P.S. Free 2025 Google Chrome-Enterprise-Administrator dumps are available on Google Drive shared by Prep4King:
https://drive.google.com/open?id=1P0_7Wb2OybLDFJHLPiGisxee40zsrxt

Prep4King believes in customer satisfaction and strives hard to make the entire Google Chrome-Enterprise-Administrator exam preparation process simple, smart, and successful. To achieve this objective the Prep4King is offering the top-rated and real Chrome-Enterprise-Administrator exam questions in three different Chrome-Enterprise-Administrator Exam study material formats. These Chrome-Enterprise-Administrator exam questions formats are Google Chrome-Enterprise-Administrator PDF dumps files, desktop practice test software, and web-based practice test software.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Topic 2	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 3	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 4	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 5	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Benefits of Preparing with the Chrome-Enterprise-Administrator

We offer you Chrome-Enterprise-Administrator study guide with questions and answers, and you can practice it by concealing the answers, and when you have finished practicing, you can cancel the concealment, through the way like this, you can know the deficient knowledge for Chrome-Enterprise-Administrator exam dumps, so that you can put your attention to the disadvantages. In addition, we also have the free demo for Chrome-Enterprise-Administrator Study Guide for you to have a try in our website. These free demos will give you a reference of showing the mode of the complete version. If you want Chrome-Enterprise-Administrator exam dumps, just add them into your card.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

In Chrome's Safe Browsing settings, which option provides the most robust protection against online threats and is suitable for a highly secure environment?

- A. Secure Browsing Mode
- B. Advanced Threat Protection
- C. Proactive Defense
- **D. Enhanced Protection**

Answer: D

Explanation:

Among the Safe Browsing options, **Enhanced Protection** offers the most robust security. It proactively checks URLs, downloads, and extensions against Google's Safe Browsing database in real time, and it can also share more data with Google to improve detection and provide personalized warnings. This level of protection is best suited for environments with high security requirements. The other options might represent different levels of Safe Browsing with varying degrees of protection.

NEW QUESTION # 47

An organization uses Chrome Enterprise Core and needs to enforce specific security policies (e.g., disabling extensions, restricting website access) only for employee work-related browsing. Personal browsing should remain unrestricted. Which approach is most

appropriate?

- A. Require a managed profile for work-related browsing, applying the policies to only that profile
- B. Require a managed browser for work-related browsing, applying the policies to all browser windows
- C. Use a managed browser and set exceptions for personal use in the enterprise policies
- D. Use a single managed profile for all users, configuring separate work and personal bookmarks to manage access

Answer: A

Explanation:

The most granular and appropriate approach to apply work-related policies without affecting personal browsing is to use ****managed profiles****. By requiring users to use a specific managed profile for work purposes, administrators can enforce policies only within that profile. Personal browsing in a separate, unmanaged profile will remain unaffected. Option A would apply policies to all browsing, which is not the requirement. Option C relies on bookmarks, which is not a security enforcement mechanism. Option D is generally not feasible as enterprise policies are designed to be enforced, and setting reliable exceptions for personal use within a managed browser is complex and less secure than using separate profiles.

NEW QUESTION # 48

A company is reviewing the permissions of extensions that are popular among employees. The security team wants to make sure all extensions in the environment have these capabilities disabled:

* Modify to internal home page: `internal.acme.com`

* Access to the storage

* Access to history

Which actions should be taken in the company default extension Permissions and URLs fields to meet the security team's requirements?

- A. Add `\*.acme.com` to runtime blocked hosts; Disable storage permission; Disable history permission
- B. Add `\*.acme.com` to runtime blocked hosts; Enable storage permission; Enable history permission
- C. Add `internal.acme.com` to runtime blocked hosts; Disable storage permission; Disable history permission
- D. Add `internal.acme.com` to runtime blocked hosts; Enable storage permission; Enable history permission

Answer: A

Explanation:

To prevent extensions from modifying the internal homepage, the administrator should add `\*.acme.com` to the "Runtime blocked hosts" list. The wildcard `\*` ensures that any attempt to access or modify this domain by an extension will be blocked at runtime. Additionally, to disable access to storage and history, the administrator needs to explicitly disable the "Storage" and "History" permissions within the extension management settings. Therefore, the correct combination is to block the host and disable the permissions.

NEW QUESTION # 49

An administrator is modifying a policy at the top-level organizational unit (OU), and there is an OU below that should not accept this modification. What can the administrator do to be certain of this*?

- A. Set policy precedence to Child > Parent
- B. Turn off inheritance for all policies
- C. Set the policy to locally applied at the parent OU
- D. Set the policy to locally applied at the child OU

Answer: D

Explanation:

To prevent a child OU from inheriting a policy set at a parent OU, the administrator needs to configure the policy within the child OU itself and set its inheritance status to "Locally applied." This explicitly overrides the inherited policy from the parent with a specific setting for the child OU. Setting it to locally applied at the parent would not prevent inheritance. Turning off inheritance entirely might not be desired for other policies, and "Child > Parent" is the default precedence when inheritance is enabled.

NEW QUESTION # 50

Which operating system must be used to self-host a Chrome extension*?

- A. macOS
- B. Windows 11
- **C. Linux**
- D. ChromeOS

Answer: C

Explanation:

While the provided study guide doesn't explicitly detail the OS requirements for self-hosting Chrome extensions, general web hosting best practices suggest that Linux is a common and robust platform for serving files and managing web-related services. Its open-source nature, command-line interface, and extensive server software support make it well-suited for self-hosting compared to desktop-centric operating systems like Windows 11 or macOS, and the client-focused ChromeOS. Self-hosting typically involves setting up a web server to distribute the extension files, a task commonly performed on Linux servers.

NEW QUESTION # 51

.....

Prep4King Google Chrome-Enterprise-Administrator exam information is proven. We can provide the questions based on extensive research and experience. Prep4King has more than 10 years experience in IT certification Chrome-Enterprise-Administrator exam training, including questions and answers. On the Internet, you can find a variety of training tools. Prep4King Chrome-Enterprise-Administrator Exam Questions And Answers is the best training materials. We offer the most comprehensive verification questions and answers, you can also get a year of free updates.
