NEW QUESTION # 57

Which property is edited on a UI customization panel using the editor on the Webex device?

- A. panel display name
- B. font color of the panel button
- C. animations of the panel button
- D. size of the panel button on the home screen or touch device

Answer: D

Explanation:

The UI customization editor on a Webex device allows changes to the size of the panel button on the home screen or touch interface. This includes layout and positioning aspects, but not font color or animations.

NEW QUESTION # 59

What is a benefit of Python virtual environments?

- A. shared libraries across all projects
- **B. separate package dependencies for each application**
- C. shared workspace for Python applications
- D. dedicated CPU and memory for each application

Answer: B

Explanation:

Python virtual environments allow each project to maintain its own isolated set of dependencies, avoiding conflicts between packages required by different applications. This is especially important when applications require different versions of the same library.

NEW QUESTION # 60

Which Git command sends local changes from every branch to the remote repository?

- **A. git push -all**
- B. git add -all
- C. git push origin master
- D. git commit -m "All"

Answer: A

Explanation:

The command `git push --all` (or `git push -all`) pushes all local branches to the remote repository. This ensures that changes from every branch - not just the current one - are sent to the remote.
