## SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Project Overview, Roles and Responsibilities:</b> This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Deploy and Migration:</b> This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Field Configuration:</b> This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>

### Mock C-ACDET-2506 Exams | Downloadable C-ACDET-2506 PDF

Created on the exact pattern of the actual C-ACDET-2506 tests, PassTesting's dumps comprise questions and answers and provide all important C-ACDET-2506 information in easy to grasp and simplified content. The easy language does not pose any barrier for any learner. The complex portions of the C-ACDET-2506 certification syllabus have been explained with the help of simulations and real-life based instances. The best part of C-ACDET-2506 Exam Dumps are their relevance, comprehensiveness and precision. You need not to try any other source for C-ACDET-2506 exam preparation. The innovatively crafted dumps will serve you the best; imparting you information in fewer number of questions and answers.

### SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

Which data elements are shared in a Suite-Integrated Environment? Note: There are 3 correct answers to this question.

- A. Exception Types
- B. Users
- C. User Group mapping
- D. Supplier Catalogs
- E. Suppliers

**Answer: A,B,E**

#### NEW QUESTION # 17

What actions can typically be performed on existing fields? (Select 3 correct answers)

- A. Change the internal name
- B. Change the help tip
- C. Add a Visibility, Editability, or Validity Condition
- D. Make the field mandatory
- E. Change the field type

**Answer: B,C,D**

Explanation:

In SAP Ariba, existing fields can be made mandatory by setting the Required property, help tips can be edited to clarify field usage, and visibility, editability, and validity conditions can be added or modified to control when and how fields appear or accept values. However, the internal field name is immutable once the field is created, and the field data type cannot be changed post-creation. These restrictions ensure system consistency and prevent data corruption. These limitations are well documented in SAP Ariba configuration best practices.

#### NEW QUESTION # 18

How can you define default values on fields?

- A. Default values must be manually entered by the user

- B. Default values are not permitted
- C. Set only for Constant values
- D. Set as Constants or Expressions based on other field values

**Answer: D**

#### NEW QUESTION # 19

Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- A. You cannot make other configuration updates in ICM when a migration operation is in progress.
- B. The status changes to Complete when migration is finished.
- C. If any configuration type fails during the migration process, you cannot create a new migration request.
- D. You can revert migrated configurations from the target site.

**Answer: A,B**

Explanation:

During Greenfield migrations using the Intelligent Configuration Manager (ICM), no other configuration updates can be made in ICM while a migration operation is active to ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully, the status updates to

"Complete", indicating the configuration is fully migrated and applied.

Contrary to option A, there is no built-in revert or rollback feature in ICM for deployed configurations; changes require new migration cycles. Option D is incorrect because if a migration fails, you can correct the issues and create a new migration request to retry. This process ensures controlled and orderly deployment of configurations.

#### NEW QUESTION # 20

Which of the following master data types requires manual migration from Test to Production in a Greenfield migration?

- A. Enumerations
- B. Translations
- C. Relations and relation entries
- D. Clause Library

**Answer: C**

#### NEW QUESTION # 21

.....
