- A. In-depth knowledge of business processes across various industries
- B. Robust partner ecosystem with synergistic collaboration
- C. Focus on the technology stack
- D. Direct access to pertinent customer business data
- E. Development of SAP-specific large language models

Answer: A,B,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Unique selling propositions of SAP Business AI include direct access to pertinent customer business data for grounding AI in enterprise contexts, a robust partner ecosystem enabling synergistic collaborations with industry leaders for innovation, and in-depth knowledge of business processes across industries to deliver domain-specific AI solutions. These propositions emphasize SAP's strengths in data integration, partnerships, and process expertise over generic AI technologies.

Exact extracts supporting this:

Direct access to business data: "SAP's main differentiators are - it's access to business data, understanding of the context of complex business processes, and deep domain and industry expertise."community.sap.com Robust partner ecosystem: "SAP Business AI serves as a key differentiator for Service Partners and offers a wide range of business opportunities."sap.com "Unparalleled collaborations with leading general-purpose AI technology providers."news.sap.com In-depth knowledge of business processes: "Understanding of the context of complex business processes, and deep domain and industry expertise."community.sap.com Other options are incorrect because:

Option B: While SAP has a strong technology stack, the focus is on business outcomes rather than the stack itself as a unique proposition; differentiators are data, processes, and ecosystem.

Option D: SAP does not develop its own large language models but partners with providers like Microsoft, Google, and Cohere for LLMs, emphasizing integration over proprietary development.
