## SAP C-AIG-2412 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.</li></ul>                                  |
| Topic 2 | <ul style="list-style-type: none"><li>• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.</li></ul>                                                      |
| Topic 4 | <ul style="list-style-type: none"><li>• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.</li></ul>                                                                            |

What can be done once the training of a machine learning model has been completed in SAP AI Core? Note: There are 2 correct answers to this question.

- A. The model's accuracy can be optimized directly in SAP HANA.
- **B. The model can be deployed for inferencing.**
- **C. The model can be registered in the hyperscaler object store.**
- D. The model can be deployed in SAP HANA.

**Answer: B,C**

#### NEW QUESTION # 24

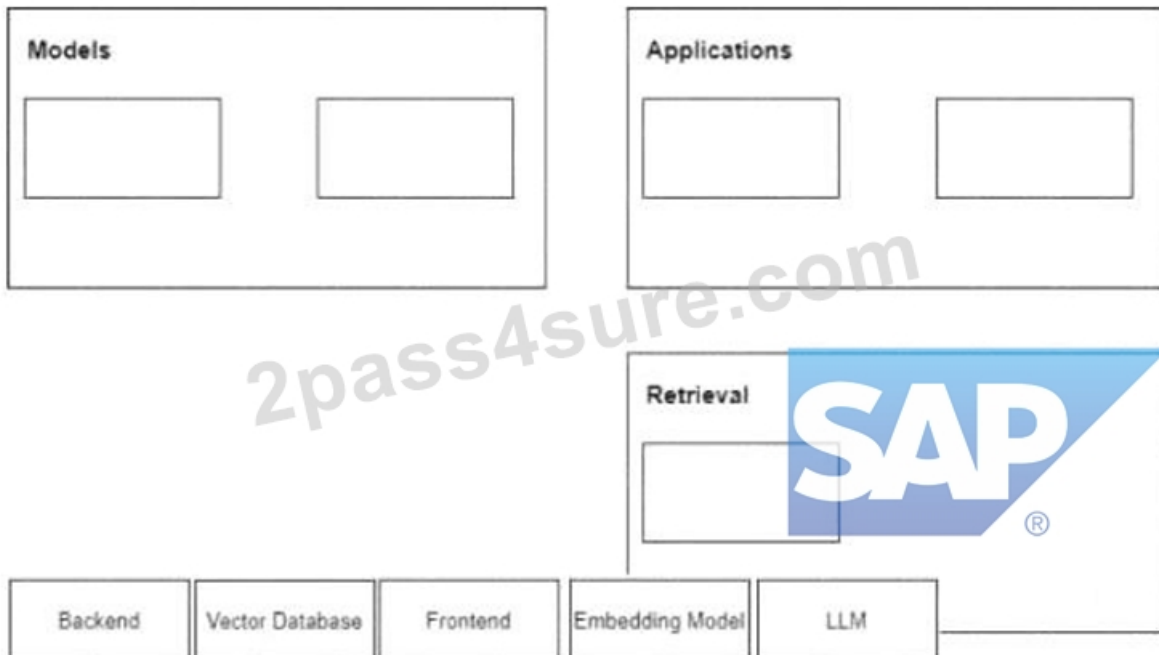

Which neural network architecture is primarily used by LLMs?

- A. Convolutional Neural Networks (CNNs)
- B. Recurrent neural network architecture
- **C. Transformer architecture with self-attention mechanisms**
- D. Sequential encoder-decoder architecture

