C-AIG-2412 Test Sample Online & Updated C-AIG-2412 CBT
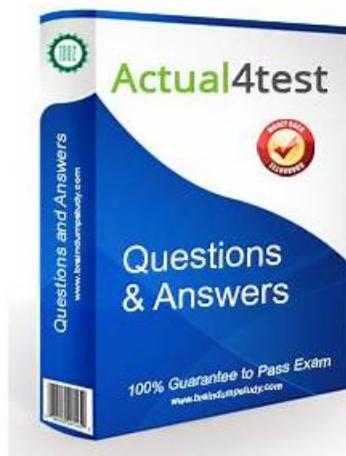

Are you considering the questions that how you can pass the C-AIG-2412 exam and get a certificate? The best answer is to download and learn our C-AIG-2412 quiz torrent. Our C-AIG-2412 exam questions will help you get what you want in a short time. You just need little time to download and install it after you purchase our C-AIG-2412 training prep, then you just need spend about 20~30 hours to learn it. We are glad that you are going to spare your precious time to have a look to our C-AIG-2412 exam guide.

SAP C-AIG-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

Topic 2	• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 3	• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
Topic 4	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.

High-quality C-AIG-2412 Test Sample Online | Amazing Pass Rate For C-AIG-2412 Exam | Pass-Sure C-AIG-2412: SAP Certified Associate - SAP Generative AI Developer

For years our company is always devoted to provide the best C-AIG-2412 study materials to the clients and help them pass the test C-AIG-2412 certification smoothly. Our company tried its best to recruit the famous industry experts domestically and dedicated excellent personnel to compile the C-AIG-2412 Study Materials and serve for our clients wholeheartedly. Our company sets up the service tenet that customers are our gods and the strict standards for the quality of our C-AIG-2412 study materials and the employee's working abilities and attitudes toward work.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q28-Q33):

NEW QUESTION # 28
What are the applications of generative AI that go beyond traditional chatbot applications?
Note: There are 2 correct answers to this question.

- A. To interpret human instructions and control software systems without necessarily producing output for human consumption.
- B. To interpret human instructions and control software systems always producing output for human consumption.
- C. To produce outputs based on software input.
- D. To follow a specific schema - human input, AI processing, and output for human consumption.

Answer: A,B

NEW QUESTION # 29
Which neural network architecture is primarily used by LLMs?

- A. Recurrent neural network architecture
- B. Transformer architecture with self-attention mechanisms
- C. Sequential encoder-decoder architecture
- D. Convolutional Neural Networks (CNNs)

Answer: B

NEW QUESTION # 30
Which of the following are features of the SAP AI Foundation? Note: There are 2 correct answers to this question.

- A. Ready-to-use AI services
- B. AI runtimes and lifecycle management
- C. Open source AI model repository
- D. Joule integration in SAP SuccessFactors

Answer: A,B

NEW QUESTION # 31
Which of the following capabilities does the generative AI hub provide to developers? Note: There are 2 correct answers to this question.

- A. Tools for prompt engineering and experimentation
- B. Code generation to extend SAP BTP applications
- C. Proprietary LLMs exclusively
- D. Integration of foundation models into applications

Answer: A,D

Explanation:
* C. Tools for prompt engineering and experimentation:Generative AI hubs often provide tools and resources to help developers refine their prompts. This is crucial because the quality of the output from a generative AI model heavily depends on how well the prompt is crafted. These tools might include:
* Prompt libraries:Collections of effective prompts for various tasks.
* Prompt testing and analysis:Features to test different prompts and analyze the AI's response.
* Guides and tutorials:Resources to learn about prompt engineering best practices.
* D. Integration of foundation models into applications:Generative AI hubs make it easier for developers to integrate powerful foundation models (large language models like those from Google, OpenAI, etc.) into their own applications. This means developers don't have to build these complex models from scratch. Instead, they can leverage existing models and customize them for their specific needs. This might involve:
* APIs and SDKs:Providing easy-to-use interfaces to access and interact with the foundation models.
* Model customization:Tools to fine-tune existing models on specific datasets or for particular tasks.
* Deployment options:Support for deploying AI models in different environments (cloud, on- premises, etc.).
Why the other options are incorrect:
* A. Proprietary LLMs exclusively:While some generative AI hubs might offer their own proprietary models, they usually provide access to a variety of models, including open-source and those from other providers. This gives developers more flexibility and choice.
* B. Code generation to extend SAP BTP applications:While code generation is a common feature of generative AI, it's not the primary focus of a generative AI hub. The hub's main purpose is to provide access to and facilitate the use of foundation models, not to specifically extend SAP BTP applications.

NEW QUESTION # 32
How does SAP deal with vulnerability risks created by generative AI? Note: There are 2 correct answers to this question.

- A. By implementing responsible AI use guidelines and strong product security standards.
- B. By identifying human, technical, and exfiltration risks through an AI Security Taskforce.
- C. By focusing on technological advancement only.
- D. By relying on external vendors to manage security threats.

Answer: A,B

NEW QUESTION # 33
......

With the development of science and technology, getting C-AIG-2412 certification as one of the most powerful means to show your ability has attracted more and more people to be engaged in the related exams. Thus there is no doubt that candidates for the exam

are facing ever-increasing pressure of competition. Since C-AIG-2412 Certification has become a good way for all of the workers to prove how capable and efficient they are. But it is universally accepted that only the studious people can pass the complex C-AIG-2412 exam.
