

Boost Your Exam Prep With PDF4Test Microsoft GH-900 Questions

2025 Latest PDF4Test GH-900 PDF Dumps and GH-900 Exam Engine Free Share: https://drive.google.com/open?id=171bPyCc3Wf790vAP-G2lmy1bxD_TMLxj

With online test engine, you will feel the atmosphere of Microsoft valid test. You can set limit-time when you do the GH-900 test questions so that you can control your time in GH-900 practice exam. Online version can point out your mistakes and remind you to practice it every day. What's more, you can practice GH-900 PdfTorrent anywhere and anytime.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.
Topic 2	• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.
Topic 3	• Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI • CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.

VCE Microsoft GH-900 Dumps | GH-900 Latest Test Experience

In this Desktop-based Microsoft GH-900 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the GitHub Foundations (GH-900) practice exams according to the time and types of GitHub Foundations (GH-900) practice test questions will contribute to your ease. This format operates only on Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real Microsoft GH-900 Exam to make your preparation productive and relevant.

Microsoft GitHub Foundations Sample Questions (Q56-Q61):

NEW QUESTION # 56

Workflows can reference actions in:

(Each correct answer presents a complete solution. Choose three.)

- A. A published Docker container image on Docker Hub.
- B. An enterprise marketplace.
- C. GitHub Packages.
- D. Any public repository.
- E. The same repository as your workflow file.

Answer: A,D,E

Explanation:

As mentioned in the answer to Question no. 66, GitHub Actions workflows can reference actions from a variety of sources:

Any Public Repository:

Option A is correct. Actions can be sourced from any public GitHub repository.

The Same Repository as Your Workflow File:

Option B is correct. Actions within the same repository as the workflow file can be referenced directly.

A Published Docker Container Image on Docker Hub:

Option E is correct. Workflows can also use actions provided as Docker container images from Docker Hub.

Incorrect Options:

Option C and D are not relevant for directly referencing actions in workflows.

NEW QUESTION # 57

What is the primary purpose of creating a new branch in the GitHub flow?

- A. To incorporate changes from a review
- B. To create a backup of the main branch
- C. To capture information about an issue
- D. To experiment with new features or fixes

Answer: D

Explanation:

In GitHub Flow, creating a new branch is a key step in the development process that allows for isolated development of new features or fixes without affecting the main codebase.

Experimenting with New Features or Fixes:

Option C is correct. The primary purpose of creating a new branch in the GitHub flow is to provide a safe space to experiment with new features or fixes. This allows developers to work on changes independently and only merge them into the main branch after they have been reviewed and approved.

Incorrect Options:

Option A (To create a backup of the main branch) is incorrect because branches are not typically used for backups; they are for active development.

Option B (To capture information about an issue) is incorrect because issues are tracked separately; branches are for code changes.

Option D (To incorporate changes from a review) is incorrect because incorporating changes is done during the pull request process, not when creating a branch.

NEW QUESTION # 58

Which of the following can be performed within GitHub Mobile?

- A. Forking and cloning repositories
- B. Managing enterprise and organization settings
- C. Chat with other GitHub Mobile users via voice calling
- D. Utilizing the mobile device as a self-hosted runner
- E. Managing notifications from github.com

Answer: E

Explanation:

GitHub Mobile provides a streamlined experience for managing your GitHub notifications and participating in discussions, but it does not offer full functionality compared to the desktop or web interface.

Managing Notifications:

Option E is correct because GitHub Mobile allows users to manage notifications, keeping them up to date with their repositories, issues, pull requests, and other activities on GitHub.

Incorrect Options:

Option A is incorrect because GitHub Mobile cannot be used as a self-hosted runner.

Option B is incorrect because managing enterprise and organization settings is not supported in GitHub Mobile.

Option C is incorrect because GitHub Mobile does not offer a chat or voice calling feature.

Option D is incorrect because forking and cloning repositories are not actions available in GitHub Mobile.

GitHub Docs: GitHub Mobile

NEW QUESTION # 59

The difference between GitHub Desktop and github.com is that Desktop:

- A. Is a self-hosted version of GitHub.
- B. Is a standalone software application.
- C. Is only available on Windows operating systems.
- D. Enables integration with office suite applications.
- E. Offers a graphical user interface.

Answer: E

Explanation:

GitHub Desktop is a standalone application that provides a graphical user interface (GUI) for interacting with GitHub repositories, as opposed to the command-line or web-based interfaces available on github.com.

Graphical User Interface:

Option D is correct because GitHub Desktop offers a GUI, making it easier for users to manage repositories, perform commits, and handle other Git-related tasks without needing to use the command line.

Incorrect Options:

Option A is partially correct in that GitHub Desktop is a standalone application, but the key difference is the GUI.

Option B is incorrect because GitHub Desktop does not specifically enable integration with office suite applications.

Option C is incorrect because GitHub Desktop is available on both Windows and macOS.

Option E is incorrect because GitHub Desktop is not a self-hosted version of GitHub; it is a client application for accessing GitHub repositories.

NEW QUESTION # 60

If there are multiple README files, which of the following locations will be displayed first?

- A. /src
- B. Root
- C. /docs
- D. .github

Answer: B

Explanation:

When multiple README files exist in different locations within a GitHub repository, the README.md file located in the root directory of the repository will be displayed first by default. This file serves as the main documentation for the repository and is automatically rendered on the repository's home page.

Root Directory:

Option C is correct because the README.md file in the root directory is prioritized and displayed first on GitHub. This is the standard behavior for how GitHub presents documentation.

Incorrect Options:

Option A (.github) is incorrect because while a README.md file in the .github directory might be used for certain configurations, it is not the first to be displayed.

Option B (/src) is incorrect because the README.md in the src directory is not prioritized over the root.

Option D (/docs) is incorrect because documentation in the /docs folder is typically secondary to the root README.md.
