fulfillment Automation.
- B. Intelligent Document Recognition (IDR).
- **C. Supplier Portal.**
- D. Receipt Accounting.

Answer: C

Explanation:

The Supplier Portal (A) in Oracle Fusion Cloud Procurement allows suppliers to manage invoices and purchase orders (POs) by providing a self-service platform. Suppliers can view POs (e.g., 200 units due Friday), submit invoices, and track statuses in real time, reducing manual communication. Option B (Contract Fulfillment Automation) generates POs from contracts, not supplier management. Option C (IDR) extracts invoice data, not a supplier tool. Option D (Receipt Accounting) records receipts, not supplier interactions. For example, a supplier might invoice \$2,000 for a PO directly in the portal, speeding up payment cycles and improving transparency.

NEW QUESTION # 53

What is the function of Cost Rollup in Oracle Fusion Cloud SCM?

- A. It ensures material costs remain unchanged over time.
- **B. It calculates the total cost of a product by aggregating material, labor, and overhead expenses.**
- C. It tracks only direct labor expenses, excluding materials.

Answer: B

Explanation:

Cost Rollup in Oracle Fusion Cloud SCM aggregates all cost components-material, labor, and overhead-to calculate the total cost of a product. This process rolls up costs from raw materials through production stages, providing a comprehensive view for pricing and profitability analysis. For example, producing a widget might involve \$5 in materials, \$3 in labor, and \$2 in overhead; Cost Rollup totals this to \$10 per unit. Option B is incorrect because it excludes materials and overhead, which are integral to the process. Option C is false-Cost Rollup reflects current costs, not fixed values, adapting to fluctuations like material price changes. This function supports accurate financial reporting, cost control, and strategic decision-making by revealing true production costs.

NEW QUESTION # 54

Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- **A. Manufacturing Execution.**
- B. Supplier Qualification.
- C. Inventory Management.
- D. Cost Accounting.

Answer: A

Explanation:

Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A (Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

NEW QUESTION # 55

.....

Oracle 1Z0-1163-1 is one of the important certification exams. ITdumpsfree's experienced IT experts through their extensive experience and professional IT expertise have come up with IT certification exam study materials to help people pass Oracle Certification 1Z0-1163-1 Exam successfully. ITdumpsfree's providing learning materials can not only help you 100% pass the exam, but also provide you a free one-year update service.
