In addition, after the purchase, the candidate will be entitled to a one-year free update, which will help the candidate keep the latest news feeds, and will not leave any opportunity that may lead them to fail the C-BCBAI-2509 Exam. We also provide a 100%

refund policy for all users who purchase our questions. If for any reason, any candidates fail in the SAP C-BCBAI-2509 certification exam, we can help you to refund your money and ensure your investment is absolutely safe.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q17-Q22):

NEW QUESTION # 17

How can SAP Knowledge Graph provide context to AI agents? Note: There are 2 correct answers to this question.

- A. By disambiguating terms, linking concepts to entities, and grounding user conversations in domain-specific knowledge
- B. By connecting data from multiple SAP applications and third-party systems
- C. By validating assumptions and deriving logical conclusions from structured relationships
- D. By using advanced analytics and machine learning capabilities

Answer: A,B

Explanation:

The SAP Knowledge Graph enhances AI agents by providing context, as detailed in SAP Business AI documentation. It achieves this by connecting data from multiple SAP applications and third-party systems, creating a unified data model that ensures comprehensive insights. Additionally, it supports AI agents by disambiguating terms, linking concepts to entities, and grounding user conversations in domain-specific knowledge, enabling precise and relevant responses. While advanced analytics and machine learning are part of SAP's AI capabilities, they are not specific functions of the Knowledge Graph. Validating assumptions is a broader AI function, not a primary role of the Knowledge Graph. These features make it a critical component for contextual AI.

NEW QUESTION # 18

Match the SAP LeanIX activities in the dropdown lists to the SAP Activate phases.

The screenshot shows a matching exercise interface. On the left, there are three SAP Activate phases: Discover, Realize, and Run. On the right, there are three SAP LeanIX activities: Explore, Prepare, and Deploy. Each phase and activity has a dropdown menu. The dropdown for Discover is open, showing a list of activities: Achieve architecture transparency, Support business case creation, Define target architecture, Define transformation roadmap, Track architecture transformation, and Improve architecture continuously. The dropdown for Explore is also open, showing the same list of activities. The dropdown for Realize is open, showing the same list of activities. The dropdown for Prepare is open, showing the same list of activities. The dropdown for Run is open, showing the same list of activities. The dropdown for Deploy is open, showing the same list of activities. A large 'SAP' logo is overlaid on the interface.

SAP Activate Phase	SAP LeanIX Activity
Discover	Explore
Realize	Prepare
Run	Deploy

Answer:

Explanation:

The screenshot displays a mapping between SAP Activate phases and LeanIX activities. It is organized into two columns: SAP Activate Phase and LeanIX Activity. The phases listed are Discover, Prepare, Explore, Realize, Deploy, and Run. The activities listed are Achieve architecture transparency, Support business case creation, Define target architecture, Define transformation roadmap, Track architecture transformation, and Improve architecture continuously. Red boxes highlight the correct mappings: Discover to Achieve architecture transparency, Prepare to Support business case creation, Explore to Define target architecture, Realize to Define transformation roadmap, Deploy to Track architecture transformation, and Run to Improve architecture continuously.

SAP Activate Phase	LeanIX Activity
Discover	Achieve architecture transparency
Prepare	Support business case creation
Explore	Define target architecture
Realize	Define transformation roadmap
Deploy	Track architecture transformation
Run	Improve architecture continuously

SAP Activate Phases and LeanIX Activities

SAP Activate Phase	LeanIX Activity
Discover	Achieve architecture transparency
Prepare	Support business case creation
Explore	Define target architecture
Realize	Define transformation roadmap
Deploy	Track architecture transformation
Run	Improve architecture continuously

NEW QUESTION # 19

What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- A. Executive Sponsorship
- B. AI Ethics Steering Committee
- C. AI System engineering
- D. Organizational practice

Answer: B,C,D

Explanation:

SAP's guiding principles for ethical AI are organized into key domain clusters, including the AI Ethics Steering Committee, Organizational practice, and AI System engineering, as outlined in the SAP Responsible AI Framework. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.

SAP Business AI Questions (Batch 3 of 5)

NEW QUESTION # 20

Which of the following are included in SAP's Responsible AI framework? Note: There are 3 correct answers to this question.

- A. Ethical governance
- B. Human-centered design
- C. ESG reporting
- D. SAP Global Human Rights commitment
- E. Transparency and accountability

Answer: A,B,E

NEW QUESTION # 21

You requested Joule to draft meeting talking points. Which way of interacting with Joule does this represent?

- A. Be creative
- B. Chat talk
- C. Informational
- D. Transactional

Answer: A

Explanation:

Drafting meeting talking points with Joule represents a be creative interaction pattern, as it involves generating original content based on user input, leveraging Joule's generative AI capabilities. According to SAP Business AI documentation, creative interactions with Joule include tasks like drafting documents, summarizing content, or generating ideas, which require natural language processing and contextual understanding. Informational interactions focus on retrieving data or insights, transactional interactions involve executing business processes, and chat talk is not a defined interaction mode in SAP's framework. Joule's ability to produce tailored, creative outputs enhances productivity by automating content creation tasks, making it a powerful tool for business users.
