100% Pass 2025 Useful SAP C-ABAPD-2507 Latest Exam Practice

If you do not know how to pass the exam more effectively, I'll give you a suggestion is to choose a good training site. This can play a multiplier effect. PDF4Test site has always been committed to provide candidates with a real SAP C-ABAPD-2507 Certification Exam training materials. The PDF4Test SAP C-ABAPD-2507 Certification Exam software are authorized products by vendors, it is wide coverage, and can save you a lot of time and effort.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following are personas under the SAP S/4HANA Cloud Extensibility Framework?
(Select 2 correct answers)

- A. Workflow Administrator
- B. Citizen Developer
- C. Business Expert
- D. Report Writer

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation from Exact Extract:

SAP S/4HANA Cloud Extensibility Framework defines personas for extension activities:

- * Business Experts # implement extensions with business knowledge (using in-app extensibility).
- * Citizen Developers # build extensions with low-code/no-code tools.

Report Writer and Workflow Administrator are roles, but not part of extensibility personas.
Verified Study Guide Reference: ABAP Cloud Extensibility Guide - Personas in SAP S/4HANA Cloud.

NEW QUESTION # 18

Which of the following are valid ABAP SQL type conversions? (Select 3 correct answers)

- A. `CAST( field_f5 AS DEC( 15, 2 ) ) AS f_dec_15_2`
- B. `CAST( field_f2 AS N( 8 ) ) AS f_n8`
- C. `CAST( 'field_f1' AS CHAR( 8 ) ) AS f_char8`
- D. `CAST( 34 AS I ) AS f_i34`
- E. `CAST( 29 AS INT8 ) AS f_int8`

Answer: A,C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* ABAP Open SQL allows `CAST( ... AS ... )` to SQL/Dictionary-compatible types such as `CHAR(n)` and `DEC(p,s)`, which are valid (A, D).

* ABAP numeric integer target is accepted as `I` in Open SQL casting context on recent ABAP platform levels (E).

* `N(8)` is not a valid SQL cast target (`NUMC` is an ABAP elementary type, not an SQL cast target), and plain `INT8` (without the ABAP type namespace form) is not a generally valid SQL type literal in Open SQL (so B and C are rejected on standard ABAP Cloud systems).

* RAP and ABAP Cloud emphasize pushdown with typed SQL expressions and strict static checks; only released, database-compatible types are permitted in `CAST`, enforced by the language and static checks.

