Utilizing The C-BCBTM-2509 Reliable Guide Files, Pass The SAP Certified Associate - Positioning SAP Business Transformation Management Solutions

Our approach to SAP C-BCBTM-2509 Exam Preparation is focused on quality over quantity, which means our SAP C-BCBTM-2509 practice tests help you identify the most important concepts and skills you need to master to pass the exam. We also provide ongoing 24/7 support to help you stay on track while using our product.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q25-Q30):

NEW QUESTION # 25

How can BTM Solutions help organizations manage their business transformation?

- A. They help businesses better understand and optimize their processes and IT infrastructure, while assisting the end user coping with digital change.
- B. They are crucial because they exclusively focus on enhancing a company's social media presence and marketing campaigns.
- C. They are important because they provide direct support for human resource management and payroll processing.
- D. They are revolutionary tools to support financial controlling and reporting.

Answer: A

Explanation:

SAP Business Transformation Management (BTM) Solutions combine tools like SAP Signavio, SAP LeanIX, and WalkMe to give enterprises complete visibility and control over both business and IT transformation efforts.

"SAP BTM solutions enable companies to understand and optimize their processes and IT landscapes, while supporting users through change and adoption." Reference:

Process Optimization & IT Alignment:

SAP Signavio provides process mining and analytics, SAP LeanIX maps IT architecture, and WalkMe ensures user adoption. Together, they deliver an integrated framework for sustainable transformation.

"By integrating business process management, enterprise architecture, and user enablement, SAP BTM helps organizations manage complexity and digital adoption simultaneously." User Adoption and Change Management:

WalkMe, a core BTM component, assists employees in adapting to new systems, minimizing disruption during digital transitions.

"BTM solutions assist end users in coping with digital change by delivering in-application guidance and real-time support." Incorrect Options:

A: Financial controlling is an ERP capability, not a BTM function.

B: Marketing is unrelated to BTM's transformation scope.

C: HR and payroll are managed in SAP SuccessFactors, not BTM.

Verified Correct answer: D: They help businesses better understand and optimize their processes and

NEW QUESTION # 26

What is the primary benefit of using SAP Business Transformation Management solutions early in a RISE project?

(Note: There are 2 correct answers to this question.)

- A. They automate non-critical business functions without supporting overall ERP transformation.
- B. The earlier the solutions are leveraged in a transformation project, the more value they can generate.
- C. They are primarily focused on human resources management.
- D. They make ERP transformations more cost efficient by providing faster insights into operations.

Answer: B,D

Explanation:

Leveraging SAP Business Transformation Management (BTM) Solutions early in a RISE with SAP project allows organizations to gain critical insights into their existing processes, applications, and technology landscape. This helps accelerate transformation readiness and reduces rework during design and implementation.

"Early adoption of SAP BTM Solutions within RISE projects maximizes value by providing transparency and actionable insights into business processes and IT landscapes, ensuring cost-efficient and faster ERP transformation." Reference:

Early Value Realization (Answer A):

The earlier BTM tools such as SAP Signavio, SAP LeanIX, and WalkMe are applied, the faster organizations can identify inefficiencies and define transformation scope, which increases long-term value generation.

"The earlier SAP BTM tools are introduced, the more transformation value can be realized through early visibility, stakeholder alignment, and optimized process design." Cost Efficiency through Faster Insights (Answer B):

SAP BTM solutions provide data-driven visibility into as-is processes and dependencies, enabling companies to reduce transformation costs by addressing inefficiencies early.

"SAP BTM enables customers to accelerate decision-making and reduce transformation cost and effort through real-time operational insights." Incorrect Options:

C: BTM solutions do not focus on non-critical automation; they support end-to-end ERP transformation.

D: They are not specific to HR; they span all business domains (Finance, Supply Chain, IT, etc.).

Therefore, the verified and correct answers are:

A: The earlier the solutions are leveraged in a transformation project, the more value they can generate.

B: They make ERP transformations more cost efficient by providing faster insights into operations.

