

Braindumps HP HPE7-A03 Torrent | HPE7-A03 Online Exam

Our product boasts many merits and high passing rate. Our products have 3 versions and we provide free update of the HPE7-A03 exam torrent to you. If you are the old client you can enjoy the discounts. Most important of all, as long as we have compiled a new version of the HPE7-A03 exam questions, we will send the latest version of our HPE7-A03 Exam Questions to our customers for free during the whole year after purchasing. Our product can improve your stocks of knowledge and your abilities in some area and help you gain the success in your career.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Topic 2	Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.
Topic 3	Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Topic 4	Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.

HPE7-A03 Online Exam - HPE7-A03 Valid Test Topics

Our test-orientated high-quality HPE7-A03 exam questions would be the best choice for you, we sincerely hope all of our candidates can pass HPE7-A03 exam, and enjoy the tremendous benefits of our HPE7-A03 prep guide. Helping candidates to pass the HPE7-A03 Exam has always been a virtue in our company's culture, and you can connect with us through email at the process of purchasing and using, we would reply you as fast as we can.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q19-Q24):

NEW QUESTION # 19

A global cruise line company needs to refresh its current fleet. They will refresh the insides' of the ship to be cost-effective and increase their sustain ability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access

switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDF of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single

OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single

OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs).

the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on the best practices, what should be recommended as the most cost-effective switch model for the technical rooms?

- A. HPE Aruba Networking 6200M 24G Class- PoE 4SFP*
- B. Aruba 6300M 12p ClassD PoE and 36p Class6 PoE HPE Smart Rate 1G/2.5G/5G and 2p SOG and Zp 10G
- C. HPE Aruba Networking 6300M 24p HPE Smart Rate 1 G/2.5G/5G/10G Class6 PoE and 2p 50G and 2 p 25G
- D. HPE Aruba Networking 6200M 36G 12SR5 ClassG PoE 4SFP*

Answer: C

Explanation:

For technical rooms requiring redundant power and an upgrade to 10GbE uplinks to handle increased network traffic, the most cost-effective switch model is the HPE Aruba Networking 6300M 24p HPE Smart Rate 1G/2.

5G/5G/10G Class6 PoE and 2p 50G and 2p 25G. This model offers the necessary port density and speed flexibility, with support for high-power PoE devices and uplink capabilities that meet the future-proofing needs for technical rooms on the cruise ships. The switch's redundant power capabilities ensure high availability and resilience for critical technical room infrastructure, aligning with the customer's requirements for sustainability, cost-effectiveness, and preparedness for future hardware refreshes without extensive unused port capacities.

NEW QUESTION # 20

Which platform can be used to demo your solution to a customer? (Select three.)

- A. Aruba DemoExperiencePlatform
- B. your own lab
- C. Aruba Innovation Zone
- D. Aruba CX Switch Simulator
- E. Aruba Solution Exchange
- F. Aruba Support Portal

Answer: A,C,D

Explanation:

To demonstrate a solution to a customer, three platforms that can be effectively used are the Aruba CX Switch Simulator (Option B), Aruba Innovation Zone (Option C), and Aruba Demo Experience Platform (Option F).

The Aruba CX Switch Simulator provides a virtual environment where customers can interact with the Aruba OS-CX interface, allowing them to explore features and configurations without the need for physical hardware. The Aruba Innovation Zone offers a space for experiencing the latest Aruba technologies and solutions in action, showcasing their capabilities in real-world scenarios.

The Aruba Demo Experience Platform is designed to give customers a comprehensive look at Aruba's solutions, enabling interactive demos and simulations that highlight the benefits and functionalities of the products. These platforms provide valuable resources for customers to understand and evaluate Aruba solutions in a controlled and informative environment.

NEW QUESTION # 21

Based on this campus design, which layer is the most appropriate to be designed as a Border Persona, considering an EVPN VXLAN Fabric?

Answer:

Explanation:

Explanation:

Based on the campus design provided and considering an EVPN VXLAN Fabric, the most appropriate layer to be designed as a Border Persona would be the "ServicesAggregation" layer. In an EVPN VXLAN architecture, the Border or Border Leaf nodes provide connectivity to external networks, such as WAN, internet, or private connections. They are responsible for routing traffic into and out of the VXLAN fabric and typically also handle services like firewalling, load balancing, and other network services.

