2025 Braindump C1000-185 Free: IBM watsonx Generative AI Engineer - Associate - Valid IBM C1000-185 Authentic Exam Hub

We are benefiting more and more candidates for our excellent C1000-185 exam materials which is compiled by the professional experts accurately and skillfully. We are called the best friend on the way with our customers to help pass their C1000-185 exam and help achieve their dreaming certification. The reason is that we not only provide our customers with valid and reliable C1000-185 study questions, but also offer best service online since we uphold the professional ethical.

IBM watsonx Generative AI Engineer - Associate Sample Questions (Q79-Q84):

NEW QUESTION #79

In the lifecycle of deploying a prompt template for a generative AI solution, which of the following best describes the stage where user feedback is integrated to refine the template's performance?

- A. Initial testing on synthetic datasets and model validation
- B. Deployment to production with regular monitoring and logging
- C. Iterative prompt tuning based on A/B test results and feedback loops
- D. Retraining the model based on emerging trends in data

Answer: C

NEW QUESTION #80

You are designing prompt templates for an automated content generation tool that your team uses for marketing copy. The tool must balance cost efficiency with the generation of high-quality outputs. The prompts should be structured to avoid excessive token usage while ensuring that the model provides coherent and actionable content.

Which of the following techniques would best optimize the design of cost-effective prompt templates?

- A. Embedding explicit stop words within the prompt to control the length of generated outputs.
- B. Designing prompts that incorporate redundancy to ensure model outputs address all possible user needs.
- C. Using placeholders in the prompt templates for dynamic insertion of variables specific to each task.
- D. Creating templates that provide extensive background information to give the model context.

Answer: C

NEW QUESTION #81

In the context of Generative AI, which of the following is an appropriate method for setting a stopping criterion to prevent a model from generating excessively long sequences?

- A. Setting a maximum token length for the output sequence
- B. Stopping the model based on the number of unique tokens generated
- C. Allowing the model to continue until it reaches the minimum token length specified
- D. Stopping the generation when the model reaches the end of its training dataset

Answer: A

NEW OUESTION #82

When conducting prompt engineering to reduce model risks related to hate speech and abusive content, which of the following strategies is least likely to be effective?

- A. Creating a reward model during Reinforcement Learning to penalize hate speech outputs
- B. Applying ethical guidelines during the fine-tuning of the model to prioritize inclusive language
- C. Modifying the prompt to include explicit instructions for civil language
- D. Increasing the temperature during text generation to encourage more creative outputs

Answer: D

NEW QUESTION #83

You are tasked with creating a prompt template for IBM Watsonx to generate customer support responses based on user queries. The response needs to be polite, concise, and address the issue directly.

Which of the following is the most appropriate structure for a reusable prompt template to ensure consistency across multiple queries?

- A. "Generate a detailed and formal response to the customer, focusing on providing as much information as possible, even if
 it's unrelated to the query."
- B. "Write a short and casual response to the customer, focusing on being friendly and engaging, regardless of the content of the query."
- C. "Please write a polite and professional response to the customer's query, including any relevant context or background information and focusing on the core issue."
- D. 'Generate a professional response to the customer's query, avoiding repetition and unnecessary details, while focusing on addressing the issue succinctly."

Answer: D

NEW OUESTION #84