**Answer: C**

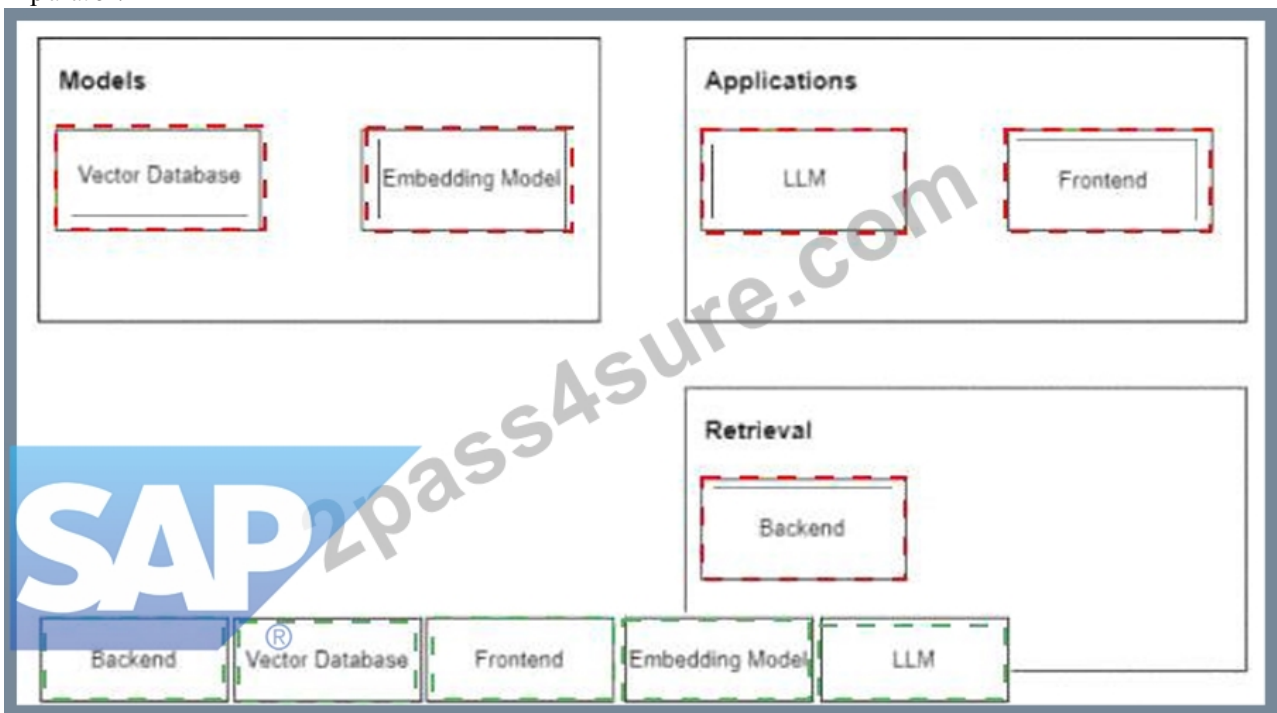

#### NEW QUESTION # 25

Match the components of a Retrieval Augmented Generation architecture to the diagram.

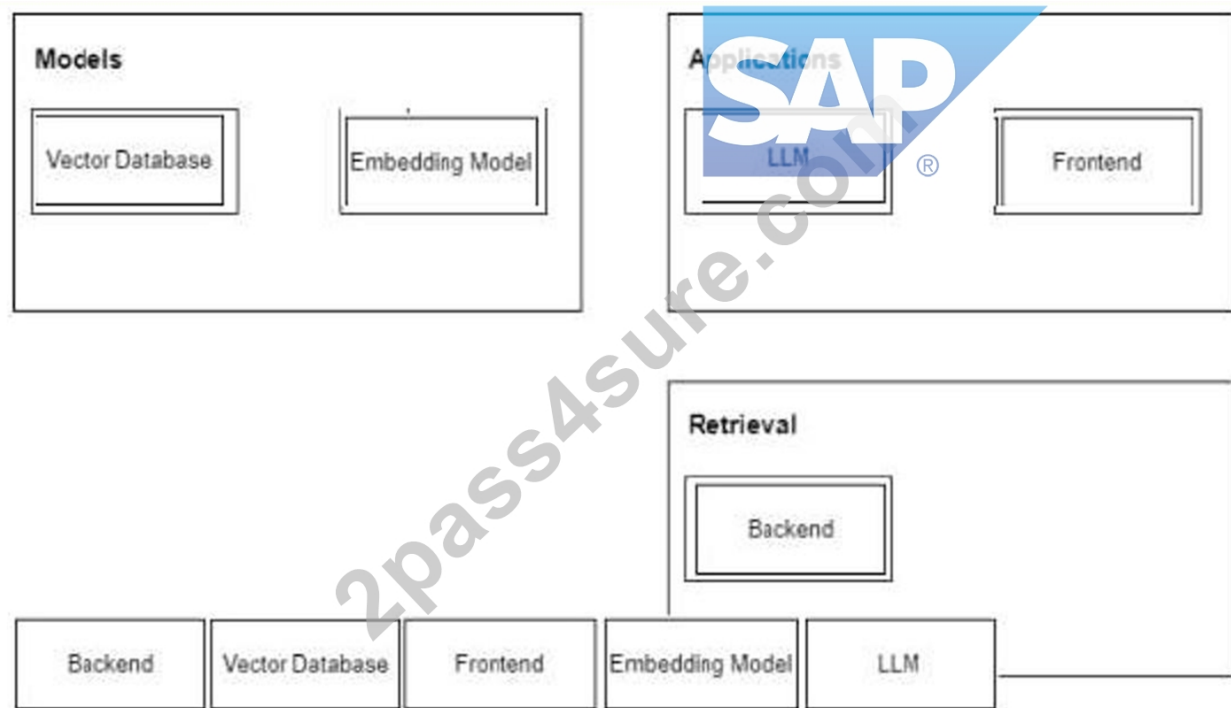

**Answer:**

**Explanation:**

**Explanation:**

A screenshot of a computer Description automatically generated

#### NEW QUESTION # 26

What are some components of the training pipeline in SAP AI Core? Note: There are 2 correct answers to this question.

- A. Executables that define the training process
- B. Input datasets stored in a hyperscaler object store
- C. The SAP HANA database for model storage
- D. Automated deployment to Kubernetes clusters

Answer: A,B

#### NEW QUESTION # 27
