SAP C-BCBDC-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • SAP Analytics Cloud: This section of the exam measures the skills of Data Analysts and covers the use of SAP Analytics Cloud in data visualization, story building, and dashboard creation. Candidates should be familiar with its planning and predictive capabilities, along with how to utilize data insights to drive business decision-making. It also includes managing user access and collaborating through shared analytics assets.
Topic 2	<ul style="list-style-type: none"> • SAP Business Data Cloud: This section of the exam measures the skills of Data Analysts and covers core concepts of the SAP Business Data Cloud. Candidates are expected to understand its key components, integration mechanisms, and how it functions as a foundation for unified data management across SAP and non-SAP environments. The focus is on enabling data connectivity and providing governed access to data across the enterprise.
Topic 3	<ul style="list-style-type: none"> • SAP Datasphere: This section of the exam measures the skills of Solution Consultants and covers a comprehensive understanding of SAP Datasphere. Candidates should demonstrate knowledge of data modeling, transformation, and harmonization using SAP Datasphere tools. It evaluates how well they can work with data layer structuring, semantic modeling, and integration to support real-time data access for various business applications.

SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q19-Q24):

NEW QUESTION # 19

What is the result of activating a Data Package in the SAP Business Data Cloud cockpit?

Please choose the correct answer.

Response:

- A. The deployment of a new SAP Datasphere model.
- B. The creation of a new Intelligent Application.
- C. The removal of an existing Data Package.
- **D. The availability of the corresponding Data Products.**

Answer: D

NEW QUESTION # 20

A healthcare organization is using SAP Business Data Cloud and needs to maintain an audit trail of all changes made to financial data models. Which features help achieve this?

There are 3 correct answers to this question.

Response:

- A. Business Catalog publication
- B. Manual logs in Excel
- **C. Change history view**
- **D. Lineage tracking**
- **E. Version history**

Answer: C,D,E

NEW QUESTION # 21

Which operation is implemented by the Foundation Services of SAP Business Data Cloud?

- A. Generation of an analytic model by adding semantic information.
- B. Execution of machine learning algorithms to generate additional insights.
- C. Storage of raw data inside a CDS view.
- **D. Data transformation and enrichment to generate a data product.**

Answer: D

Explanation:

The Foundation Services component of SAP Business Data Cloud (BDC) is responsible for orchestrating the fundamental processes of data preparation and productization. Specifically, a key operation implemented by Foundation Services is data transformation and enrichment to generate a data product. Foundation Services takes raw data ingested from various business applications and applies necessary transformations, cleanses it, and enriches it with additional context or calculated attributes. This process is crucial for creating high-quality, consumable data products, which are curated and semantically rich datasets designed for specific business use cases. While machine learning algorithms are executed by Intelligent Applications (which consume these data products), and analytic models are built in SAP Datasphere (which is part of the BDC ecosystem), Foundation Services focuses on the foundational work of preparing and productizing the data itself, ensuring it's ready for advanced analytics and consumption.

NEW QUESTION # 22

What scripting language is used in the advanced story interface?

Please choose the correct answer.

Response:

- A. HTML5
- B. Python
- **C. JavaScript**

Answer: C

NEW QUESTION # 23