NEW QUESTION # 27

What makes SAP Signavio and SAP LeanIX a powerful combination?

(Note: There are 2 correct answers to this question.)

- A. They help our customers understand the important aspects of a transformation: processes, people, systems, and applications.
- B. Both solutions focus on transforming businesses from a current state to a future state.
- C. We can help our customers lay off 20 to 30 percent of their workforce and therefore reduce costs tremendously.
- D. We can reduce the time for financial reporting by 70% on average.

Answer: A,B

Explanation:

The integration of SAP Signavio and SAP LeanIX provides a complete business and IT transformation view, connecting processes and enterprise architecture to enable end-to-end transparency and alignment.

"The combination of SAP Signavio and SAP LeanIX helps organizations understand how their business processes and IT landscapes interact, ensuring seamless transformation from the current to the target state." Reference:

Transforming from Current to Future State (Answer A):

SAP Signavio focuses on business process transformation, while SAP LeanIX manages IT architecture and application landscapes.

Together, they help organizations move from as-is to to-be states with data-driven clarity.

"Both solutions support transformation by mapping the current state of processes and technology and defining the future state to align with business goals." Understanding Processes, People, Systems, and Applications (Answer B):

The combined solution helps organizations identify interdependencies between business processes, IT systems, and people, a critical factor for successful digital transformation.

"SAP Signavio and LeanIX provide 360-degree visibility into the transformation landscape - processes, systems, and people - to drive coordinated change." Incorrect Options:

C: Workforce reduction is not an SAP transformation objective.

D: Financial reporting speed is not the focus of these tools.

Verified Correct Answers: A and B.

NEW QUESTION # 28

How does the integration between SAP Signavio and SAP LeanIX enhance IT and business alignment?

- A. The tools only provide visualization without actionable insights.
- B. Integration solely enhances reporting capabilities.
- C. Business processes are directly controlled by SAP LeanIX applications.
- D. The integration allows linking of business applications to business processes.

Answer: D

Explanation:

The integration between SAP Signavio and SAP LeanIX provides a unified view of business and IT, allowing companies to connect business processes (Signavio) with IT applications and systems (LeanIX). This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.

B: Both tools provide actionable insights via analytics and process intelligence.

C: LeanIX does not "control" processes; it maps IT dependencies and applications.

Verified Correct answer: D: The integration allows linking of business applications to business processes.

NEW QUESTION # 29

What are typical challenges SAP customers face in an ERP transformation?

(Note: There are 3 correct answers to this question.)

- A. Alignment between business and IT
- B. Significant reduction in product quality
- C. Lack of transparency into processes and system landscapes
- D. Not knowing how and where to start their transformation journey
- E. Inability to generate financial reports due to a lack of data analytics capabilities

Answer: A,C,D

Explanation:

According to SAP's Business Transformation Management (BTMP) and SAP Signavio Transformation Framework, the most common ERP transformation challenges are strategic alignment, starting complexity, and lack of visibility across business and IT landscapes.

"Organizations often face difficulties with aligning business and IT, defining where to start transformation efforts, and gaining transparency across processes and systems." Reference:

A - Alignment between Business and IT:

Misalignment leads to inconsistent objectives between operations and technology strategy.

"Achieving alignment between IT capabilities and business goals remains one of the biggest barriers to transformation." B - Not Knowing Where to Start:

Many organizations lack clarity on prioritization and readiness assessment.

"Determining the starting point and sequencing of transformation steps is a recurring challenge in ERP modernization projects." C - Lack of Transparency:

Without visibility into existing processes, companies struggle to identify inefficiencies or dependencies.

"Insufficient transparency across processes and system landscapes hinders effective transformation planning and execution."

Incorrect Options:

D: Financial reporting challenges are typically ERP operational issues, not transformation barriers.

E: Product quality reduction is not a standard ERP transformation issue.

Verified Correct Answers: A, B, and C.

NEW QUESTION # 30
