The SAP C_ACDET_2506 Practice Test results help students to evaluate their performance and determine their readiness without difficulty.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 2	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

We provide the best C_ACDET_2506 questions torrent to you and don't hope to let you feel disappointed.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q30-Q35):

NEW QUESTION # 30

How can you define default values on fields?

- **A. Set as Constants or Expressions based on other field values**
- B. Default values are not permitted
- C. Set only for Constant values
- D. Default values must be manually entered by the user

Answer: A

NEW QUESTION # 31

A Migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates that it Failed. What actions do you take to make the failed template(s) available in production?

- A. Import the template in production
- **B. Import the missing data in production and then import the template in production**
- C. Request SAP intervention
- D. The template must always be rebuilt in production

Answer: B

NEW QUESTION # 32

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. AbstractContractWorkspace
- B. ContractRequest
- **C. InternalContractWorkspace and SalesContractWorkspace**
- D. SalesContractRequest and InternalContractRequest

Answer: C

Explanation:

TheContractWorkspace class is a parent class to both InternalContractWorkspace and SalesContractWorkspaceclasses in SAP Ariba. When a custom field is added to ContractWorkspace, it automatically inherits down to both these subclasses, making the field available in both internal and sales contract workspace types. It does not propagate upward to AbstractContractWorkspace or into contract request classes. This inheritance model is part of SAP Ariba's class hierarchy to ensure consistent data structures across related contract objects.

NEW QUESTION # 33

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies to this scenario?

- **A. The display order in the droop down matches the order defined in the enumeration file**
- B. In the enumeration file, the Value column must only contain whole numbers
- **C. The user can filter the values using the search box in the chooser**
- D. The display order of the values is alphabetical

Answer: A,C

NEW QUESTION # 34

You need to revise a published form template. What steps do you follow?

- **A. Create a new version, edit, test, and publish**
- B. Edit directly in production
- C. Delete and recreate
- D. Clone and change ID

Answer: A

Explanation:

SAP Ariba requires that revisions to published form templates be handled throughcreating a new version of the template, then editing and testing the draft version before publishing it. The system maintains the prior published version active while you work on the new draft, ensuring no disruption. Cloning and changing IDs is unnecessary and not best practice. Direct edits on published templates are not permitted, and deleting and recreating loses version history and control. This versioning mechanism supports safe, auditable template changes.

NEW QUESTION # 35

.....

As is known to us, the quality is an essential standard for a lot of people consuming movements, and the high quality of the C_ACDET_2506 guide questions is always reflected in the efficiency. We are glad to tell you that the C_ACDET_2506 actual dumps from our company have a high quality and efficiency. If you decide to choose C_ACDET_2506 Actual Dumps as you first study tool, it will be very possible for you to pass the exam successfully, and then you will get the related certification in a short time.