NEW QUESTION # 22

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1x neighborhood health centers and

1Z5 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital Is located In New York City

- Dila Health Center Is located in City A
 - Mount Health Center is located In City B
 - Rock Health Center is located in City C
 - Branch clinics are located at different locations across the United States Requirements:
 - Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance reporting.
 - Seamless integration across wired, wireless. WAN, S0-8branch. IoT
 - * Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
 - All-access points must support the following features and specifications: 802.11ax (WI-FI 6E Certified)
 - Security options Including WPA3. 802.1X with Radius secure authentication
 - Identify and authenticate every wireless and wired device
 - End-to-end role-based security
 - Seamless mobility across the hospital for medical teams, patients, and visitors
 - Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
 - Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
 - Fully redundant branch solution with dynamic path selection to the hospital XYZ Regional Hospital is looking for an NAC solution to address its security challenges-Requirements:
 - fully redundant NAC solution for management and authentication
 - wireless and wired authentication for the main hospital will be handled locally
 - wireless and wired authentication for the health centers will be handled locally
 - wireless and wired authentication for the clinics will be authenticated against the main hospital NAC
 - staff users/devices should be able to visit any site and have the same experience
 - support 35k devices
- Locations:
- XYZ Regional Hospital is located in City 1 - 15k devices
 - Dila Health center is located in City 2 - 8k devices
 - Mount Health Center is located in City 3 - 5k devices
 - Rock Health Center is located in City 4 - 4k devices
 - 125 branch clinics are located at different locations across the US - 2k devices
- Which solution meets the customer's requirements?

- A. 
 - 1x C3010 as a Publisher for the main DC
 - 1x C3010 as a Standby Publisher for the DR
 - 2x C3010 as Subscribers for the Main Hospital
 - 2x C1000 as Subscribers for the Dila Health Center
 - 2x VMs as Subscribers for the Mount Health Center
 - 2x VMs as Subscribers for the Rock Health Center
 - 35k Access licenses
- B. 
 - 1x 3010 as a Publisher for the main DC
 - 1x 3010 as a Standby Publisher for the DR
 - 2x 3010 as Subscribers for the Main Hospital
 - 2x C2020 as Subscribers for the Dila Health Center
 - 2x C2020 as Subscribers for the Mount Health Center
 - 2x C2020 as Subscribers for the Rock Health Center
- C. 
 - 1x 3010 as a Publisher for the main DC
 - 1x 3010 as a Standby Publisher for the DR
 - 2x 3010 as Subscribers for the Main Hospital
 - 2x C1000 as Subscribers for the Dila Health Center
 - 2x VMs as Subscribers for the Mount Health Center
 - 2x C2020 as Subscribers for the Rock Health Center
 - 15k + 10k Access licenses
- D. 
 - 1x 3010 as a Publisher for the main DC
 - 1x C2020 as a Standby Publisher for the DR
 - 2x C2020 as Subscribers for the Main Hospital
 - 2x C1000 as Subscribers for the Dila Health Center
 - 2x VMs as Subscribers for the Mount Health Center
 - 15k + 10k Access licenses

Answer: A

Explanation:

Option B in the provided selections outlines a configuration that includes an Aruba ClearPass Policy Manager as a Publisher for the main DC and as a Standby Publisher for the DR, with subscriber servers allocated to the main hospital and health centers. This setup is likely to match the requirement for a fully redundant NAC solution, with local handling of authentication for the main hospital and health centers, and centralized authentication for the clinics. The inclusion of VMs (Virtual Machines) as subscribers for health centers suggests scalability and flexibility for future expansion. The provision of 35k access licenses aligns with the support for 35k devices across all locations.

NEW QUESTION # 23

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single

OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs).

The customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on best practices, what should you recommend as the correct optic type for the connection between the IDF and the technical rooms?

- A. Aruba 10G SFP+ LC SR 300 m MMF Transceiver
- B. Aruba 10G LC BID! 40 km OM3 1330/1270 XCVR
- C. Aruba 10G SFP+ LC LRM 220 m MMF Transceiver
- D. Aruba 10GBASE-T SFP+ RJ-45 30 m Cat6A Transceiver

Answer: A

Explanation:

For the connection between the IDF and the technical rooms, which requires support for lengths between 100 and 150 meters (320 and 500 ft), the Aruba 10G SFP+ LC SR 300 m MMF Transceiver is the recommended optic type. This transceiver is designed for short-range multimode fiber connections and can support distances up to 300 meters, making it suitable for the specified lengths within the technical rooms on the cruise ship. The SR (Short Range) designation ensures that this transceiver is optimized for the distances involved in connecting the IDFs to the technical rooms, providing high-speed 10GbE connectivity to meet the increased network traffic demands. This choice aligns with the cruise line company's requirements for a sustainable and cost-effective network refresh that accommodates future expansion without extensive unused capacities.

NEW QUESTION # 24

.....

Do you always feel that your gains are not proportional to your efforts without valid HPE7-A03 study torrent? Do you feel that you always suffer from procrastination and cannot make full use of your sporadic time? If your answer is absolutely yes, then we would like to suggest you to try our HPE7-A03 Training Materials, which are high quality and efficiency test tools. Your success is 100% ensured to pass the HPE7-A03 exam and acquire the dreaming HPE7-A03 certification which will enable you to reach for more opportunities to higher incomes or better enterprises.
