Cisco CCNA Certification

The newly launched Cisco Certified Network Associate certificate is the epitome of career excellence at the mid-level. It is a creation of the new Cisco certification curriculum, which was rolled out in February 2020 as a way to keep abreast of the latest trends. Unlike the old CCNA, the new certification consolidates the essential IT skills across all the relevant niches as far as IT networking goes. In essence, the new CCNA is a career-oriented training path that only includes what the employers will be looking for in real-world scenarios. Here, the vendor only desires to equip its candidates with vital skills that will allow them to later specialize in one of the subsequent CCNP career tracks effortlessly. Thus, after completing the Cisco 200-301 Exam, you can jump straight into a new professional-level role by pursuing one of the five major CCNP certification paths including the CCNP Enterprise, CCNP Collaboration, CCNP Data Center, CCNP Security, and CCNP Service Provider.
