Also, our C-ACDET-2506 Preparation exam is unlimited in number of devices, making it easy for you to learn anytime, anywhere.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q18-Q23):

NEW QUESTION # 18

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- **A. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting.**
- B. All standard fields are reportable by default.
- C. The system makes all fields reportable after a system refresh.
- D. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.

Answer: A

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. Therecommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 19

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. AMLExtension - AML customizations such as custom fields
- B. DynamicForm - custom for m templates (dForms)
- **C. SupplierContact - contacts for the suppliers**
- D. Template - project templates such as Contract templates

Answer: C

NEW QUESTION # 20

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To test and validate the solution prior to go-live
- B. To advise the customer and partner in solution configurations
- C. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- **D. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations**

Answer: D

Explanation:

The SAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

NEW QUESTION # 21

Which scenarios are applicable when moving templates from the test site to the production site by ICM? Note: There are 2 correct answers to this question.

- **A. Draft templates on the source site are skipped.**
- B. New templates that successfully migrated to the production site are in Draft state.
- C. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- **D. Batch imports are available for templates when migrating configuration bundles.**

Answer: A,D

NEW QUESTION # 22

Which of the following can be used to define relation types and establish a custom relationship? Note: There are 2 correct answers to this question.

- A. A standard class such as ariba.basic.core.CommodityCode
- B. A custom Enumeration such as Contracts_Contract Type
- **C. A custom Flex Master Data Template such as vrealm 1936find_58984.Hospital**
- **D. A custom Form Template such as vrealm 1936.formDoc_18697.Lessons Learned**

Answer: C,D

NEW QUESTION # 23