NEW QUESTION # 19

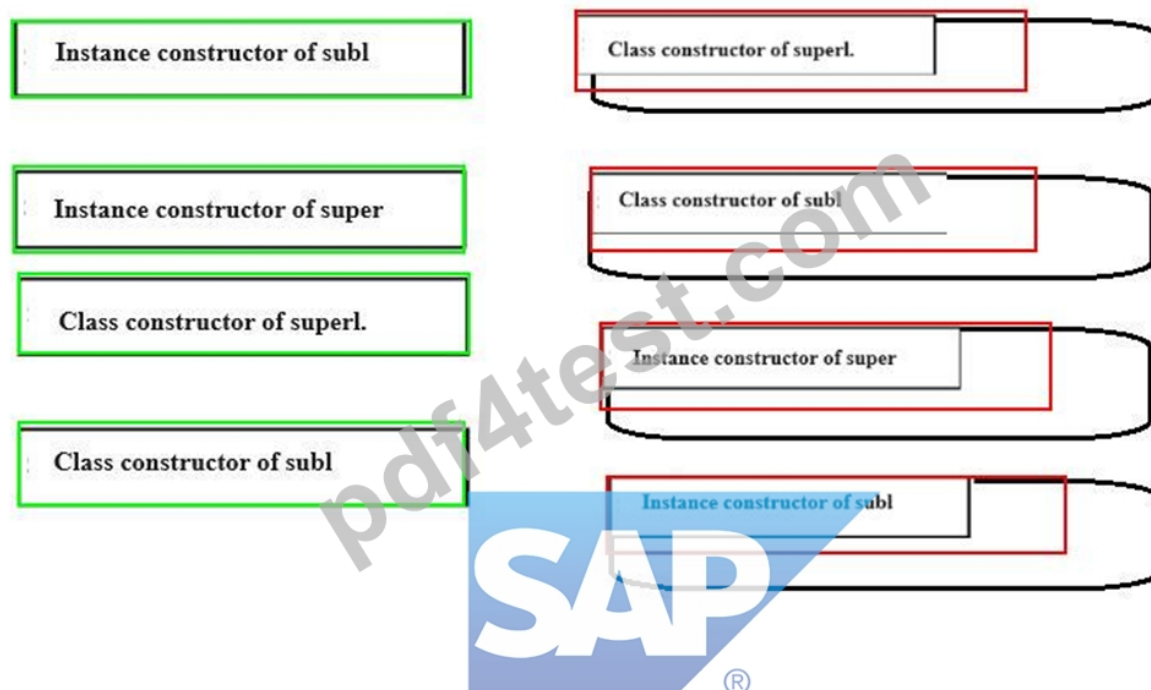

You have a superclass `superl` and a subclass `subl` of `superl`. Each class has an instance constructor and a static constructor. The first statement of your program creates an instance of `subl`. In which sequence will the constructors be executed?

Instance constructor of subl	
Instance constructor of super	
Class constructor of superl.	
Class constructor of subl	

Answer:

Explanation:

NEW QUESTION # 20

Which of the following integration frameworks have been released for ABAP Cloud development? (Select 3)

- A. CDS Views
- B. Business Add-ins (BAdIs)
- C. Business events
- D. OData services

Answer: A,C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* OData services are the standard way to expose RAP services; service bindings bind a service definition to a protocol such as OData.

* Business events are a released RAP capability for integration; RAP BOs can define, raise, and consume business events, with remote consumption via SAP Event Mesh and event bindings.

* CDS views define the semantic data models used for exposure and consumption; ADT defines CDS entities for the data model that can be used in applications. Together, CDS (data modeling) + OData (service exposure) + Events (event-driven integration) constitute the released, recommended integration building blocks in ABAP Cloud/RAP. (BAdIs are classic enhancement spots and not positioned as the primary integration frameworks for ABAP Cloud developer extensibility; SOAP is not the recommended channel in the RAP guidance above.)

NEW QUESTION # 21

What are some features of a unique secondary key? Note: There are 2 correct answers to this question.

- A. It is updated when the modified table is read again.
- B. It is updated when the table is modified.
- C. It is created with the first read access of a table.
- D. It is created when a table is filled.

Answer: B,C

Explanation:

A unique secondary key is a type of secondary key that ensures that the key combination of all the rows in a table is unique. A unique secondary key has two purposes: firstly, to speed up access to the table, and secondly, to enforce data integrity.

It is created with the first read access of a table: This is true. A unique secondary key is created when an internal table is filled for the

first time using the statement READ TABLE or a similar statement. The system assigns a name and an index to each row of the table based on the key fields²³.

It is updated when the modified table is read again: This is false. A unique secondary key does not need to be updated when the internal table content changes, because it already ensures data uniqueness. The system uses a lazy update strategy for non-unique secondary keys, which means that it delays updating them until they are actually accessed²³.

You cannot do any of the following:

It is created when a table is filled: This is false. As explained above, a unique secondary key is created only with the first read access of a table²³.

It is updated when the modified table is read again: This is false. As explained above, a unique secondary key does not need to be updated when the internal table content changes²³.

NEW QUESTION # 22

.....

Passing the SAP C-ABAPD-2507 exam at first attempt is a goal that many candidates strive for. However, some of them think that good SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) study material is not important, but this is not true. The right C-ABAPD-2507 preparation material is crucial for success in the exam. And applicants who don't find updated SAP C-ABAPD-2507 prep material ultimately fail in the real examination and waste money. That's why PDF4Test offers actual SAP C-ABAPD-2507 exam questions to help candidates pass the exam and save their resources.
